

NAGA SINDHURA GURIJALA

Business/Data Analyst

Location: New Haven, CT 06511 | Email: sindhuragurijala16@gmail.com | Phone: +1 475 298 6389

SUMMARY

Results-driven Data Analyst with experience in financial services, IT consulting, and data analytics, specializing in data governance, risk modeling, and business intelligence. Proven ability to optimize financial data pipelines, automate ETL workflows, and implement advanced analytics for fraud detection, portfolio risk assessment, and compliance reporting (SOX, Basel III, GDPR, PCI-DSS). Skilled in Python, SQL, AWS Glue, Power BI, Tableau, and data modeling, leveraging A/B testing, predictive analytics, and KPI dashboards to enhance decision-making and increase operational efficiency by 30%. Adept at collaborating with cross-functional teams to define project scopes, streamline IT risk assessment, and deliver actionable insights through real-time analytics and business intelligence solutions. Passionate about driving data-driven strategies that enhance financial performance, regulatory compliance, and digital transformation initiatives.

TECHNICAL SKILLS

Methodology:	SDLC, Agile, Waterfall
Language:	Java, Python, Shell Scripting, R
Analysis:	Cost/benefit analysis, GAP analysis, Risk Analysis, SWOT analysis, RTM, Impact Analysis
Documentation:	FRD, BRD, SRS, Use Case Document, User Stories, UML, RTM
Libraries:	NumPy, Pandas, SciPy, Matplotlib, Seaborn, ggplot2, Plotly
IDE's:	Spyder, Jupyter Notebook, PyCharm, VS Code, Sublime Text
Visualization Tools:	Tableau, Power BI, MS Excel (Pivot Tables, VLOOKUP, Macros), MS Project, SharePoint, PowerPoint
Databases:	SQL Server, MySQL, MS Access, Oracle, NoSQL (MongoDB)
Cloud Technologies:	AWS (Amazon Redshift,), Azure, GCP
Other Skills:	Data Integrity, Data Warehouse, Data Marts, Data Pipelines, Data Visualization, Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem Solving
Version Control / Other Tools:	Jira, Google Analytics for data analysis, Dataiku, SPSS, WEKA, Alteryx, Git, MS Office, AWS, Azure, WebLogic, Databricks, ETL (SSIS, SSAS, Informatica), OLAP, OLTP, SAP ERP, CRM, Snowflake SaaS
Operating Systems:	Windows, Linux

EDUCATION

Master of Science in Business Analytics | University of New Haven, West Haven, CT, USA

B.Com in Computers | University College for Women's Koti, Hyderabad, Telangana, India

EXPERIENCE

Data Analyst | JPMorgan Chase & Co., USA

Oct 2024 – Present

- Implemented advanced financial data governance strategies, including data lineage, metadata management, and data quality monitoring, reducing financial reporting errors by 20% and improving data accuracy by 15% for regulatory compliance (SOX, Basel III, GDPR, PCI-DSS).
- Orchestrated and automated ETL workflows for financial transactions, risk modeling, and fraud detection using AWS Glue, SQL, and Python, ensuring seamless data integration across banking, investment, and credit risk platforms.
- Followed Agile & SDLC methodologies for implementing financial data systems, investment analytics, and credit risk models, ensuring accurate risk assessments, portfolio optimizations, and compliance reporting.
- Conducted A/B testing on banking platforms, loan processing, and credit card promotions, increasing customer engagement, conversion rates, and financial product adoption by 25%.
- Designed and developed financial dashboards, KPI reports, and risk exposure analysis using Tableau, Power BI, and SQL, providing real-time insights for asset management, revenue forecasting, and credit scoring models to support data-driven decision-making.

Business/Data Analyst | Tech Mahindra, India

Mar 2022 – May 2023

- Implemented enterprise data governance strategies, including data lineage, metadata management, and data quality monitoring, reducing data inconsistencies by 20% and improving data accuracy by 15% across IT services and consulting projects.
- Leveraged cutting-edge automation tools to enhance IT risk assessment, infrastructure monitoring, and service delivery, achieving a 30% increase in operational efficiency across cloud and on-premise environments.
- Modified datasets using DAX queries, Merge statements, Row-level security (RLS), and data modeling within Power BI, optimizing real-time analytics, interactive dashboards, and performance monitoring for IT consulting clients.
- Led requirement-gathering sessions using brainstorming, document analysis, focus groups, interface analysis, JAD sessions, prototyping, and reverse engineering, ensuring seamless alignment between business needs and IT solutions.
- Partnered with cross-functional teams to define IT consulting project scopes, data analytics frameworks, and visualization strategies, delivering impactful insights through Tableau and Power BI to drive business transformation.

Business Data Analyst | TatvaSoft, India

Feb 2020 – Mar 2022

- Identify data quality issues and implement data cleaning and validation processes, reducing errors by 15%.
- Configured CI/CD pipelines in Azure DevOps for automated build, test, and deployment of applications.
- Designed Developed, Coded, Tested, and maintained objects such as Packages, Procedures, Functions, Triggers, Views, Sequences, PL/SQL Collections, etc.
- Involved in requirements gathering, Analysis, Design, Development, testing production of an application using the Waterfall model.
- Worked on several python packages like NumPy, SciPy, Pandas and Matplotlib.
- Develop and maintain automated dashboards and reports using Tableau, resulting in a 20% reduction in reporting time.
- Collaborate with cross-functional teams to identify key performance indicators and create custom reports that support business objectives and created hundreds of test cases using JIRA for larger projects.
- Supported senior analysts in data collection, cleansing, and visualization using Excel and SQL.
