Education

- **Stevens Institute of Technology** | *GPA: 3.9* New Jersey, USA
Sep 2023 - May 2025
Masters of Science - Computer Science
Courses: Database Management, Software development Life Cycle, Cloud Computing, Data Structures, Data Mining
- **University of Mumbai** | *GPA: 3.7* Mumbai, India
July 2017 - May 2021
Bachelors of Technology - Computer Science
Courses: Software engineering, Object Oriented Programming, Operating Systems, Web development, Machine Learning

Experience

- **ZSuite Technologies** | Fintech MA, USA
Sep 2024 - May 2025
Software Engineer
 - Automated 1099 generation process using complex **SQL** queries, ensuring 100% accuracy for clients with 100+ beneficiaries and 40K+ account records.
 - Leveraged and restructured **Python code**, formulating **dependency injection** thereby optimizing and reducing code structure by 30% and custom resource management using **poetry**.
 - Instituted an efficient **GitHub workflow** with **pytest** for automated code monitoring, leading to 0 critical bugs reported post-deployment.
- **Sapio Analytics Pvt. Ltd.** | IT Mumbai, India
Nov 2022 - July 2023
Software Engineer II
 - Built a large-scale job portal with 70+ APIs, serving 1 million plus job providers and seekers with CRM management using **Amazon RDS, S3, and EC2**.
 - Optimized user loan defaulter calculator with **Django Rest Framework** and **MongoDB middleware**, automating user amortization reports and reducing generation time from 2 hours to 3 minutes.
 - Led the development of an Applicant Tracking Tool using **AWS Lambda** to automate text extraction from ZIP files, storing data in **S3**, and indexing 1M+ records in **AWS OpenSearch** with 95% accuracy on resume search.
- **LendenClub Techserve Pvt. Ltd.** | Fintech Mumbai, India
July 2021 - Oct 2022
Software Engineer
 - Spearheaded real-time repayment transactions in **peer to peer** platform for 1M+ users using **Redis and Django**, reducing processing time from 5 hours to 2 minutes while handling 5K+ transactions daily.
 - Streamlined prevailing workflow efficiency with **microservices architecture** and **CI/CD automation** using **Docker**, reducing deployment time by 60%.
 - Developed **90+ RESTful APIs** incorporating **DRY** and **PEP8** principles to enable seamless data transfer across microservices, ensuring code efficiency.
 - Implemented **18+ critical periodic jobs** to ensure flawless user experience and error-free functionalities, including amortization, repayment calculations, and third-party integrations.
- **Colgate-Palmolive Pvt. Ltd.** | Healthcare Mumbai, India
Jan 2021 - June 2021
Associate Technical Analyst
 - Designed an administrative portal using **reactJS and typescript** enriched with features enabling seamless uploading, selection, and image editing using **react hooks**, having 10+ filters.
 - Pioneered tool creation tailored for employee data management. Formulated through Django integration incorporating **Okta Authentication** and **Google Firebase Storage** managing 10K+ employee data.

Projects

- **Voiced Prescription For Doctors** | *Python, Flask, NLTK Library, Bootstrap, Pandas, Postgresql, MD5*
 - Organized a **web application** capable of discerning a doctor's spoken words and simultaneously formulating patient prescriptions from the voice input provided.
 - Employed **Flask infrastructure** for system foundation. Voice detection and keyword recognition, achieved through Python NLTK Library with voice detection accuracy rate of **90%**.
 - Structured **PostgreSQL** to house user data with emailing feature thereby upholding data security with **MD5 encryption**.
- **The Diabetes Meletus and Retinopathy Detector** | *Python, Flask, Machine Learning, ReactJs, Mongoddb*
 - Engineered a diabetes detection system using Flask, harnessing **random forest modelling** giving **accuracy of 93%**.
 - Generated user health chart via reactJS detecting abnormalities thereby providing **data warehousing** using **MongoDB** giving the results under 1 minute.

Technical Skills

- **Languages:** Python, C++, JavaScript, Typescript, Java, Php, Html, Css
- **Databases:** MySQL, PostgreSQL, MongoDB, Google Firebase
- **Frameworks:** Django, Flask, ReactJS, NodeJS, AWS ec2, s3, rds, lambda, Docker, Scikit-learn, FastApi, Poetry, Pytest
- **Platform/Tools:** Git, Gitlab, Github workflows/actions, Postman, VSCode, Pycharm, Jira, colab, Opensearch, kubernetes
