SUMMARY

- Strong background in transforming raw data into actionable business insights across healthcare, retail, and enterprise environments
- Proficient in creating end-to-end data solutions, including data extraction, transformation, and visualization
- Skilled in Python, SQL, Power BI, Tableau, and advanced Excel for statistical analysis and reporting
- Experienced in building scalable ETL workflows using tools like Talend, Apache Airflow, and dbt
- Adept at designing and managing cloud-based data architectures using AWS services (Redshift, S3, Lambda, DynamoDB)
- Applied machine learning techniques such as Random Forest, Decision Trees, and KNN for predictive modelling and fraud detection
- Capable of delivering stakeholder-ready dashboards and reports, enabling informed, data-driven decision-making
- Comfortable working in Agile (Scrum) environments, collaborating with cross-functional teams to meet project goals
- Knowledgeable in handling sensitive data in compliance with HIPAA and other regulatory standards
- Passionate about using data to drive operational efficiency, customer insights, and strategic business value

SKILLS

Programming Languages	Python, SQL
Databases & Data Warehouses	PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
Data Visualization	Power BI, Tableau, Advanced Excel
Libraries & Frameworks	NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI
Data Engineering	Alteryx, Talend, Informatica, Apache Airflow, dbt
Cloud Platforms	AWS (Redshift, DynamoDB, S3, Athena, Lambda)
Methodologies	SDLC, Agile (Scrum), Waterfall
Version Control	Git, GitHub
ML Techniques	Regression, KNN, Decision Tree, Naive Bayes, Random Forest
Healthcare Tools & Technologies	HIPAA, EMR, HER
Analytical Skills	Data Mining, Data Cleansing, Statistical Analysis, Data Visualization, Text Mining, ETL, Data Wrangling, Data Warehousing, Time Series Analysis, A/B Testing, SAP, SAS

WORK EXPERIENCE

CVS Health

January 2024 – Present

Data Analyst

- Designed and implemented interactive dashboards using Power BI to visualize healthcare data, reducing report generation time by 35% and improving stakeholder decision-making efficiency.
- Built robust ETL workflows using Talend to process and transform complex datasets from Snowflake and SQL Server, improving data readiness and consistency across teams.
- Conducted in-depth statistical analysis to uncover key patterns in patient datasets, driving customer segmentation strategies that improved service personalization and boosted engagement by 18%.
- Automated data cleaning and wrangling using Python (Pandas, NumPy), minimizing manual effort and enhancing data accuracy in recurring analysis workflows.
- Implemented Decision Trees and Random Forest in the Healthcare Fraud Detection System, leading to a 20% reduction in false positives and quicker case resolutions.
- Developed real-time data pipelines on AWS (Lambda, DynamoDB) to detect fraudulent transactions faster and improve incident response times.
- Performed time series and anomaly detection using Python and R to flag irregular patterns in healthcare transactions, contributing to proactive fraud monitoring.
- Collaborated with cross-functional teams using Agile (Scrum) methodologies to meet analytics sprint goals, improving cross-departmental delivery cadence by 15%.
- Created executive-level Power BI visualizations on fraud insights, enabling faster strategic interventions and helping reduce financial loss exposure.

VMware

January 2021 – December 2022

Data Analyst

- Optimized ETL workflows using Apache Airflow and dbt, streamlining data transformation and reducing processing time by 30% without compromising reliability.
- Architected scalable data warehouse solutions in Snowflake, integrating diverse data sources and enhancing query performance by 40%.
- Delivered actionable insights through Tableau dashboards, driving a 20% increase in stakeholder adoption of self-service analytics tools.
- Executed A/B tests and in-depth data analysis to evaluate feature performance, influencing key product decisions that elevated user engagement.
- Visualized complex datasets using Matplotlib and Seaborn, improving communication of insights to non-technical teams.
- Implemented machine learning models like Random Forest and KNN to forecast operational needs, reducing forecast errors by 15%.
- Standardized data validation protocols via SQL and Python, ensuring accuracy and consistency across projects.
- Collaborated with cross-functional teams to gather requirements and deliver tailored analytical solutions that supported strategic business goals.

Trigent Software

July 2020 – December 2020

Data Analyst Intern

- Analyzed product return records using SQL Server and Python (Pandas, NumPy) to identify trends and patterns, leading to a 12% improvement in inventory planning accuracy.
- Created interactive dashboards in Power BI to visualize return rates by product category, supplier, region, and delivery method.
- Cleaned and transformed transactional data through ETL pipelines using Talend, improving data quality across sources by 25%.
- Developed decision tree models to classify return reasons and predict potential returns based on customer and product attributes.
- Participated in Agile sprints, collaborating with cross-functional teams to present insights and support improvements in return management strategies.

PROJECTS

Customer Sentiment Analysis Platform

- Developed a Python-based NLP model to analyze customer feedback, leveraging text mining techniques and NLTK for sentiment classification.
- Integrated the solution with Tableau for visualizing sentiment trends, enabling proactive customer engagement strategies.

Healthcare Compliance Analytics System

- Ensured HIPAA compliance by designing a secure data analytics framework for processing sensitive patient information and generating actionable insights.
- Utilized SAS for advanced statistical analysis and SAP tools to integrate patient data from multiple healthcare management systems, ensuring seamless reporting and data integrity.

EDUCATION

Master in Computer Science

January 2023 – May 2024

University of Illinois Springfield | Springfield, IL

Bachelor in Information Technology

August 2018 – May 2022

JB Institute of Engineering and Technology | Hyderabad, India
