Professional Summary

Enthusiastic Developer proficient in Python, C++, JavaScript/TypeScript, and modern frameworks for effective technology tools. Passionate about leveraging innovative technologies to solve complex problems and contribute to high-impact projects. Eager to bring technical expertise and a strong work ethic to a dynamic team.

Technical Skills

Programming Languages: C++, Python, Java/Spring boot (beginner)

Web Development: HTML, CSS, JavaScript, React.js, Node.js, TypeScript

Database Technologies: Oracle, Postgres, MongoDB, SQL, MySQL, NoSQL

Tools & Frameworks: Git, GitHub, Docker, CI/CD, Flask,

Familiar With: REST APIs, Agile/Scrum, AWS, .NET, C#, OOP/Data Structures, Linux

Professional Experience

CyberTeck Academy, Manassas, VA

Technology/Coding Instructor, Part-time Contract | September 2025 – Present

- Delivering engaging instruction in Minecraft Programming, Game Design, Animation, and Lego Robotics for 8 – 12 students.
- Maintaining an organized, and on-time learning environment while fostering creativity and interest in technology.
- Set up laptops and classroom equipment to ensure smooth operation of technology-based lessons.

Density6, La Marque, TX

Software Developer, Part-time | March 2024 – Present

- Designed and implemented cloud-based and cybersecurity solutions, improving system scalability and resilience.
- Prototyped next-gen AI and AR/VR applications, integrating machine learning and real-time data visualizations.
- Partnered with cross-functional teams to deliver enterprise-grade software under tight deadlines.

St. Cloud State University, St. Cloud, MN

Visualization Laboratory Intern | May 2023 – August 2023

- Enhanced rendering speeds by 20% through 3D model optimization for Unity3D-based VR simulations.
- Applied Blender to adjust UV mapping and improve visual fidelity and realism in AR/VR models.
- Contributed to the creation of immersive user interfaces by embedding interactive elements into simulations.

St. Cloud State University, St. Cloud, MN

Research Assistant, Preservation of Endangered Languages | Sept 2022 – May 2023

- Built a Text-to-Speech synthesis system to help revitalize Betine, an endangered language from Côte d'Ivoire.
 - Applied audio processing and machine learning models to improve synthesized voice clarity and realism.
 - Streamlined PSOLA analysis to merge different WAV files, improving playback and engagement.
-

Projects

Learning Management System (LMS)

- Build a full-stack LMS app using Next.js, Supabase, and Stripe, implementing secure user authentication, subscription, billing, and real-time voice AI tutoring with Vapi to deliver an interactive learning experience.
- Leveraged TypeScript, Tailwind, shadcn/ui, Zod, and Sentry to design scalable, responsive UI components by monitoring performance in a production-ready application.

Task Management Application

- Built the backend for a task management system, enabling user authentication, folder organization, and task tracking using Python and Flask.
 - Integrated PostgreSQL and MongoDB for data storage, ensuring efficient and consistent data retrieval for user-specific information.
 - Implemented features like task categorization and notifications, improving user experience and productivity.
-

Education

St. Cloud State University, St. Cloud, MN

B.S. in Computer Science — Graduated December 2023

GPA: 3.22

Program accredited by the Engineering Accreditation Commission of ABET.

Coursework: Google Data Analytics Professional Certificate
