

Sidra Rehman

Karachi, Pakistan • +92-3133087025 • sidrarehman192@outlook.com • www.linkedin.com/in/sidra-rehman-2b10581a2/

EXPERT IN: • Information Security • Cybersecurity • IT / IS Audit • Risk Management • IT GRC • ISMS • IT Policies & Procedures • Frameworks & Standards (ISO 27000/27001, NIST , CIS Benchmark, SAMA CSF, SOC Type 1 / Type 2, HIPPA, GDPR, STIG-DISA, PCI DSS, COBIT) • Enterprise Business Solutions (SAP, ArcGIS, AMS) • Forensics Tools (Autopsy, FTK Imager, Steganography) • Security Tools (Wireshark , PAM, Metasploit, Nmap, SIEM, Firewall, DLP, SOC) • Audit tools (E-Audit) • GRC Tools (ServiceNow, StandardFusion) • Compliance Tools (Drata, Vanta, Tugboat, SecureFrame, Akrita, Sprinto) • Ethical Hacking • IT & Cybersecurity Consultancy • Active Directory • Linux / Unix • Programming (Python, HTML , CSS) • Data Analytics • Power BI • Qlik Sense • Jupyter Notebook • Git & GitHub • SQL (MySQL, PostgreSQL, Oracle)

~ IT Specialist with over 3 years of experience in IT risk management, cybersecurity, and IT auditing, with a strong track record of implementing strategic IT initiatives and ensuring compliance with global standards such as ISO 27001, SOC 2, GDPR and NIST. Demonstrated expertise in identifying and mitigating cyber threats, strengthening internal controls, and enhancing IT operations for improved efficiency and security. Proficient in data analytics with hands-on experience in Power BI, SQL, and Python to deliver actionable insights and visualize complex audit and asset data for informed decision-making., and Python to generate actionable insights and visualize complex audit and asset data. ~

■ PROFESSIONAL EXPERIENCE

KINVERG, REMOTE (LAHORE) | JANUARY 2025 – JULY 2025 | ISMS CONSULTANT

SOC 2 Type 2 Audit Readiness – Applied Particles Technologies (APT):

- Provided SOC 2 Type 2 readiness consulting, including gap assessment, control design advisory, and evidence preparation to ensure the organization met audit and compliance requirements.

ISO/IEC 27001:2022 Implementation – Digitify:

- Delivered comprehensive ISO 27001 audit readiness services.
- Performed detailed gap analysis to identify missing controls and prepared the Statement of Applicability (SoA)
- Reviewed and Drafted security policies, procedures, templates, plans etc
- Created a detailed list of Digitify's asset inventory and built a risk assessment repository
- Reviewed the risk register and prepared a risk assessment plan to reduce and manage risk.
- Collected and prepared evidence for ISO 27001 compliance and control mapping
- Creating tailored templates for plans, reports, and operational procedures
- Trained team members on compliance control, audit trail management, and evidence readiness

K-ELECTRIC, KARACHI | JULY 2023 – JANUARY 2025 | ASSISTANT MANAGER

- Conducting field visits, facilitating KYC (know-your-customer) sessions, coordinated with auditee to perform system walkthroughs, and staying updated on modern technologies to optimize business processes.
- Creating Business Understanding Documents to capture system and solution insights within ongoing audit engagements.
- Executing audit exercises by conducting 'test-of-controls' and 'substantive-testing' across various platforms such as SAP, Oracle, IT Governance, IT infrastructure services, data center facilities, back-office IT ecosystem solutions, on-premises, and cloud-based IT solutions, including core IT services, endpoint management, and NOC operations.
- Achieved alignment of audit activities with organizational objectives by defining and developing IT audit plans, scope, objectives, and methodologies in liaison with cross-functional teams, including compliance, IT, and security.
- Established and oversight internal controls to ensure protection of information assets while achieving enhanced security and compliance with industry standard and enhanced organizational security by reviewing and ensuring vendor contracts complied with rigorous security and privacy standards, mitigating potential risks effectively.
- Conducting planned/unplanned audit assurance, consulting, and follow-up activities and generating comprehensive field audit findings supported by relevant evidence for review by line managers.
- Responsible for performing audit activities from audit planning, fieldwork, reporting and follow-up in E-Audit software.
- **Audit Exercises:** Active Directory Implementation & Management Review | SAP ARIBA Implementation & Control Review | Firewall & Security Appliance – Implementation & Security Control Review | ArcGIS – Functional & Control Review | IT Governance Functional Review | Security Operation Center Process & Management Control Review | Privileged Access Management Review | Static Application Security Testing (SAST) Review | Dynamic Application Security Testing (DAST) Review | Interactive Application Security Testing (IAST) Review

**KINVERG LTD, REMOTE (LAHORE) | FEB 2023 – JUNE 2023 |
CYBERSECURITY TECHNICAL WRITER**

- Developed and implemented comprehensive IT policies and aligned all IT activities with the business goals to enhance operational efficiency and security posture while ensuring regulatory compliance.
- Conducted research projects on global data privacy & protection laws and regulations.
- Composed clear, concise, and accurate technical documentation, including user manuals, guides, white papers, and specifications for cybersecurity products, tools, and technologies.
- Researched and translated complex cybersecurity concepts into easily understandable written content for diverse audiences, such as end-users, IT professionals, and executives.
- Established and maintained documentation standards, templates, and style guides to ensure consistency, clarity, and quality across all cybersecurity documentation.
- Reviewed, revised, and updated existing documentation to reflect changes in cybersecurity technologies, threats, regulations, and best practices.
- Conducted thorough reviews and quality checks of documentation to ensure accuracy, completeness, and adherence to organizational standards and industry regulations.

