

Sindhu Reddy Maruthi

5575 NW 50th street, Apt B, Oklahoma, 73122 | +1(405)4099668 | sindhureddymaruthi@gmail.com

SUMMARY

Business Analyst with 2 years of experience in data-driven decision-making, specializing in marketing analytics, predictive modeling, and process optimization. Proficient in Python, SQL, SAS, Tableau, Power BI, and Excel for analyzing trends, developing insights, and supporting strategic initiatives. Led deep analysis of TMDB (The Movie Database) metadata. Build a content based recommender. Designed a predictive machine learning model in SAS Miner to optimize heart diseases and improve healthcare outcomes.

TECHNICAL SKILLS

- **Programming Languages:** Python (NumPy, Pandas, Jupyter Notebook), SQL, SAS Studio, C#, HTML, CSS, Angular
- **Predictive Modeling & Data Analysis:** Generative AI, Machine Learning, Supervised & Unsupervised Learning, Linear Regression, Classification Tree, Decision Tree, Random Forest, Time Series Forecasting
- **Tools & Technologies:** Power BI, Tableau, SAS Enterprise Miner, IBM SPSS, Zoho CRM, Microsoft Office 365
- **Business Analytics:** Data Visualization, ETL Pipelines, KPI Reporting, Business Intelligence, Customer Segmentation
- **Soft Skills:** Stakeholder Communication, Requirement Gathering, Business Process Optimization

CERTIFICATIONS

- Successfully completed “Advanced certification Course in Business Analytics” offered by EXcellenC-India
- <https://excellenc-e-learning.com/certificate/public/425be9fa-286b-449a-be86-614880da5a00>
- <https://excellenc-e-learning.com/certificate/public/22150d32-cb5b-4a0f-bff0-f230484d2d3f>
- SAS Certified Predictive Modeler Using SAS Enterpriser Miner 14 - https://www.credly.com/badges/db966596-0fad-4d91-95ab-19f62e050e09/linked_in?t=sxmiu5

WORK EXPERIENCE

Infinite computer solutions- Business Analyst

July 2021-2023

- Analyzed financial trends, budgeting forecasts, and operational inefficiencies to drive data-driven decision-making aligned with business goals.
- Designed intuitive dashboards in Power BI and Tableau, enhancing decision-making efficiency for non-technical stakeholders.
- Developed predictive models using Python and SQL to analyze customer behavior, increasing customer retention by 15%.
- Automated reporting systems in Excel and SQL, reducing manual effort by 30%, saving time for strategic analysis.
- Led process optimization initiatives, cutting down data processing time by 20% through enhanced ETL pipelines.
- Collaborated with senior leadership to translate business requirements into actionable insights, influencing key strategies.

ACADEMIC PROJECTS

- **"IoT Based Sewage Overflow Detection And Harmful Gas Monitoring System."** The proposed project contributes to keeping society clean as well as preventing abrupt work place accidents. The smart device can be put into operation anywhere in the world and aids in monitoring sewage water overflows. And also applied for patents for our work.
- **Marketing Analytics on Movie Recommendations.** Improved audience engagement. Improved content recommendations without user data. Overcome data challenges in entertainment analytics.
- **Predictive Model for Heart diseases.** Developed a predictive machine learning model in SAS Miner to identify key factors influencing heart diseases. Aimed to optimize heart disease outcomes by predicting and proposing interventions based on data insights.

EDUCATION

University of Central Oklahoma

Master's in Business Analytics (Expected Dec 2025)

Osmania University

Bachelor in Civil Engineering (June 2023)
