

Sindhura Rama

DATA ANALYST

Texas, USA | (551) 220-3408 | sindhura4344@gmail.com | [LinkedIn](#)

SUMMARY

- Data Analyst with 4 years of experience in healthcare and technology sectors, specializing in Medicare data analysis and financial insights.
- Proficient in Python, SQL, R, and SAS for data manipulation, statistical analysis, and predictive modeling, with expertise in libraries such as pandas, NumPy, and scikit-learn.
- Experienced in creating interactive dashboards and reports using Tableau, Power BI, and QlikView, enhancing data visualization and stakeholder engagement. Demonstrated ability to develop KPIs, and conduct exploratory data analysis to drive business growth.
- Skilled in big data technologies, including Hadoop and Apache Airflow, with experience processing and analyzing large-scale datasets.
- Strong background in ETL processes, data cleaning, and preprocessing, reducing data inconsistencies and optimizing query performance. Proficient in cloud-based analytics, leveraging AWS services like SageMaker for deploying and scaling machine learning models.

SKILLS

Methodologies:	SDLC, Agile, Waterfall, Kanban, Lean Six Sigma
Languages:	Python, SQL, R, SAS
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook
Packages:	NumPy, Pandas, Matplotlib, SciPy, ggplot2, TensorFlow, Seaborn, Scikit-learn
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
Health IT	EHR/EMR Systems (Epic), HL7, HIPAA, HL7, ICD-10, CPT, Healthcare Analytics
Database:	MySQL, SQL Server, PostgreSQL, Oracle
Other Skills:	Amazon Web Services(AWS), Informatica Power Center, Machine Learning Algorithms, Deep Learning, NLP, Big Data Technologies, Spark, Probability distributions, Predictive Modelling, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, SSIS, SSRS, SSMS, Data Mining, Data warehousing, Data transformation, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Jira, Confluence, GitHub, Bitbucket
Operating System:	Windows, Linux, Mac OS

EXPERIENCE

Data Analyst | UnitedHealth Group, TX

Aug 2023 – Present

- Led a cross-functional data-driven project to optimize Medicare Advantage plan offerings across 50 states, analyzing 5 years of historical data and current market trends, resulting in a 12% increase in quality sales growth.
- Engineered a robust Python-based ETL pipeline using Apache Airflow for orchestration, processing 1.5TB of daily Medicare claims data from multiple sources including EHRs and billing systems.
- Utilized pandas and NumPy to clean and preprocess 1.5 million Medicare customer records, reducing data inconsistencies by 30%.
- Developed a predictive churn model using Random Forest in Python, achieving accuracy in identifying at-risk Medicare Advantage customers.
- Designed and maintained a Hadoop-based data lake using HDFS and Hive, storing and organizing 5 years of historical Medicare data totaling 50TB. This centralized repository improved data accessibility for 200+ analysts across the organization.
- Developed predictive models using SAS to forecast customer enrollment patterns, improving accuracy by 15%.
- Leveraged AWS SageMaker to deploy and manage machine learning models, scaling to handle 100,000 real-time predictions daily.
- Created a suite of interactive Tableau dashboards to visualize Medicare product performance across 20 key metrics, including enrollment rates, customer satisfaction scores, and financial performance.
- Conducted exploratory data analysis (EDA) to identify key factors influencing competitive positioning in the Medicare market.
- Developed and implemented 15 key performance indicators (KPIs) for Medicare Advantage plans using a combination of SQL for data extraction and Python for complex calculations.

Data Analyst | HCL Tech, India

Jun 2019 – Jul 2022

- Extracted actionable insights from complex financial datasets using advanced statistical analysis techniques, supporting data-driven strategic decision-making processes.
- Automated data cleansing and transformation processes using advanced Excel functions, VBA macros, and Power Query, reducing manual data preparation time. Designed and executed robust ETL workflows using Informatica, ensuring data integrity and consistency.
- Optimized database performance by implementing efficient indexing strategies and query optimization techniques in SQL, resulting in a 40% reduction in average query response time.
- Developed and deployed machine learning models for risk assessment and fraud detection using Scikit-Learn and TensorFlow, improving accuracy by 25% over traditional methods.
- Conducted comprehensive Exploratory Data Analysis (EDA) using Python libraries including Pandas, NumPy, and Matplotlib in Jupyter Notebooks, uncovering key trends and patterns in large datasets.
- Created interactive, data-driven dashboards and reports using Power BI and QlikView, increasing stakeholder engagement and facilitating faster decision-making processes.

EDUCATION

Master of Science in Data Science - University of Texas at Arlington, USA

Bachelor of Technology in Computer Science and Engineering - Vignan Foundation for Science, Technology & Research, India