**GRAVITAS TECHNOLOGY - GRC360 (REMOTE) || SEPT 2022
– NOV 2022 | IT CONSULTANT**

- Supported PCI DSS compliance projects for banking sector clients, ensuring alignment with industry standards and regulatory expectations.
- Participated in evidence collection activities, coordinating with client teams to obtain relevant technical, procedural, and policy documentation.
- Conducted walkthrough sessions along with team lead with clients to verify implemented controls and clarify technical compliance requirements.
- Assisted in designing compliance documentation and mapping controls to PCI DSS requirements
- Prepared detailed Report on Compliance (ROC) and completed the Self-Assessment Questionnaire (SAQ) for PCI DSS audits.

**QUANTAM LEAP (REMOTE) || FEB 2022 – SEPT 2022 |
CYBERSECURITY AUDITOR**

- Conduct comprehensive assessments of IT systems, networks, and infrastructure to identify vulnerabilities and potential security risks.
- Evaluate existing cybersecurity policies, procedures, and controls to ensure compliance with industry standards and regulatory requirements such as ISO 27001, 27017, PCI DSS, SOC, NIST, HIPAA, CIS, GDPR etc.
- Conducted audits and assessments for various clients, including Vanta, Drata, Secureframe, Tugboat, Sprinto, and Akrita.
- Conducted thorough reviews and quality checks of documentation to ensure accuracy, completeness, and adherence to organizational standards and industry regulations.
- Perform penetration testing and vulnerability scanning to identify weaknesses in systems and applications.
- Analyze security logs and incident reports to detect and respond to cybersecurity threats in a timely manner.
- Provide recommendations for improving cybersecurity posture and mitigating risks to protect sensitive data and intellectual property.

**TRILLIUM INFORMATION SECURITY SYSTEMS (REMOTE) || FEB 2022
– MAY 2022 | INFORMATION SECURITY SOLUTION INTERN**

- Responsible for installing, deploying, and tuning the DLP (Data Loss Prevention) solution for the enterprise network.
- Configured and installed Windows Server on Virtual Machines, Worked on Active Directory creation and managing Windows hosts by adding them to the appropriate domains, installed configured and managed DNS DHCP server.
- Understanding of Information Security Monitoring, logging, auditing, and event response principles.
- Assist in the implementation and configuration of security solutions such as firewalls, intrusion detection systems (IDS), and antivirus software.
- Collaborate with cross-functional teams to identify security requirements and integrate security solutions into existing IT infrastructure.
- Assist in the monitoring and analysis of security events and alerts to identify potential security incidents or breaches.
- Support the maintenance and documentation of security policies, procedures, and standards.

■ EDUCATION

MS Cybersecurity - National University of Science and Technology (NUST, PNEC)

SEPTEMBER 2021 - JUNE 2023

BE Computer Systems Engineering – Mehran University of Engineering and Technology (MUET)

DECEMBER 2016 - DECEMBER 2020

■ PROFESIONAL TRAINING & CERTIFICATIONS

- Cybersecurity Foundations-GRC - National Association of State Boards of Accountancy (NASBA) from Coursera.
- ISO 27001 Information Security Management Systems (ISMS) – Udemy
- ISO 27001 Lead Auditor Training - PECB
- Risk Assessment and Management - Coursera
- Practical Ethical Hacking - TCM Security, Inc.
- CCNA Certification Training - Cisco Learning
- Network AWS & Azure Cloud Training – Sherdil
- Professional Membership: ISACA, PISA (Pakistan Information Security Association)

■ PROJECTS

- Access Rights Review using Python and Active Directory Logs
- Simulated Active Directory Environment for Audit-Ready Configuration Testing
- Risk Heatmap Visualization using Power BI
- ERP Audit Trail Monitoring using SQL and SAP Logs
- ArcGIS-Integrated Power BI Dashboard for Electrical Asset Validation and Geospatial Visibility
- Firewall Security Configuration and Policy Hardening using Palo Alto & FortiGate
- AI Virtual Assistant Bot using machine learning.
- Healthcare record management system using Blockchain.
- Implementation of a Public Key Infrastructure (PKI)
- Designed and Configured StrongSwan VPN to monitor IPsec connection.
- Designed and configured customized pfsense in network.
- Identification of credit card fraud using machine learning

■ ACHIEVEMENT

- Secured 2nd position in the National PakCrypt Challenge 2022, organized by the National Centre for Cyber Security (NCCS) and Air University (PNEC) as part of the Pakistan Cybersecurity Challenge (PCC).
- Achieved 1st position in the Cybersecurity Quiz Competition at the Karachi Qualifier of the Digital Pakistan Cybersecurity Hackathon 2022, organized by Ignite – Ministry of IT & Telecom.
- Ranked among the Top 10 in the Capture The Flag (CTF) competition at the Karachi Qualifier of the Digital Pakistan Cybersecurity Hackathon 2023, hosted by Ignite – Ministry of IT & Telecom.
- Received an Appreciation Award at PakCrypt 2022, jointly conducted by NCCS and Air University during the National Pakistan Cybersecurity Challenge.
- Secured a Top 5 position in the Ignite CTF Competition 2024 at the Karachi Qualifier of the Digital Pakistan Cybersecurity Hackathon, organized by the Ministry of IT & Telecom.
