

Siddhi Machhindra Kale | Data Analyst

Syracuse, NY | +1 (680)-356-8538 | kalesiddhi2699@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience in healthcare and financial services, specializing in data pipelines, machine learning, and regulatory-compliant analytics. Skilled in SQL, Python, R, and cloud platforms (AWS, Azure, GCP) to manage large-scale datasets and automate ETL workflows. Experienced in healthcare data standards (HIPAA, ICD-10, CPT, HL7, FHIR) and reporting frameworks (CMS, HEDIS, NCQA), as well as financial data analysis involving credit union lending, loan portfolio monitoring, and transaction reconciliation. Proficient in creating dashboards and reports using Tableau, Power BI, and Looker, enabling stakeholders to make timely, data-driven decisions.

TECHNICAL SKILLS

Programming & Software Development: Python, R, SQL (MySQL, PostgreSQL, PL/SQL), Java, Shell Scripting, Git, GitHub, GitHub Actions, Flask, FastAPI, CI/CD Pipelines

Machine Learning & AI: Supervised & Unsupervised Learning, Regression Analysis, Classification, Clustering, Time Series Forecasting, Risk Stratification, Readmission Prediction, Patient Segmentation, Churn Analysis, Loan Risk Modeling, A/B Testing, Statistical Modeling, Model Evaluation & Deployment (AWS SageMaker, Flask APIs), HIPAA-Compliant Analytics

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, PySpark, StatsModels, SciPy, MLflow, Great Expectations, Matplotlib, Seaborn, Data Wrangling, Data Cleaning, Exploratory Data Analysis (EDA)

Financial & Healthcare Data Expertise: Credit Union Lending Workflows, Loan Portfolio Analytics, Transaction Reconciliation, Compliance Reporting, Risk & Regulatory Data (SOX, GDPR, HIPAA), ICD-10, CPT, HL7, FHIR, LOINC, PHI/PII Handling, HEDIS, NCQA, CMS Reporting, Claims Data, Utilization Management, Provider Network Analytics, EHR/EMR Systems (Epic, Cerner)

Database Management & Visualization: SQL, Snowflake, AWS Redshift, Azure Synapse, GCP BigQuery, DBMS, Data Lakes, ETL Processes, Data Pipelines, Source-to-Target Mapping, Apache Airflow, dbt, Microsoft Excel (Power Query, PivotTables), Tableau, Power BI, Looker, KPI Dashboards, Report Automation & Scheduling

Cloud & Deployment: AWS (S3, Redshift, Lambda, SageMaker), Azure (Data Factory, Synapse), GCP (BigQuery, Cloud Functions), Docker, Kubernetes, Delta Lake, Parquet, Avro

Collaboration & Agile Methodologies: Agile, Scrum, JIRA, Confluence, Stakeholder Requirements Gathering, Process Documentation, UAT Support, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Data Analyst UnitedHealth Group Syracuse, NY	Dec 2024 - Present
- Spearheaded end-to-end healthcare data analytics projects involving claims, utilization, and provider network data; utilized SQL, Snowflake, and Azure Synapse to extract and manipulate high-volume datasets. - Expanded HIPAA-compliant data pipelines using PySpark and Airflow, automating ETL workflows and reducing reporting latency by 40%. - Built and deployed ML models (risk stratification, readmission prediction) using Scikit-learn and MLflow, improving predictive accuracy by 18% and supporting population health strategies. - Created dynamic Tableau dashboards and Looker reports to monitor key performance indicators (KPIs), enabling real-time insights for clinical and operational teams. - Collaborated with cross-functional stakeholders (Product, Compliance, Engineering) using Agile and JIRA, delivering insights aligned with NCQA and CMS standards. - Designed and deployed Flask-based API endpoints to serve model outputs for downstream applications and real-time decision-making tools.	
Data Analyst Citius Tech India	Jul 2021 - Jul 2023
- Executed exploratory and statistical analysis on EHR and claims data (ICD-10, CPT, HL7) using Python, Pandas, and SQL to support quality improvement and clinical decision support systems. - Engineered and optimized ETL workflows using dbt, Data Factory, and SQL Server, decreasing data processing time by 35% and enhancing reliability of patient segmentation pipelines. - Implemented time-series forecasting models and A/B testing frameworks for utilization management and intervention evaluation, contributing to a 12% reduction in avoidable admissions. - Ensured strict PHI/PII compliance through implementation of HIPAA-compliant data handling practices and automated validation with Great Expectations. - Enhanced KPI dashboards in Power BI and Excel (Power Query, PivotTables) for client leadership, enabling strategic decision-making on resource allocation and provider performance. - Supported CMS reporting and HEDIS measure calculations using StatsModels and custom rule-based logic, ensuring regulatory compliance and contract renewals.	
Data Analyst Intern Hexaware Technologies (Client: Credit Union in the US) India	Jan 2020 - Jun 2021
- Partnered with US Credit Union teams to understand lending and risk processes, documenting clear data mapping requirements and supporting system changes for financial reporting. - Wrote and optimized SQL queries to reconcile daily transaction data, uncover mismatches, and ensure accuracy across multiple banking systems. - Assisted in building ETL workflows on Snowflake and AWS, validating data pipelines and ensuring smooth migration of credit union data to cloud platforms. - Designed and executed data validation test cases, resolving quality issues that impacted loan performance and compliance reporting. - Created Power BI dashboards tracking loan portfolios, delinquency trends, and customer activity, helping business team's act on insights faster. - Supported customer churn analysis and loan risk modeling, providing actionable findings that influenced retention strategies and credit decisioning.	

EDUCATION

Masters in Information Systems Syracuse University Syracuse, New York	May 2025
Bachelors in Information Technology Ramrao Adik Institute of Technology Mumbai, India	Jul 2021

CERTIFICATIONS

- Microsoft 98-381: MTA: Introduction to programming using Python
- Microsoft Office Specialist: Excel Associate
