

SIMANT VERMA

Address: 5009 Conser Street Mission KS 66202 **Phone:** 623-363-9850 **Email:** simantv@hotmail.com

LinkedIn Profile: <https://www.linkedin.com/in/simant-verma-b2b8742>

SUMMARY: Over twenty (20+) years of professional experience in IT industry with emphasis on Quality Assurance, Business System Analysis, Data Analysis, and Data Warehousing (BI)

- Working knowledge of BI tools including Informatica PowerCenter, MS SSIS, IMB Data Stage, Cognos, Hyperion, Tableau, MicroStrategy
- Experienced with various databases, such as AWS Red Shift, Snowflake, GCP Big Query, Azure Synapse Analytics, Databricks, Oracle, DB2, Teradata, MySQL, PostgreSQL, SQL Server Management Studio
- Good understanding of Relational and Dimensional data modeling, such as 3NF, Star Schema, Snowflake
- Strong understanding of Dimensions vs. Facts, and Slowly Changing Dimensions (SCDs)
- Experienced in writing and executing PL/SQL procedures and statements for DW/ETL/database testing
- Proven experience in writing complex SQL joins, performance tuning, validating data transformations, data pipelines, and ETL workflows.
- Good experience with programming languages, such as Python and Java for test automation.
- Detailed knowledge and experience with test management and bug reporting tools, such as ALM (Quality Center), Rational Clear Quest, JIRA, qTest, Tableau
- Good understanding and comprehension of cloud technologies, such as Amazon Web Services (AWS), Microsoft Azure, Google, Salesforce Cloud Platform
- Good domain experience in Healthcare, Insurance, banking and financial services

PROFESSIONAL EXPERIENCE:

04/24 to Present: T-Mobile (tsQs Inc.) Overland Park KS

Supervisor: Sydney Sterns

QA Lead

- Successfully managed SQAR Elevate o9 Supply Chain and Demand Planning project in an agile development environment that includes SAP ECC, BW and Lakehouse.
- Handled onsite and offshore team of over 24 QA Engineers and delivered a successful end to end test completion based on a very aggressive timeline
- Oversaw and managed both manual and automated testing effort that involved qTest, Tableau and TOSCA automation tools
- Represented SQAR in defect triage meetings and provided daily status reports to the senior management
- Performed functional, regression, and performance testing of data pipelines and transformations.
- Developed data comparison and validation scripts for large datasets in DataBricks, Snowflake and BigQuery DW.
- Automated data validation and reconciliation using Python, SQL, and testing frameworks.
- Integrated automated tests into CI/CD pipelines for continuous testing and deployment.
- Worked closely with cross-functional teams, including both technical and non-technical stakeholders, to improve project outcomes and optimize QA processes.

Environment: SAP ECC, BW, Lakehouse, qTest, JIRA, Confluence, SharePoint, Excel, Tableau, TOSCA, Oracle, SQL, GCP, BigQuery DW, Python, PyTest, Hadoop, Pyspark, DBT, Great Expectations, GitHub, Jenkins, Oracle, DataBricks, Snowflake

05/17 to 11/23: Emids Technologies, Nashville TN

Supervisor: Mridul Basu

QA Lead

- Successfully managed multiple (CVS/Aetna, Cytel, BCBSAL) projects, such as LiveSLR, MIC, GBIS in an agile (scrum) development environment.
- Collaborated with business and technology experts to translate requirements into effective technological solutions.
- Monitored and executed ETL jobs using DataStage, DataBricks and worked closely with development teams for the ETL and BI reports data integration, and data quality issue resolution.
- Used GCP Big Query, Python Pyspark and Databricks for structured data analysis, and big data processing.
- Collaborated with cross-functional teams to understand the ETL and BI reports data mapping requirements and designed the test cases from scratch.
- Verified JIRA stories, Azure Cloud storage files, Service Requests or Change Requests and approved them for Production deployment once QA and UAT completed using CI/CD process.
- Achieved 100% success rate with no post-production defects on successive sprint releases.

