Business Analyst

PROFESSIONAL SUMMARY

- 8+ years of Extensive work experience in the IT Industry with **Data Visualization (Tableau report) and MS IIS administration.**
- Experience with working in a **Data governance/Data management** or Data quality program.
- Experience in **Software Development Life Cycle (SDLC)** that include duties like providing documentation on design, **testing and migration** from development to production.
- Involved in full life cycle implementation, which includes Requirements Gathering, **Development, Testing, Reporting, Go live and Reconciliation.**
- Experienced in Interacting with Users, analyzing client business processes, Documenting business requirements, Performing **Design Analysis**, Developing Design Specifications and testing reports.
- Experience in working with large volumes of **Data using SQL, Tableau.**
- Created 350+ worksheets and 60+ Dashboards in large BI environments using **Tableau and Power BI.**
- Experience in creating **Tableau scorecards, dashboards** using **stack bars, bar graphs, scattered plots, geographical maps, Gantt charts** using show me functionality.
- Proficient in design and development of various dashboards, reports utilizing **Tableau Visualizations like Dual Axis, Bar Graphs, Scatter Plots, Pie - Charts, Heat Maps, Bubble Charts, Tree Maps, Funnel Charts, Box Plots, Waterfall Charts, Geographic Visualization** and other making use of actions, other local and global filters according to the end user requirement.
- Experienced with **Performance Tuning** and Optimization of the Rendering Time on the **Visualizations and Dashboards.**
- Experience in Data Management like **Data Sourcing, Staging, Transformation and Publication.**
 - Administered user, user groups, and scheduled instances for reports in **Tableau** and documented upgrade plan from **Tableau.**
- Strong Experience in **Performing data analysis** and **data profiling** using complex **SQL** on various source systems such as **Microsoft SQL.**
- Extensive experience in extraction, transformation and loading of data directly from different Heterogeneous source systems like **Flat Files, Excel, Oracle, MySQL, MS SQL Server.**
- Good knowledge of data warehouse (DWH) Models, **ETL process, RDBMS concepts, SQL, PL/SQL, Oracle and SQL Server.**
- Design, plan, and execute all windows projects using IIS.
- Install and configure different versions of IIS (including FTP)
- Moving content and configuration changes from Staging/UAT Environment to production
- CSR generation, SSL procurement and Configuration
- Performance monitoring, Tuning, Hardening
- Maintenance and Application support for IIS web servers.
- Disk Monitoring/Housekeeping/Scripting

EDUCATION: Bachelors of Technology in 2012

TECHNICAL SKILLS

Programming Languages : SQL

Web/Application Server : MS IIS **RDBMS :** MySQL,

Reporting Tools : Tableau 2019,2020,2021

Packages : MS-Office, Excel, Power point.

Methodologies : Agile Methodology, Water flow methodology.

Operating System : Windows, Mac, Linux.

PROFESSIONAL EXPERIENCE

Client: Protera Technologies, Illinois. June 2023-Present

Role: Tableau Developer

Roles and Responsibilities:

- .Design,develop and maintain interactive **Tableau dashboards and reports.**
- .Translate business requirements into functional and visually compelling dashboards.
- .Build calculated fields,parameters,filters,**level-of-detail(LOD) expressions**,and **advanced visualizations.**
- .Connect Tableau to multiple **data sources** (SQL databases,Excel,cloud sources,APIs etc.).
- .Perform data cleaning,blending,joins and transformations.
- .Optimize data models of performance and scalability.
- .Improve dashboard load time through efficient **data sources,extracts and queries.**
- .Developed scalable Tableau dashboards using complex calculations, LOD expressions, and interactive parameters to support **business decision-making.**
- . Collaborated with stakeholders to define **KPIs** and translate business needs into **actionable visualizations.**
- .Automated reporting workflows using Tableau Server schedules and governed published data sources.
- . Connected and blended data from **SQL databases, cloud platforms, and Excel files** to create unified analytical views.
- .Delivered actionable insights by **analyzing trends, forecasting performance, and identifying data anomalies.**

Client: CMS, Columbia MD. Dec 2021– April 2023

Role: Data Analyst

Roles and Responsibilities:

- Involved in the requirements gathering, **analyzing**, and **documenting** business requirements and data specifications.
- Worked with each development team in all the phases of **SDLC** that such as Analysis,design, implementation, testing and deployment and ensure the deliverables are in line with the business requirements
- Worked with **UAT** development teams to identify the testers required, and also defined the scope of testing

activity.

