

Balthi Siri | QA Engineer

Lubbock, Texas | +1 (405) 856 3351 | siri@jobitmail.com

SUMMARY

Results-oriented QA Engineer with over 4 years of experience in automated and manual testing within the insurance and IoT sectors. Successfully spearheaded testing initiatives that led to a 35% increase in defect detection and reduced release cycles by 40%. Proven expertise in leveraging tools like Selenium, JUnit, and Postman to ensure software reliability and performance. Adept at collaborating with cross-functional teams to deliver high-quality products that exceed user expectations. Committed to continuous improvement and compliance with industry standards, resulting in enhanced operational efficiency and security.

SKILLS

Programming Languages: Python, C#, SQL, JavaScript, Shell Scripting

Databases: SQL Server, MySQL, PostgreSQL, Mongo DB

Frameworks: Selenium (Web Driver), Cypress, Keyword-Driven, Data-Driven, Hybrid, Page Object Model (POM), Behavior-Driven Development (BDD) with Cucumber, TestNG, JUnit

CI/CD & DevOps Tools: Git, GitHub, Bit bucket, Jenkins, Maven, Docker, Kubernetes, Azure DevOps, Selenium Grid, Rest Assured, Swagger, Jira

Testing Tools / Types: Manual Testing, UI Testing, Integration Testing, Regression Testing, Black Box Testing, White Box Testing, Functional Testing, Performance Testing, Smoke Testing, Sanity Testing, API Testing, Security Testing, Unit Testing, Mobile Testing (Appium), Accessibility Testing, Postman, SoapUI, JMeter, Katalon Studio, LoadRunner, Playwright

Cloud & Automation Platforms: AWS, Azure, Google Cloud Platform (GCP), LambdaTest, Sauce Labs, BrowserStack

Process & Methodologies: Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), Test Case Design, Test Planning, Quality Assurance, Root Cause Analysis, Agile & Scrum Methodologies, Risk-Based Testing, Continuous Testing, Defect Tracking and Reporting, Exploratory Testing

Additional Skills: Cloud-Based Application Testing, Embedded Systems Testing, Automated Test Script Development, Cross-Browser Testing, API Integration Testing, Mobile Testing, Regression Suite Maintenance

EXPERIENCE

Nationwide, USA | QA Engineer

Jan 2024 – Current

- Spearheaded testing efforts for an insurance claims processing platform, developing over 200 automated test cases using Selenium WebDriver and Python, improving defect detection by 35% and reducing testing time by 20%.
- Integrated Behavior-Driven Development (BDD) with Cucumber to enhance collaboration among cross-functional teams, achieving a 25% reduction in defect cycle time through clearer requirements and user stories.
- Created comprehensive regression test suites utilizing TestNG and JUnit, ensuring a 98% stability rate during production releases and maintaining 99% system uptime.
- Executed rigorous API testing with Postman and Rest Assured, validating integrations between financial data systems and external services, resulting in zero API failures post-deployment.
- Conducted extensive cross-browser testing on BrowserStack and LambdaTest, enhancing user experience by identifying and resolving compatibility issues across multiple browsers.
- Collaborated with DevOps teams to optimize CI/CD pipelines in Azure DevOps and Docker, integrating automated testing into the deployment process, which decreased release time by 40%.
- Performed security testing based on OWASP guidelines, identifying vulnerabilities and ensuring compliance with HIPAA and SOC 2, leading to strengthened security measures and reduced risk exposure.

KPIT, India | QA Engineer

Jan 2019 – Jul 2021

- Championed quality assurance processes for various projects, ensuring high software quality standards and compliance with industry regulations.
- Developed and implemented efficient testing frameworks, streamlining test case creation and execution, resulting in a 30% increase in overall testing efficiency.
- Orchestrated performance testing initiatives using JMeter to evaluate system behavior under load, providing actionable insights that led to significant system optimizations.
- Streamlined defect tracking and reporting processes, facilitating timely communication between development and QA teams, contributing to a 20% reduction in time to resolve critical issues.
- Conducted manual and automated testing of web applications, identifying and documenting defects to support continuous improvement efforts.
- Participated in peer reviews of test plans and cases, enhancing quality through collaborative feedback and promoting best practices within the QA team.

EDUCATION

Campbellsville University, Kentucky, USA

Master of Science in Cloud Computing

Mar 2024

Dr. Panjabrao Deshmukh krishi vidyapeet, Akola, Maharashtra

Bachelor of Science in Agriculture

July 2020