Environment: Databricks, Azure Synapse Analytics, GCP Big Query, TOSCA, HP ALM Quality Center, WinSQL, IBM InfoSphere, qTest, Hadoop, Spark, Postman, TestRail, Python, Selenium, ADO, Python, Pytest, Pyspark, IBM Sailfish DB2, DataStage, JIRA, Tableau, Bitbucket, Git, Jenkins, Confluence

02/16 to 04/17: DTE Energy, Detroit MI

Supervisor: Janet Burton SAP QA Lead

Analyst

- Performed test data preparation, test script writing, test case execution and end to end lifecycle and business acceptance testing for SAP CRM functional modules FICA, Billing and Invoicing (Back Office).
- Performed legacy billing system and current SAP bill comparison using SAP T-codes in SAP ISU.
- Performed Customer Relations and Billing (CR&B) application web services testing using SoapUI. Performed API authentication and authorization of services using OAuth 2.
- Validated mobile (iOS and Android) customer payment application using web services call and response, and payment data in backend database.
- Worked on the Selenium TestNG framework scripts using Page Object Model and automated the nightly batch jobs using Jenkins CI/CD process.
- Received business appreciation for the quality of deliverables.

Environment: Oracle, Windows 7, MS Office, HP ALM Quality Center 12.01, MS SharePoint, Informatica PowerCenter, SAP CRM, SAP ISU, TOSCA, Selenium, Java, SoapUI, XML, JMeter, HP LoadRunner, Jenkins

02/12 to 01/16: Blue Cross Blue Shield of Michigan, Detroit MI

Supervisor: Greg Laidlaw

BI Tech Lead Analyst

- Successfully led HEDIS, Provider (Portico/PGIP/OSC) and Claims (Facility, Professional, Drug/Pharmacy, Vision) subject area as Subject Matter Expert
- Performed data analysis, data profiling/trending, End to End testing for the CPDM (Clinical Program Data Mart) application group.
- Created smoke and regression automation test scripts using Pytest framework to improve the testing process efficiency and effectiveness.
- Prepared source to staging and staging to target SQL test scripts to validate the XML, Access, Flat File external source data load in SQL Server tables.
- Worked with the business and development teams to resolve the existing DQ issues, new application/code changes and improve the quality of the business deliverables.

Environment: SQL Server 2008/2012, MS Office, Citrix VDI, JIRA, XML Marker, Cygwin, Visio, Oracle 11g, Toad 9, Python Pytest, Erwin, MS SharePoint, SVN

04/10 to 1/12: Blue Cross Blue Shield Association, Chicago IL

Supervisor: Paresh Patel

PV/Data Analyst

- Managed Provider Data Repository application SIT and UAT testing for the PDR group.
- Prepared test plan, test strategy, test estimation, requirement traceability matrix and test result summary report documents
- Reviewed and resolved the Selenium test automation issues for the Web UI and Cognos reports.
- Performed field standardization data validation for the SAP DQM tool.
- Validated various production patches and fixes using PL/SQL and excel macros.
- Monitored and verified Informatica ETL mappings/procedures and functionalities based on system and data requirements.

Environment: MS Excel, QTP, Quality Center, Oracle 10g, Toad, Selenium, Cognos, Putty, ERwin, Informatica PowerCenter, IBM WebSphere, Requisite Pro, Clear Case, Clear Quest, Win SCP, IBM Mainframe Terminal Emulator, SAP

08/08 to 03/10: Gartner Inc., Stamford CT

Supervisor: Eric Poupon

Project Architect

- Managed System, Integration and UAT testing for the various Data Warehousing applications that were part of the Strategic Technology Group
- Performed end to end application configuration, BI/DW test automation, data governance and data flow validation for various DQMS conversion (data migration) projects.
- Performed data analysis for various data warehouse Fact and Dimension tables, ETL jobs, AAA views and cubes, Data Stage, Excel formulas such as #VLOOKUP, MIN, MAX and pivot tables.
- Led DQ conversion, Hyperion Reports and DB Snapshot development, deployment, and testing.
- Reviewed SQL and UNIX based test automation scripts, data stage ETL jobs and collaborated with team to resolve job/script problems.