- Defining test scenarios and cases that works with stake holders to identify their needs and translate them into specific tasks that are assigned to development team.
- Provided support to stakeholders when testing for business acceptance that helps to ensure that software solutions are tested thoroughly and meet the requirements.
- Synthesized current **business intelligence** data to produce reports and polished presentations.
- Participated in planning sessions for projects initiated for meeting strategic goals pertaining to **Data Governance**.
 - Knowledge of **data governance** practices related to **data quality, data Integrity, and data management**.
 - Supported in recommending **data governance / data management** practices (MDM), tools, and techniques based on understanding of business operations and goals.
 - Ingest the data into Snowflake from various sources like **Oracle** and **Postgres**.
 - Drafted and worked on reports based on quarterly and yearly reports on project based **medical/ Insurance claims**.
 - Extracted the tables/data from **MySQL** database and generated reports by using **Tableau desktop**.
 - Extracted the data from non-database sources (XLS, and Text file) and generated reports by using Tableau Desktop.
 - Explored Data in a variety of ways and multiple visualizations using **Tableau**. Strategic expertise in design of experiments, **data collection, analysis, and Visualization**.
 - Worked on data management which includes **Data Sourcing, Staging, Transformation, Metrics and Analytics, Publication**.
 - Developed different types of **Tableau Reports like Cross tab**.
 - Developed different types of visualizations reports like **bar charts - Bullet graphs Box and whisker plots**.
 - Generated Tableau reports with Trend lines.
 - Used filters, quick filters, sets, parameters, and calculated fields on **Tableau reports**.
 - Developed complex reports using **data blending**.
 - Developed the Reference lines in reports by using Parameters.
 - Creating basic calculations including **string manipulation**, basic arithmetic calculations, custom aggregations, and ratios.
 - Implemented Grand Totals, Sub-totals, and Changing Aggregation for Customizing the Data
 - Created Hierarchies, sets, combined sets and groups in **tableau**.
 - Involved in publishing the reports to **Tableau server**.
 - Combine the visualizations into Interactive **Dashboards** and publish them to the web.
 - Involved in Troubleshooting, resolving and escalating data related issues and validating data to improve data quality.
 - Weekly presentation to the business users about the reports and their changes as required.
 - Worked on all kinds of reports such as Yearly, Quarterly, Monthly.
 - Participated in project planning sessions with project managers, business analysts and team members to analyze business requirements and outline the proposed solution.
 - Database creation (**DDL, DML, DCL**), **database tuning, SQL tuning, performance planning**.
 - Extensively used Joins and Subqueries to simplify complex queries involving multiple tables.
 - Transformed complex business logic into Database design and maintaining it by using **SQL** objects like Stored Procedures, User Defined Functions and Views.
 - Created **Parameterized Report, Dashboard Report**, Linked report and SubReport by Year, Quarter, Month, and Week.
 - Created **Drill Down Reports**, Drill Through Report by Region.

Environment: SQL Server, Tableau, Windows, MS Word, MS Excel.

EXTARC Software Solutions (India) Nov 2014 – April 2018 Role: Systems Engineer

Roles and Responsibilities:

- Design, plan, and deploy .Net applications in IIS Web Server.
- Install and configure all versions of IIS (including FTP, SMTP, ASP.NET applications)
- Create website and application pools required for the application.
- Configure the websites using Service accounts.
- Update Config files with proper environment details to connect to Database.
- Moving content and configuration changes from Staging/UAT Environment to production •
- CSR generation, SSL procurement and Configuration
- Performance monitoring, Tuning, Hardening
- Maintenance and Application support for IIS web servers.
- Configure the security for Web servers with the latest TLS standards.
- Installing, configuring, testing, and maintaining operating systems, application software and system management tools.
- Ensuring the highest levels of systems and infrastructure availability.
- Scan and fix infrastructure vulnerabilities related to Web Server reported by monitoring tools such as Qualys. •
- Configure proxy server for backed applications using ARR.
- Configure URL Rewrite rules for URL redirection.
- Follow change and incident management procedure.
- Install required patches to mitigate the security vulnerabilities.
- Harden the IIS webserver to avoid surface attacks.
- Configure load balancing for IIS websites using F5 load balancer and define the load balancing algorithms.
- . Configure SSO for the websites using third party federations like SAML.

Environment : Operating Systems, Networking, Server Administration, Backup and Recovery, Troubleshooting.
