SUMMARY

Over 4+ years of experience in designing and delivering **secure, scalable, and high-performance web applications**. Proficient in **Python (Django, Flask, FastAPI), TypeScript, React, Vue.js, Angular**, and modern backend technologies. Strong expertise in **RESTful APIs, GraphQL, microservices, SQL/NoSQL databases, CI/CD pipelines, and cloud platforms (AWS, Azure, GCP)**. Skilled in Agile/Scrum, DevOps, and observability with proven ability to translate business requirements into technical solutions while mentoring teams and driving customer success.

WORK EXPERIENCE

AbbVie Inc

Irvine, CA

Python Full Stack Developer

Jul 2024 – Current

- Developed and maintained enterprise-scale healthcare applications using Python, Django, Flask, and FastAPI, designing and optimizing RESTful APIs, GraphQL, and gRPC with PostgreSQL, MySQL, MongoDB, Redis, and Elasticsearch.
- Implemented secure authentication (OAuth 2.0, JWT, SAML) compliant with HIPAA and PCI-DSS, and built scalable microservices with Docker, Kubernetes, Apache Kafka, and RabbitMQ for real-time data streaming.
- Developed responsive front-end applications with React.js, Vue.js, Angular, TypeScript, HTML5, CSS3, SASS, Bootstrap, and Jinja2, enhancing customer engagement and aligning with UX standards.
- Automated CI/CD pipelines using Jenkins, GitHub Actions, GitLab CI/CD, CircleCI, and ArgoCD across AWS and Heroku, while managing infrastructure with Terraform, Ansible, and Helm for consistent environment provisioning.
- Monitored application performance with Prometheus, Grafana, ELK Stack, and Datadog, implemented robust testing (TDD & BDD) with PyTest, UnitTest, Selenium, Mocha, Jest, and Cucumber, and collaborated within Agile/Scrum teams using Git, Jira, and Confluence.

Alliant Insurance Services

San Francisco, CA

Python Full Stack Developer

Jul 2023 – May 2024

- Built and deployed microservices with Docker and Kubernetes, implementing CI/CD pipelines via Jenkins, GitHub Actions, GitLab CI, and Circle CI. Automated provisioning with Terraform and Ansible for consistent, fault-tolerant deployments across Azure, AWS, and GCP.
- Maintained enterprise financial applications with Python, Django, Flask, FastAPI, React.js, Vue.js, Angular, HTML5, CSS3, and Bootstrap, enhancing customer engagement.
- Implemented secure authentication and authorization frameworks using OAuth 2.0, JWT, and SAML to safeguard sensitive financial data and ensure PCI-DSS compliance.
- Enabled event-driven architecture with Apache Kafka and RabbitMQ for real-time transaction processing, fraud detection, and customer communications. Applied TDD and BDD practices with PyTest, Mocha, Jest, and Selenium, ensuring robust API documentation and testing using Swagger and Postman.
- Processed large-scale actuarial and financial datasets with Apache Spark, Hive, and HDFS, delivering insights for risk assessment and fraud detection, while enhancing system monitoring with Prometheus, Grafana, ELK Stack, and Datadog.

Bharat Heavy Electricals Limited

Bangalore, India

Senior Python Developer

Jun 2020 - Jun 2022

- Developed and deployed industrial data platforms using Python, Django, Flask, SQL, PostgreSQL, MySQL, and MongoDB, enabling asset performance monitoring, predictive maintenance, and supply chain optimization across energy and manufacturing systems.
- Built large-scale data pipelines and analytics frameworks leveraging Pandas, NumPy, Apache Spark, Hadoop, and Kafka for real-time processing of plant telemetry, sensor, and production data, driving ML-based anomaly detection and energy efficiency insights.
- Automated CI/CD workflows using Jenkins, integrating PyTest, UnitTest, and Selenium to enforce TDD/BDD and enhance reliability of mission-critical industrial applications.
- Implemented security and compliance standards via OAuth 2.0, JWT, SSL, and industrial-grade audit controls, protecting operational and SCADA system data from unauthorized access and ensuring system traceability.

EDUCATION

Arizona State University

Tempe, AZ

Master of Science in Information Technology

Aug 2022 - May 2024

KEY SKILLS

Programming & Scripting: Python, TypeScript, JavaScript (ES6+), SQL, Kotlin, Shell Scripting

Frameworks & Libraries: Django, Flask, FastAPI, React, Vue.js, Angular, Node.js, Express.js, Bootstrap, SASS

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Elasticsearch, SQLite, Firebase

APIs & Messaging: RESTful APIs, GraphQL, gRPC, WebSockets, Socket.io, GraphQL Subscriptions, Kafka, Celery

DevOps & CI/CD: Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD, Travis CI, CircleCI, ArgoCD

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, API Gateway), Azure, Google Cloud, Terraform, Ansible, Helm

Testing & QA: PyTest, UnitTest, Selenium, Mocha, Jest, Jasmine, Cucumber, RSpec, Postman

Monitoring & Observability: Prometheus, Grafana, ELK Stack, New Relic, Datadog, OpenTelemetry

Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Agile/Scrum

Design & UX: Figma, Sketch, Adobe XD, Photoshop (for developer-design collaboration)

Practices: Agile SDLC, System Design, Scalability, TDD/BDD, Problem-solving, Constructive Feedback
