📍 Overland Park, KS 📞 (913) 585-5393 ✉️ sivavenkatayashwanth@gmail.com  LinkedIn

SUMMARY

Full Stack Java Developer with 3+ years of experience delivering scalable and secure enterprise applications in banking, consulting, and IT services. Proficient in Java, Spring Boot, Microservices, Angular, and AWS, with hands-on expertise in designing RESTful APIs, implementing event-driven architectures (Kafka, RabbitMQ), and deploying cloud-native solutions with Docker and Kubernetes. Adept at CI/CD automation, database optimization, and Agile collaboration, with strong problem-solving, communication, and teamwork skills to drive timely delivery of high-quality solutions that enhance system performance, security, and user experience.

TECHNICAL SKILLS

Programming Languages

Java, SQL, C++

Frontend Development

Angular, JavaScript, TypeScript, HTML, CSS

Cloud & DevOps

AWS (EC2, S3, API Gateway, Lambda, Bedrock), Docker, Kubernetes, Terraform, Ansible, CI/CD Pipelines

Core Concepts & Methodologies

OOP, Data Structures & Algorithms, Design Patterns, System Design, Agile (Scrum)

Backend Development

Spring Boot, Spring MVC, Hibernate, RESTful APIs, Microservices, Spring Data JPA, Spring Security, OAuth 2.0, JWT

Databases & Messaging

MySQL, MongoDB, Kafka, RabbitMQ

Tools & QA

Git, GitHub, Maven, Jenkins, IntelliJ IDEA, JIRA, Postman, Swagger (OpenAPI), SonarQube, JUnit, Mockito

PROFESSIONAL EXPERIENCE

Full Stack Java Developer, Fidelity Investments

Jan 2024 – Present | USA

- Engineered and maintained high-throughput Java/Spring Boot microservices for trading and portfolio management, processing 5K+ daily transactions with minimal latency and robust peak-period performance.
- Optimized real-time data pipelines using Kafka and RabbitMQ, improving system responsiveness and increasing transaction throughput by 20% during high-volume sessions, enabling faster client operations.
- Implemented OAuth 2.0 and JWT authentication mechanisms across distributed APIs, enhancing security and compliance while reducing unauthorized access incidents in critical financial workflows.
- Deployed and managed containerized workloads on AWS (EC2, S3, Lambda) and Kubernetes, ensuring 99.9% uptime and seamless scalability for business growth.
- Delivered 7+ production releases per quarter by collaborating closely with product owners, QA, and DevOps teams in Agile sprints, accelerating feature delivery and improving end-user experience.

Full Stack Java Developer, Deloitte

Jun 2022 – Dec 2023 | India

- Designed and developed RESTful APIs and Spring Boot microservices to integrate complex financial client systems, improving backend scalability, maintainability, and response times for critical business applications.
- Partnered with cloud engineers to migrate legacy financial workloads to AWS (EC2, API Gateway), enhancing system scalability and reducing operational bottlenecks during cloud adoption initiatives.
- Delivered interactive Angular dashboards to automate client reporting workflows, cutting manual reporting efforts by 30+ hours per month and providing stakeholders with faster, more accurate data insights.
- Accelerated deployments from bi-weekly to weekly by configuring and managing Jenkins-based CI/CD pipelines integrated with GitHub and Maven, improving release velocity and minimizing production delays.
- Enforced code quality and security standards using SonarQube, reducing production defects by 15% and strengthening maintainability across enterprise codebases.

System Engineer, Cognizant Technology Solutions

Jan 2021 – Jun 2022 | India

- Contributed to enterprise Java application development by coding modules in Spring MVC and Hibernate, enhancing system reliability, maintainability, and adherence to development best practices.
- Supported database optimization efforts in MySQL and MongoDB, improving query performance by 20% for critical client reports and reducing system response times.
- Authored and executed unit test cases using JUnit and Mockito, achieving 85% test coverage and ensuring higher code quality across assigned modules.
- Collaborated with senior developers, testers, and business teams in Agile sprints, supporting timely delivery of high-quality enterprise Java modules and fostering efficient cross-functional communication.

PROJECTS

Smart Workflow Management System,

Angular, Spring Boot, MongoDB, JWT, Docker, Kubernetes, AWS

- Built an automated task allocation platform, improving team workload balance and reducing project delays by 30%.
- Integrated role-based access control with JWT authentication, securing workflow data for multiple user types.
- Implemented a scalable backend using Spring Boot and MongoDB, optimizing task assignment efficiency.

E-Commerce Microservices Platform,

Spring Boot, REST APIs, MySQL, Kafka, React, AWS (Lambda, API Gateway), Jenkins, Terraform

- Developed modular e-commerce services for orders, payments, and inventory, supporting 2K+ concurrent users.
- Implemented Kafka-based event-driven messaging for near real-time order tracking and notifications.
- Designed a responsive React frontend, improving usability and checkout completion rates by 18%.
- Automated deployments with Jenkins and Terraform, reducing deployment duration from 1 hour to 10 minutes.

EDUCATION

Master of Science in Computer Science,

Jan 2023 – May 2025 | Warrensburg, MO

University of Central Missouri

Relevant Coursework: Database Management, Java Programming, Cloud Computing, Advanced Database Systems

B.Tech. in Electronics and Communication Engineering,

Jul 2018 – May 2022 | India

Geethanjali Institute of Science and Technology

CERTIFICATIONS

AWS Certified Developer — Associate (Amazon Web Services)

Oracle Certified Professional: Java SE 11 Developer
