Business Analyst | Data Analyst | Data Science | Business Intelligence Analyst

EDUCATION

MASTER OF SCIENCE (MS) IN BUSINESS ANALYTICS
UNIVERSITY OF TEXAS AT ARLINGTON, ARLINGTON, TEXAS

FALL 2023-SPRING 2025

BACHELOR OF ENGINEERING (BE) IN ELECTRICAL ENGINEERING,
UNIVERSITY OF MUMBAI, MUMBAI, INDIA

FALL 2017 - SUMMER 2021

TECHNOLOGY EXPERTISE

SQL, POWER BI(POWER QUERY EDITOR, DAX, DATA MODELING), PYTHON (NUMPY, PANDAS, MATPLOTLIB), TABLEAU, ETL, R-STUDIO, OFFICE 365, MS EXCEL(PIVOT TABLES, V-LOOKUP, X-LOOKUP)/ WORD/POWERPOINT, ALTERYX, PROJECT MANAGEMENT

PROFESSIONAL EXPERIENCE

Graduate Administrative Assistant , University of Texas at Arlington

FEB 2024 – MAY 2025

- Managed and maintained a database of 4,000+ test-takers, ensuring data accuracy, integrity, and compliance with testing policies.
- Optimized documentation workflows, exam scheduling, and check-ins, reducing process time by 20% and improving operational efficiency.
- Mentored and trained 4 team members, providing hands-on guidance on database management, system navigation, and key responsibilities.

Assistant Systems Engineer, Tata Consultancy Services

DEC 2021 – JUNE 2023

- Utilised SQL to validate backend data for credit card processing, ensuring accuracy in account standing states and supporting data-driven defect analysis, reducing errors by 35%.
- Conducted functional and UAT testing, developing and maintaining comprehensive test cases based on client use cases to ensure thorough test coverage.
- Executed and managed multiple test cycles in ALM, identifying, raising, and tracking defects per release, achieving a 98% defect resolution rate.
- Verified account statuses and transaction processing using TSYS, ensuring compliance with business rules and system requirements.

PROJECTS

Electric Vehicle Data Analysis

JAN 2025

- Developed an interactive Tableau dashboard to analyze electric vehicle data, processing over 150K records and 23 fields.
- Utilized calculated fields, advanced formulas (COUNTD, AVG, IF-ELSE statements) to design KPI-driven visualizations leading to better EV adoption strategies.

Customer Segmentation and Personality Analysis

Nov 2023

- Utilized Principal Component Analysis (PCA) for dimensionality reduction, enhancing model efficiency and accuracy, with Decision Tree Classifier and Logistic Regression models achieving accuracies of 85.55% and 85.10%.
- Created visualisations like heat maps & box plots to uncover spending patterns & guide decisions.
- Improved prediction accuracy post-PCA, increasing Random Forest accuracy from 84.88% to 85.55% and Logistic Regression from 82.39% to 85.10%, while addressing class imbalances for more balanced predictions.

Excel Sales Dashboard

DEC 2024

- Designed 5 interactive visualizations using Pivot Tables and Charts, streamlining data interpretation and accelerating stakeholder decision-making.
- Integrated interactive slicers, reducing data filtering time by 50% and enabling dynamic real-time analysis.

RELEVANT COURSEWORK

DATA MINING, DATA WAREHOUSING & BUSINESS INTELLIGENCE, ECONOMIC FORECASTING, PYTHON, BUSINESS STATISTICS, WEB & SOCIAL ANALYTICS, CLOUD COMPUTING, AI IN BUSINESS, DBMS
