

Sindhu Sriramula (Data Analyst)

Indiana, USA | +1 260-239-2327 | iamsindhusr@gmail.com | [LinkedIn](#)

Summary

- Results-driven Data Analyst with **6+ years** of experience delivering impactful analytics, BI solutions, and predictive insights across **Healthcare, BFSI, and Technology** sectors.
- Proven expertise in **SQL (Azure Synapse, SQL Server), Python (Pandas, NumPy, scikit-learn), R, and PySpark**, enabling scalable data analysis, risk modelling, and machine learning workflows.
- Specialized in **clinical, claims, pharmacy, financial, and behavioral data analytics**, contributing to initiatives in value-based care, fraud detection, population health, and capital risk optimization.
- Designed and optimized **enterprise-grade ETL pipelines** using **Azure Data Factory, Databricks, SSIS**, and automated workflows that reduced data refresh cycles from hours to near real-time.
- Built 40+ dynamic, self-service dashboards using **Power BI, Tableau, Qlik Sense, and Looker Studio**, driving 40% increase in executive engagement and stakeholder decision-making.
- Strong background in **cloud data architecture and migrations** (Azure, Epic Systems), **CI/CD (Git, Jenkins)**, and **Agile delivery** using JIRA and Confluence, ensuring high system reliability and faster releases.
- Applied **advanced analytics techniques** such as **predictive modelling, regression, time series forecasting, risk stratification**, and **anomaly detection** for both clinical and financial use cases.
- Embedded **data governance, quality frameworks, and compliance standards (HIPAA, HITRUST, RBI, Basel III)** across data ecosystems, improving audit readiness and regulatory reporting accuracy.
- Recognized for enabling **\$2M plus in cost savings**, boosting **report automation by 60%**, and supporting **ML-based forecasting** with 87% accuracy—empowering business strategies across domains.
- Skilled in stakeholder enablement through **training workshops, dashboard storytelling, and data democratization**, promoting data literacy and self-service analytics adoption.

Technical Skills

Methodologies: Agile, Scrum, SDLC, Waterfall

Programming Language: Python, R, SQL, C, C++, T-SQL

Databases & Data Warehousing: MySQL, PostgreSQL, SQL Server, Oracle, Teradata, MonetDB, MongoDB, AzureSynapse, Redshift, SSIS, DTS

Data Visualization and Reporting: Tableau (Desktop, Server, Reader), Power BI, SSRS, Advanced Excel, SAS Visual Analytics, QuickSight, PowerPoint

Data Analysis & Statistical Packages: Numpy, Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow, gplot2, dplyr, tidyr, plotly

ETL & Data Integration: SSIS, Talend, Apache Airflow, Azure Data Factory

Cloud Platforms: AWS (S3, Redshift, Lambda, QuickSight), Microsoft Azure

Machine Learning & Modeling: Predictive Modeling, Regression, Classification, Clustering, A/B Testing, Forecasting, Hypothesis Testing, Linear Algebra, Time Series Analysis

DevOps & Collaboration Tools: GitHub, SVN, Bitbucket, Jira, Confluence, IntelliJ, VS Code, Jupyter Notebook

Business Intelligence & Analytics: KPI Development, Business Models, Root Cause Analysis, Data Mining, OLAP/OLTP, Advanced Analytics, Strategic Reporting

Monitoring & Operations: POWER BI Service, Tableau Server, Stakeholder Reporting

Data Management: Data Wrangling, Data Cleaning, Data Transformation, Data Architecture, Data Warehousing, Database Design

Work Experience

Data Analyst | UnitedHealth Group

June 2024 – Present

- **Led a cross-functional team of 3 analysts** within Agile sprints using JIRA, GitHub, and Confluence; conducted peer reviews and streamlined delivery timelines—boosting reporting efficiency by 20%.
- **Processed and analysed 10M+ rows** of healthcare and claims data across medical, pharmacy, and behavioral domains using **SQL (Azure Synapse, SQL Server), Python (Pandas, NumPy)**, and **Databricks**, also driving \$2M+ in cost-saving opportunities and compliance initiatives.
- **Built scalable, production-grade ETL pipelines** using **Azure Data Factory, Databricks, and PySpark**, reducing data refresh times from 6 hours to less than 1 hour, enabling **real-time clinical and operational analytics**.
- **Developed 15+ dynamic dashboards** in **Power BI, Tableau, and DAX**, supporting stakeholders in **Clinical, Pharmacy, Quality, and Finance**, improving report engagement by 40%.
- **Designed healthcare data models** in **Azure Synapse, Snowflake and SQL Server** aligned with **HIPAA and HITRUST** standards, in collaboration with compliance teams—improving audit readiness by 30% and enabling **health informatics use cases**.

