

Sindhuja N

Data Analyst | **Location:** VA | **Mobile:** 701-205-1327 | **Email:** nsindhuja55@gmail.com

SUMMARY:

Detail-oriented **Data Analyst** with 4 years of experience turning raw data into clear, actionable insights that inform business strategy and improve data infrastructure. Proven ability to build scalable ETL pipelines, resolve data privacy and quality issues, and simplify complex workflows through thoughtful automation and documentation. Adept in SQL, Python, Tableau, and Power BI, with hands-on experience across cloud environments (AWS & GCP). Experienced in managing legacy datasets, documenting pipelines, and collaborating across engineering, compliance, and product teams. Passionate about making data cleaner and easier to use.

SKILLS:

Languages & Tools: Python, R, SQL, GitHub
Data Platforms: AWS (S3, Athena, Glue, Redshift), GCP (Big Query)
Visualization Tools: Tableau, Power BI, Microsoft Excel, Google Data Studio
Database: MySQL, SQL Server
Cloud Platforms: AWS, GCP
Libraries: Pandas, NumPy, Matplotlib, SciPy, ggplot2
Core Competencies: ETL Pipelines, Data Quality & Privacy, Table Deprecation, Metadata Documentation, Dashboarding, Agile Methodology, Cross-functional Collaboration

EDUCATION:

Master of Science, Data Analytics and Engineering George Mason University, Fairfax, VA	Jan 2022 – Dec 2023
Bachelor of Technology, Computer Science and Engineering GITAM University, Hyderabad, India	June 2017 – May 2021

EXPERIENCE:

Capital One, VA | Jan 2025 -Present | Data Analyst

- Designed and optimized **end-to-end ETL pipelines** that ingest and structure data from multiple risk systems, enabling timely reporting and compliance checks.
- Led initiative to **audit and deprecate legacy tables** with zero usage, reducing clutter in data warehouse and saving storage costs by 25%.
- Partnered with the privacy and legal teams to **resolve sensitive data issues** by adding automated checks and flagging PII across multiple tables.
- Built a **centralized documentation hub** using Confluence, mapping pipelines, data definitions, and ownership to streamline handoffs and reduce dependency on tribal knowledge.
- Supported **on-call operations** to troubleshoot data failures, rerun missed jobs, and ensure risk event data was delivered consistently to executive dashboards.
- Developed **interactive Tableau dashboards** to visualize trends in operational risk, policy breaches, and root cause breakdowns, improving decision-making across risk teams.

George Mason University, VA | May 2023 -Dec 2024 | Data Analyst

- Led Agile working sessions with academic and IT departments to align on priorities for **data modeling, transformation, and visualization** tasks.
- Developed and maintained **SQL** pipelines to combine data from learning systems, Google Analytics, and surveys into clean, structured datasets.
- Built over 30 dynamic dashboards using **Tableau** and **Google Data Studio** to analyze student engagement, retention, and course effectiveness.
- Automated data cleaning workflows using **Python (Pandas, NumPy)**, cutting manual reporting time by 60%.
- Acted as a data steward by enforcing **data governance** practices and proactively resolving inconsistencies across cross-functional datasets.
- Utilize **Microsoft Excel** for complex data analysis, employing advanced functions, pivot tables, and macros to streamline processes and enhance data presentation.
- Designed 30+ dashboards and **KPI** metrics companywide for C-level executives, project manager, and product owner, CSM teams to view the user retention ratio and behavior patterns (**Google Analytics, Google Data Studio, and Tableau**).
- Developing and maintaining complex **SQL** queries to extract, transform, and load data from multiple sources into **MySQL** databases, ensuring a streamlined and organized data repository.

Neon IT Systems, India | Jan 2020 - Dec 2021| Data Analyst

- Collaborated with engineering and BI teams to support high-volume **ETL** workflows using **AWS** tools (**S3, Athena, Redshift**) for client analytics.
- Conducted exploratory analysis and predictive modeling in **R** to inform customer segmentation and marketing targeting strategies.
- Built and maintained internal **Tableau** dashboards to monitor campaign performance, user funnel drop-off, and acquisition **KPIs**.
- Contributed to the cleanup and standardization of over 200 data fields across disparate systems, ensuring smoother reporting and migration readiness.
- Maintained **GitHub** repositories and documented every change to enhance collaboration and reproducibility.
- Utilized **NumPy** and **Pandas** for advanced data manipulation, ensuring accuracy and high-quality datasets.
- Executed and optimized SQL queries to support analytics and reporting processes.
- Conducted statistical analyses and built predictive models using **R** programming to uncover actionable insights.
- Leveraged **AWS** tools like **Amazon S3, AWS Athena, and Redshift** for efficient data storage, processing, and analytics workflows.
- Designed and developed advanced **dashboards** and **visualizations**, enhancing executive **decision-making** through improved business insights.
- Applied problem-solving techniques to identify and resolve data inconsistencies, improving reliability and accuracy.
- Used **GitHub** for version control and team collaboration, ensuring seamless management of script changes.
- Created and maintained detailed documentation for data rules, workflows, and project updates to support clarity and consistency.
