Profile: Entry-Level Software Engineer with full-stack web development and game development experience, proficient in **Python**, **C++**, **C#**, and **JavaScript**. Experienced in Agile teamwork, building modular applications, and solving complex problems through coding.

EDUCATION

B.Sc. in Computer Engineering, Middle East Technical University

June 2025

Relevant Coursework: C Programming, Data Structures, Algorithms, Software Engineering, Programming Language Concepts, Data Management and File Structures, Operating Systems, Data Communications and Networking, Introduction to Data Mining.

PROJECTS

Senior Project – VersaTile Web Data Aggregation Platform

Team of 4, METU

- Built a full-stack web application that aggregates, transforms, and visualizes real-time data from diverse sources (**APIs**, **Google Sheets**, **CSV/JSON files**, and web scraping).
- Designed and implemented modular **widgets** with customizable dashboards using **React**, **Node.js**, **FastAPI**, and **MongoDB**.
- Deployed containerized microservices with **Docker** and developed a **data transformation pipeline** for filtering, sorting, and exporting structured data.
- Integrated an **LLM-powered “Ask AI” feature** to generate data summaries, insights, and translations directly within the dashboard.
- [Demo Link](#)

Computer Graphics Projects (C++ / OpenGL)

Coursework

- Implemented rendering systems in **C++** and **OpenGL**, including ray tracing, texture mapping, and geometric shading.
- Developed a 3D **Match-Three Game** and optimized performance using **deferred rendering** and object-oriented pipeline design.

EXPERIENCE

Lely

Software Engineer Intern

July - August 2024

- Worked on **web API** development using **C#**, **.NET**, and **Entity Framework**.
- Developed front end application for custom web API using **React** and **Tailwind**.

Otsimo

Game Developer

Jul – Dec 2023

- Developed and optimized interactive educational games in **Unity** and **C#** for the app **Sago Mini First Words**.
- Implemented a new game with over **90% completion rate** and improved gameplay performance. ([Demo Link](#))
- Debugged and refined existing game mechanics, enhancing user experience for early learners.

TECHNICAL SKILLS

Languages: Python, C, C++, C#, JavaScript, SQL

Frameworks & Tools: React, Node.js, .NET, Unity, FastAPI, Docker, Git

Environment: Linux, Windows
