Education

Master of Science in Computer Science

Clark University

2023 – 2024

Worcester, MA

Bachelor of Technology in Computer Science and Engineering

KL University

2019 – 2023

India

Experience

Verrlo Tech (Early-Stage Startup)

Full Stack Developer

March 2025 – Present

Unpaid/Pro Bono Contribution: As a core member of this early-stage startup, I was entrusted with all software development responsibilities from product inception to launch.

- Led the end-to-end development of a roommate matching platform, serving as the sole Full-Stack Engineer responsible for front-end, back-end, database administration, and DevOps.
- Implemented a modern full-stack architecture centered on Node.js, with a React + TypeScript + Tailwind CSS frontend and an Express.js + PostgreSQL backend.
- Integrated key services including Clerk API for authentication, Socket.IO for real-time chat, and Customer.io for personalized email notifications.
- Engineered a custom matching algorithm and designed a user-friendly platform that significantly improved the campus housing experience, attracting early adoption interest from Boston University.
- Managed all aspects of the PostgreSQL database, including schema design, security, and performance optimization.
- Containerized the backend Express API and PostgreSQL database with Docker to ensure consistency and scalability across environments.
- Improved platform reliability by setting up monitoring and error tracking with LogRocket.
- Established a robust DevOps pipeline with GitHub for version control and Render for reliable cloud deployment.
- Worked asynchronously with the founding team to manage trial launches at Western New England University (WNE) and planned rollouts at Boston University, contributing to the company's long-term vision.

Indian Servers

Interned as Web Application Pentester

August 2021 – October 2021

- Performed security assessments and issue resolution as a software trainee and web application pentester by leveraging tools like Burp Suite for in-depth web application testing, Nmap for network discovery, and Wireshark to analyze network traffic for vulnerabilities.
- Collaborated with cross-functional teams to address security vulnerabilities. Using a Kali Linux environment, I employed frameworks such as Metasploit to confirm the exploitability of findings and Nessus for automated vulnerability scanning.
- Authored detailed reports on security findings, risk levels, and recommended fixes, translating technical details for non-technical stakeholders.
- Managed support tasks related to network troubleshooting and system configuration in collaboration with developers and IT Team.

Student coordinator, Host, and Technical Lead

Fifth International Conference on Smart Technologies In Data Science and Communication

20 – 22 July 2022

- Served as a point of contact and communication for student volunteers, addressing their queries, providing guidance, and maintaining open communication channels throughout the event.
- Communicated and Welcomed attendees into the online conference and provide them with information about the conference, program flow, and schedule.
- Communicated with authors and Oversaw the submission and review process for research papers, ensuring adherence to IEEE guidelines and standards.

Cyber Security Peer Mentor's Leader

May 2021 - December 2021

- As a Cyber Security Peer Mentor Leader at KL University, I led a team of 30 mentors, supporting faculty in designing IT course labs and configuring systems for research while setting up lab environments for students to practice their skills. Through this role, I gained hands-on experience with configuring lab environments, imaging systems, and troubleshooting software issues, all while developing strong communication and leadership skills by collaborating with both students and faculty to ensure the smooth operation of IT lab facilities.

Technical Skills

Frontend / Web Development: React, TypeScript, JavaScript, Tailwind CSS, Browser storage and background task handling.

Backend / APIs: Node.js, Express.js, Python/Flask, REST APIs, Socket.IO, Clerk (Auth), Customer.io.

Programming Languages: Java, Python, TypeScript, JavaScript.

Databases: PostgreSQL, MongoDB, MySQL.

DevOps / Cloud: Docker, Git, GitHub, Render, Azure.

Other Tools: LogRocket, Wireshark, Burp Suite, Nmap.

Certifications

Google Cyber Security Professional: 2024

- Verify at: <https://www.coursera.org/verify/professional-cert/0U9JUNSJPHI4>

CompTIA Security+: In progress

Projects

Capstone: Cloud Based Tutoring Platform | *Python, Flask, MongoDB, React* 2024

- Built a robust application system for real-time deployment as part of the capstone project at Clark University.

Reconnoitering Deepfakes Using Strategic Models and Architectures (PROJECT MAYA) 2022

- Developed a user-friendly application that allows users to upload a video and receive feedback on whether the video is a Deepfake or original.

Steganography and Steganalysis to Interpret and Target Anomalies (S.S.I.T.A) | *Python, Flask* 2022

- Built a real-time application utilizing machine learning algorithms to detect secret messages, payloads, and other anomalies in images.

KL-ATLAS, a University Map/Guide | *Java, Hibernate, JSF, Sprint* 2021

- Developed a user-friendly application that enables users to explore different areas of the university and obtain information on faculty members and campus buildings.

AGRI-TECH an agricultural Management System | *Python, Flask, SQL, Data Science, Machine Learning* 2021

- Designed and developed a website that provides real-time crop price forecasts and serves as an information hub for farmers.
- Recognized for outstanding project performance and selected as one of KL University's top projects in the SDP-2 Hackathon.

Enterprise Resource Planning System for students | *Python, Flask, SQL, Node.JS, PostgreSQL, RPA* 2020

- Developed a robust banking application system within a week to meet real-time deployment requirements.

Publications

DV Emotion Net, An Integrated Multimodal Approach for Emotion Recognition 2024

- Published in Open Access Journal of Criminology Investigation and Justice.
- doi: <https://medwinpublishers.com/article-description.php?artId=12519>

Identification of Deepfakes using Strategic Models and Architectures 2023

- Published in ICSCDS, India, 2023, pp.75-82.
- doi: 10.1109/ICSCDS56580.2023.10104880

Revolutionizing Fingerprint Forensics: 2023

- Regeneration and Gender Prediction with Gabor Filters, Otsu's Technique, and Deep Learning.
- Published in ICAISS, India, 2023.
- doi: 10.1109/ICAISS58487.2023.10250459

Comparative Stratification of Steganalysis Techniques to Interpret and Target Anomalies 2022

- Published in ICACRS, India, 2022, pp.433-438.
- doi: <https://doi.org/10.1109/icacrs55517.2022.10029147>