- Delivered **ML-based predictive models** using **scikit-learn** and **stats models** (regression, time series), achieving **87% accuracy** in forecasting **claim volumes**, aiding workforce and capacity planning.
- **Led pharmacy data analytics efforts**, defining KPIs and clinical measures using **SQL, Excel, and Power BI**, enabling the successful rollout of **3 pharmacy improvement initiatives** focused on adherence, MTM, and utilization.
- **Facilitated training sessions** and **BI adoption workshops** using **Jupyter Notebooks, PowerPoint, and Google Slides**, promoting self-service analytics and empowering 50+ clinical and operational stakeholders.

Data Analyst | Wipro

Nov 2019 – Dec 2022

- Developed and maintained **30+ enterprise-grade ETL pipelines** using SQL, SSIS, and Azure Data Factory, increasing data refresh speed by **40%** and ensuring timely availability for downstream analytics.
- Built **interactive dashboards** using Tableau, Power BI, and Qlik Sense, enabling real-time monitoring of **more than 20 plus KPIs** and driving **20% faster decision-making** for IT and business stakeholders.
- Led end-to-end cloud migration of **Epic Systems (around 2TB)** to AWS redshift, including infrastructure setup, performance tuning, and post-deployment validation. Also, achieving **100% uptime post-migration**.
- Investigated and resolved system performance issues by analysing log data with Python and SQL, contributing to a **15% reduction in P1/P2 incidents** and improving system stability.
- Designed and implemented **data validation frameworks** using Pytest, Pandas, and SQL, ensuring **99 % data accuracy** across multi-source integrations and regulatory reporting.
- Analysed over **10,000 helpdesk tickets annually** using ServiceNow, Excel, and Power BI to identify trends, optimize resource allocation, and boost **SLA compliance by 18%**.
- Applied statistical analysis and time-series modelling using Python and AWS services (CloudWatch, Lambda) for capacity planning and anomaly detection, enhancing infrastructure reliability across distributed cloud environments.
- Designed and implemented statistical models and **time-series forecasting** algorithms using Python and R, enabling early anomaly detection and proactive infrastructure capacity planning resulting in a **30%** reduction in system downtime and improved resource utilization by **25%**.
- Improved data governance by implementing Collibra and Alation, achieving a 30% reduction in compliance risks and ensuring adherence to global data privacy regulations.

Data Analyst | Accenture

July 2017 – Oct 2019

- **Developed and maintained 20+ BI dashboards** in Tableau, Power BI, and Looker Studio to monitor key financial metrics such as cash flow, NPA trends, claims ratios, reconciliation status, and capital adequacy, improving data-driven decisions and executive reporting.
- **Automated AML and fraud detection workflows** leveraging SQL and Python to identify suspicious patterns, reducing false positives by 18% and improving alert resolution time by 25%.
- Built **financial forecasting and risk models in GCP AI platform** using time series techniques in Python (Pandas, NumPy) and Excel, mitigating potential revenue leakages and optimizing capital deployment across business units.
- **Enhanced credit analysis processes** by profiling loan portfolios and credit risk indicators, contributing to more accurate credit scoring and better loan disbursement decisions.
- **Streamlined monthly financial and regulatory reporting** with automated scripts (Python, VBA, SQL), reducing turnaround time by 60% and ensuring full compliance with audit and RBI reporting standards.
- **Improved data governance and data quality** by identifying inconsistencies through profiling tools like Trifacta, Power Query, and SQL, enhancing reporting accuracy by 25% and supporting Basel II/III initiatives.
- Collaborated with **business stakeholders and compliance teams** to deliver 50+ ad-hoc analyses for fraud detection, policy evaluation, and risk mitigation strategies.
- **Delivered audit-ready datasets** and maintained 100% compliance in financial and risk reporting, with zero discrepancies during internal and external audits.

Education

- **Masters in Information Technology** – Indiana Institute of Technology, Fort Wayne, Indiana
- **Bachelors in Computer Science** – Jawaharlal Nehru Technological University, Hyderabad
