PROFESSIONAL SUMMARY

Detail-oriented and curious **computer science graduate** with hands-on experience in full-stack web development, database systems, and cybersecurity. Adept at working in **collaborative team environments** and solving real-world problems holistically. Eager to contribute technical skills, a **business-oriented mindset**, and an **enthusiasm for learning** to an innovating team.

EDUCATION

University of Virginia | Bachelor of Arts, Computer Science (5/2025)

- Latin Minor | Cavalier Daily Photographer | Dean's List 2021-2022
- Relevant Courses: Software Development Essentials, Computer Systems, **Database Systems**, **Intro to Financial Accounting**, Intro to Cybersecurity, Commercial Law, Micro & Macroeconomics

Robinson Secondary School | IB Diploma, Advanced Diploma (2021)

CERTIFICATIONS

Amazon Web Services | Certified Cloud Practitioner (1/2025)

TECHNICAL SKILLS

Programming: Java, Python, C/C++, R, HTML

Database: PostgreSQL, SQLite, Schema & database design, Query optimization

Cybersecurity: Network/TCP/IP knowledge, SIEM approach, Wireshark, Kali Linux, Nmap

General: Software and System Development Life Cycle, Agile methodologies, Microsoft Excel, Git

PROJECT EXPERIENCE

PlotTwist – Full-Stack Web App (1/2025 – 4/2025)

- Partook in **semester-long group project** to design and implement a **PostgreSQL schema** which supported a **Goodreads-style app** for tracking and recommending books
- Developed backend using **Python (Django)** and frontend with **HTML, CSS, & JavaScript**; maintained version control with **Git**
- Integrated features for trending books, custom lists, and user-submitted reviews using RESTful principles; utilized Google Books API for books' data source
- Used **pgAdmin** for database GUI interaction and **SQL query testing**

Course Review App – Java Desktop Application (12/2024)

- Built a CRUD application with **JavaFX GUI** and **SQLite** to allow users to log in, search courses, and write reviews
- Collaborated in a team of 3 implementing features like persistent login and dynamic search queries
- Applied **Git workflows** for asynchronous and efficient development

Capture the Flag Challenges (12/2024)

- Solved a series of 15 CTF challenges across **networking, recon, cryptography, forensics, & reverse engineering**
- Used tools like **Nmap, Wireshark, HTML inspection**, and manual **x86-64 disassembly** to identify and exploit vulnerabilities
- Gained hands-on experience with Linux-based **penetration testing** and **web inspection tools**
