

SIRI DORNALA

Data Analyst

MD, USA | 551-310-1157 | dornalasirireddy@gmail.com | [LinkedIn](#)

SUMMARY

- Data Analyst with **3+ years** of experience in healthcare and finance domains, specializing in **data visualization, statistical analysis**, and business intelligence solutions to drive data-driven decision-making.
- Proficient in **SQL (MySQL, PostgreSQL, Oracle)**, **Python**, and with expertise in **ETL processes**, data warehousing (**Redshift, Snowflake**), and big data technologies for efficient data processing.
- Skilled in **data integration and transformation** using **SSIS, Informatica, and Talend**, ensuring seamless data migration and pipeline automation across diverse data sources
- Experienced in developing interactive dashboards and reports using **Tableau, Power BI, and Looker**, ensuring clear and actionable insights for stakeholders.
- Strong domain knowledge of **healthcare analytics, financial data analysis, risk modeling, and compliance**, with a keen ability to leverage **machine learning models, predictive analytics, and A/B testing** for business impact.

TECHNICAL SKILLS

Data Management and Databases:	MySQL, PostgreSQL, MySQL, MongoDB, SQL Server
Programming Languages:	Python (Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, Seaborn), R, Java, C++
Data Visualization tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
Gen AI & Applied AI:	Open AI APIs (ChatGPT, DALL-E), LLM-based Data Summarization, Generative AI
Statistical Analysis and Machine Learning:	Machine Learning Algorithms, ETL Tools, Statistics, ServiceNow, SSIS, Snowflake, Hypothesis Testing, Advance Analytics, Data Mining, Data Visualization, Data Warehousing, Data transformation, Data Storytelling, Business Analysis, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning.
Cloud Platforms:	AWS (EC2, S3, Redshift, Athena, Glue, DynamoDB), Azure, Snowflake
Version Control:	Git/GitHub

WORK EXPERIENCE

MedStar Health, MD Data Analyst	Jan 2024-Present
• Supported the Medical Specialty Integration initiative by integrating dental and vision claims data with medical benefits, leveraging SQL, Python (Pandas, NumPy), and Snowflake to build unified datasets for member experience enhancement and cross-sell analysis. • Applied machine learning models using Scikit-learn and XGBoost to predict member churn, segment member engagement levels, and identify high-impact cohorts for targeted marketing, resulting in a 12% increase in retention for dental coverage. • Conducted predictive and prescriptive analytics to identify patterns in claims utilization, patient demographics, and benefit usage; presented actionable insights in Tableau dashboards and Power BI reports for Specialty LOB teams. • Developed automated monthly employer reports and regulatory reports by building robust ETL pipelines in PySpark and collaborating with the data engineering team for seamless ingestion of structured and unstructured claims data • Analyzed appeals, grievances, and disputes data to identify process bottlenecks and recommended optimizations that improved response timelines by 18%, aligning with compliance and quality standards. • Defined KPIs and built interactive dashboards to monitor campaign performance, product growth, and member engagement; enabled data-driven decisions that directly influenced vision benefit enrollment growth by 9%.	

- Developed and maintained a Collateralized Loan Obligation (CLO) portfolio performance dashboard using Power BI, Python (Pandas, NumPy), and SQL, streamlining asset manager trend analysis and investor risk profiling with a 30% improvement in reporting speed.
- Extracted, cleaned, and analyzed large-scale financial datasets related to syndicated loans, CLO tranches, and market comparable using SQL and Excel VBA; supported the creation of underwriting memos, term sheets, and rating agency materials.
- Conducted cash flow modeling and scenario analysis for structured credit facilities using Python and Excel, supporting deal structuring and capital market execution activities for asset management clients.
- Created and updated investor-facing materials including pitch books, tear sheets, and marketing decks in PowerPoint and Tableau by integrating asset-level insights and investor feedback to enhance buy-side interest.
- Collaborated with teams from Credit Risk, Legal, and Compliance to review financial covenants, regulatory disclosures, and structured finance documentation, ensuring alignment with internal controls and FINRA guidelines.
- Designed and implemented a centralized data pipeline using SQL Server and ETL automation tools (Alteryx), standardizing structured finance reporting processes and improving data accuracy by 25%.

EDUCATION

Master of Science in Computer and Information Sciences State University of New York, Utica, New York CGPA: 3.33	Jan 2023 – May 2024
Bachelor of Technology in Computer Science Engineering Keshav Memorial Institute of Technology, Hyderabad, Telangana, India CGPA: 3.2	July 2018 – Aug 2022

CERTIFICATIONS

- AWS Certified Data Analytics.
- Generative AI Certified from Google.
