PROFESSIONAL SUMMARY

Dynamic and organized Business Data Analyst with 2+ years of experience in generating data-driven insights and optimizing organizational processes. Proficient in database creation, trend forecasting, and capability-driven data visualization. Successfully led projects that boosted revenue growth and customer satisfaction by 25%, achieving 95% error-detection accuracy across all data sources.

SKILLS

- Database: MySQL, PostgreSQL, NoSQL, MongoDB, Oracle SQL Developer, Microsoft SQL Server, ETL Processes, Big Query
- Data Analysis Tools: SQL, R, Python(Pandas, NumPy, Matplotlib), SAS, SPSS, MATLAB, Java (Basic), Alteryx
- Data Visualization & Reporting: Tableau, Power BI, SSRS, SAS Business Intelligence, Microsoft Visual Studio, QlikView, Cognos, Dashboard Creation
- MS Office: Excel (Advanced, Macros, PivotTables), Microsoft Outlook, PowerPoint, Visio, office 365 suite, Google Analytics
- Cloud Computing: AWS, GCP, DevOps, Microsoft Azure (Data bricks, Azure Data)
- ETL Tools: Informatica PC 9.6&10.2, DataStage
- Big Data Technologies: Apache Hadoop, Apache Spark, AWS Redshift, Google BigQuery, Map Reduce, Spark
- Automation: UNIX Shell Scripting, CRON
- Other Tools: JIRA, Confluence and GitHub

EDUCATION

- Master of Science (M.S.) - Business Analytics January 2024
University of Colorado, Denver, Colorado, USA
- Bachelor of Engineering - Computer Science January 2022
Malla Reddy Engineering College for Women, India

EXPERIENCE

- Business/ Data Analyst August 2023 - Current
Fisher investments | Plano, TX
- Utilized Tableau to create data visualizations that enhanced business performance insights, contributing to a 20% increase in annual sales
 - Initiated and developed an automated sales forecasting model with 89% accuracy, resulting in a weekly savings of 6 hours of manual work
 - Led cross-functional teams to correct data and system processes, successfully reducing data outliers by 30%

- Designed a client segmentation model that increased personalized marketing efforts by 45%
- Implemented advanced statistical analysis to streamline operations, reducing costs by \$500K annually
- Developed and optimized SQL queries to achieve faster data retrieval, improving productivity by 20%
- Employed Python to clean and analyze large datasets, reducing inaccuracies by 25%
- Created interactive dashboards using Power BI, which provided quicker access to key metrics and improved efficiency by 10%
- Handled complex data transformations and migrations using ETL, leading to improved data quality and a 15% increase in operational efficiency.

Business Systems Analyst

November 2021 - July 2022

Maxsys Technology | India

- Developed and implemented a system solution that reduced order processing time by 25% and increased customer satisfaction by 15%
- Collaborated with cross-functional teams to design a new inventory management system, achieving a 20% reduction in inventory holding costs and a 10% improvement in order accuracy
- Developed and documented system test plans, leading to a 30% reduction in software defects and a 20% increase in system reliability
- Identified and resolved performance issues, resulting in a 20% improvement in system response time and a 15% boost in user satisfaction
- Liaised with stakeholders to gather business requirements, leading to the successful creation of a reporting dashboard that improved data visibility and decision-making by 25%
- Developed and documented system security plans, ensuring compliance with industry regulations and safeguarding sensitive data from unauthorized access.

PROJECTS

Reducing National Traffic and Road Accidents

Led a project with the DOT to reduce vehicle fatalities and emissions by proposing an Autonomous Vehicle Network and Hyperloop technology, using AI/ML analysis for optimization and addressing scalability, security, and legal challenges. Successfully presented findings, receiving positive feedback and contributing to new communication standards.

Super Store USA Data

Developed a real-time analytics tool using Tableau to enable swift decision-making for retail companies. Analyzed customer behavior patterns and inventory data from the "Super Store USA Data" project, leading to personalized marketing strategies, cost reduction, and improved operational efficiency. Successfully implemented actionable insights, enhancing customer engagement and loyalty.