Environment: MS Excel, Visio, QTP 9.x, Quality Center, Informatica PowerCenter, Citrix, MS SQL Server 2005, Oracle 10g, IBM DataStage, IBM WebSphere, Salesforce, Toad, Hyperion Designer, Putty, Autosys, CRM, SVN, ERwin

03/07 to 07/08: Cognizant (Merck & Co., Whitehouse Station, NJ)

Supervisor: Srin Venkata

BI Test Lead/ On-Site Coordinator

- Managed the business-critical projects and led the project initiatives for the ongoing development related to the Enterprise Data Warehouse applications.
- Successfully led daily and weekly status meetings with offshore team members (India and China) and supplied knowledge transfer and performance issue resolution as needed.
- Wrote and executed SQL queries to perform the ETL mappings data validation and performance tuning for the Oracle Data Mart and Cognos BI reports.

Environment: MS Project, Visio, QTP, Quality Center, RequisitePro, Business Objects 11.0, IBM Mainframe, IBM WebSphere, Autosys, JIRA, Documentum, TIBCO, Oracle 10g, Cognos 8, Informatica 8.0, Toad

04/05 to 03/07: CSC Covansys (Washington Mutual, Lake Forest CA)

Supervisor: Sandy Runyan

Senior QA Analyst

- Performed system requirement analysis, SIT and UAT testing for the Loan Origination System (Impact LBM LOS), the Broker Front Office (BFO) e-commerce application and their various interfaces
- Performed manual data validation and integration testing to check the application interfaces, such as Operational Data Source (ODS), Data Mart, Information Highway, Records Management
- Verified field to field mappings and transformation logic between the current system. (Fitech) and the future system (Impact LBM LOS)

Environment: Agile, Test Director 8.0, QTP 8.0, LoadRunner 8.0, Business Objects 11.0, MQ Series, Web Services, IBM WebSphere, IBM Mainframe, XML Spy, Oracle 9i, Informatica 7.0, Toad, Calyx, Encompass, Genesis, Contour

01/05 to 04/05: Veritas Funding, Scottsdale AZ

Supervisor: Amir Khan

QA Analyst

- Designed and performed procedures that evaluate the Point of Sale (CQDS) and Loan Origination (Unifi) capabilities for the system.
- Created various use cases and manual test scripts to evaluate overall functionality of the mortgage applications (POS and LOS) and their integration.
- Created use cases and test data (1003 applications) to perform SIT and UAT testing.
- Performed System and Integration testing to check the application interfaces and information exchange over the VPN network in MISMO format, using web services.

Environment: RUP, Rational Requisite Pro, Commerce Velocity (POS), Unifi (LOS), Pro Link Plus, XML, SOX, MISMO, SOAP, MS Project, MS Excel, Web Services

08/04 to 01/05: Wells Fargo, Phoenix AZ

Supervisor: Bill Wood

QA Engineer

- Performed data migration testing on various banking applications that generate client's credit report for the small business loans approvals with the help of third-party tool.
- Performed Manual testing in the alpha phase of production considering the base line of developed test plan and test cases.
- Conducted functional testing for various screens and snap shots in each module using QA Run and QA Director

Environment: RUP, UML, QA Run, Test Manager Rational Rose, Requisite Pro 2002, Clear Quest, Clear Case, Excel 2000, MS Project 2000, Visio 2000, ERwin, HTML

01/04 to 07/04: McKesson Health Solutions, Scottsdale AZ

Supervisor: Kumar Swami

QA Engineer

- Partnered with client to gather system requirements to formulate business specifications and translate those into application functionality.
- Performed System Integration, Acceptance and Regression testing using automated testing tool QTP.
- Reported bugs using Test Director, generated defect and reviewed with the management team.

Environment: UML, RUP, Erwin, Oracle 8i, 9i, TOAD, Informatica PowerCenter 6.1,

Cognos 6.0, XML Spy, HIPAA, QTP 6.5, LoadRunner 7.8, TestDirector 7.6

EDUCATION:

Daniels College of Business, University of Denver, Denver CO

MS in Information Technology (MSIT), 2003

Institute of Management Studies, DAVV (Indore India)

MBA in Advertising and Public Relations Management (MAPRM), 1998

CERTIFICATIONS:

Oracle and Java Certifications by Tata InfoTech (2001)

Data Warehouse Certification, Daniels College of Business (2003)
