

Siddhesh Sawant

Austin, TX

(667)-352-8704

siddhesh.s125@gmail.com

EDUCATION:

- **University of Maryland, Baltimore County** Jan '19 - Dec'20
Master of Science in Information Systems **GPA: 3.57**
Related coursework: Statistical Learning for Data Analytics, Distributed Systems, Advanced Database Project, Structured System Analysis and Design, Decision Technology Systems
- **University of Mumbai, Mumbai, India** Aug'14 - May'17
Bachelor of Science **GPA: 4.0**

TECHNICAL SKILLS:

- **Programming and scripting Languages:** Python, SQL, BigQuery, PL/SQL, JavaScript, HTML, CSS
- **Packages:** NumPy, Pandas, PySpark, Seaborn, Matplotlib, Scikit-learn
- **Databases and Data warehouses:** MSSQL Server, Teradata, BigQuery, Snowflake, Oracle, MySQL, EDW □ **ETL Tools:** Apache Spark, Airflow, SSIS, SSAS
- **Cloud Services:** AWS Certified Cloud Practitioner, Azure blob, Azure Synapse, ServiceNow, Amazon EC2, Amazon Redshift, Amazon S3
- **Reporting Tools and ERP:** Power BI, Tableau, Alteryx, DOMO, SSRS, IBM Cognos Analytics, IFS Cloud □ **Operating System:** Windows, Ubuntu, Linux

WORK EXPERIENCE:

Senior Data Quality Analyst

Employee Retirement System of Texas, TX

Jan'24 - Present

- Led the **end-to-end development of data validation** rules using **Alteryx**, transforming stakeholder requirements into automated workflows that identified data inconsistencies across multiple systems. Utilized Alteryx to perform **ETL** processes, ensuring efficient **data handling** and **transformation**.
- Created complex Alteryx workflows leveraging **T-SQL**, **Oracle SQL**, and **Python** scripts to perform **ETL** processes, extract, transform, and validate **large datasets**, improving **data quality** and compliance with organizational standards.
- Streamlined **error reporting** by designing and optimizing **Tableau** dashboards for upper management, providing **real-time insights** into **data accuracy** and error trends.
- Managed the data pipeline by loading validated error data into **SQL Server**, ensuring **data integrity** and accessibility for downstream reporting and analysis.
- Collaborated with **cross-functional teams**, including **technical stewards** and **stakeholders**, to define and refine **data governance** rules, enhancing overall data quality across the organization.

Data Analyst

Jan'23 – Jan'24

Iron Senergy LLC, Louisville, KY

- Collaborated with analysts to distill **complex data** into concise narratives and efficiently document business requirements.
- Diligently executed and managed **analytical responsibilities**; refined technical proficiencies in **SQL** and **statistical techniques**.
- Leveraged advanced **Tableau** features such as calculated fields, sets, filters, LOD expressions to analyze transactional data.
- Conducted statistical analyses using **Python** and **SAS**, including predictive modeling and regression, to derive **strategic insights** and impact business decisions.
- Utilized advanced SQL functions, joins, subqueries to manipulate **snowflake** data, saving **180 hours** of man-labor quarterly.

- Managed and optimized **data partitioning** and storage in **Amazon Redshift**, achieving a **25%** reduction in query times and ensuring data accessibility and drove strategic business decisions.
- Designed reports using **IBM Cognos Analytics** and **SSRS**, implemented interactive dashboards in **Power BI**.

Data Analyst/Engineer

May'21-Jan'23

Spacee Inc., Dallas, TX.

- Achieved **99.8%** uptime for data pipelines, ingesting **streaming data** from ROVR across 8 sources using **Apache Spark**, **Airflow**, and **Azure Databricks** into **MS SQL Server** and **Snowflake**.
- Utilized **Alteryx** for data manipulation, enhancing decision-making and boosting forecasting accuracy by 15%.
- Streamlined **ETL** workflows using **Astronomer**, achieving a **29%** monthly reduction in manual data processing tasks.
- Conducted comprehensive assessments including cloud deployment (public/hybrid), cloud tiers (**AWS** and **Azure**), operating systems, codebases, databases, cloud services, application dependencies, and disaster resilience.
- Collaborated with project managers and business analysts, enhancing **data pipeline efficiency** and driving a **26%** increase in KPIs.
- Leveraged **Power BI** and **Tableau** to develop reports and dashboards, driving a **12%** rise in monthly sales, managed data refresh and user access on both platforms.

Data Analyst Intern

May'20 – Aug'20

Index Analytics LLC, Baltimore, MD.

- Managed the database with **SQL** queries, designed **stored procedures** and complex queries, reducing manual workload by **15%**.
- Streamlined Excel processes with **VLOOKUP**, **pivot tables**, and **macros**, saving **15 hours** per week on manual tasks.
- Developed and tested RESTful APIs using **Python** and **JavaScript**, streamlined in **Postman**, to optimize data integration and functionality in tech applications.
- Crafted **DAX queries** and implemented **Page**, **Report**, and **Visual Level Filters** in Power BI, tailored to meet specific project requirements.
- Conveyed complex data findings to technical as well as non-technical stakeholders, driving actionable insights.
