

Sneha Tambade

Software Development Engineer

Phone: (+1) 510-714-7431

Website: <https://www.linkedin.com/in/snehatambade>

Address: Fremont, CA

Email: tambade.sneha1994@gmail.com

Software Engineer with 7+ years of experience in .NET-based application development, delivering scalable, high-quality solutions using **Agile/Scrum**. Proficient in **.NET 6, C#, Entity Framework Core, ASP.NET, REST APIs, SSIS, WPF, WCF, SQL, LINQ, and ORM**, with a strong focus on performance and maintainability.

Experienced in the **trading domain**, as well as in designing **microservices and serverless architectures**, applying **SOLID principles, design patterns, multithreading, and async programming** to build robust systems and writing **unit and integration tests** to ensure code reliability. Skilled in **RESTful APIs (XML/JSON), AWS (Lambda, API Gateway, SQS, SNS)** and familiar with **React, Angular, TypeScript** and **Azure DevOps**.

WORK EXPERIENCE

Intuitive Surgical

March 2024 - Jan 2025

(Sunnyvale, CA)

Software Engineer(Contract)

- Designed and developed RESTful APIs using **.NET 6**, facilitating efficient communication between the frontend and multiple **SQL** databases using **LINQ** for querying and transforming data, ensuring **high performance** and **reliability**.
- Built and optimized **AWS Lambda-based cron jobs** integrated with **EventBridge** to sync data across databases, reducing execution time from 25 minutes to 2–3 minutes through **batching, async** processing, and **parallel writes**.
- Authored comprehensive unit test cases leveraging **Moq** and **Xunit** to ensure code quality and reliability, while implementing **Fluent Validation** and **AutoMapper** for input validation and efficient object mapping.
- Addressed **Security Vulnerabilities** in backend APIs.
- Hands-on experience with **React** and **TypeScript**, including **integration of backend APIs** and contribution to frontend development tasks, Developed and enhanced **frontend components in React (with TypeScript)** for dashboards, data visualization..
- Utilized **Docker** to containerize .NET applications, ensuring consistent deployment across environments. Configured Docker in GitLab CI/CD pipelines for automated builds, testing, and deployment to AWS ECS.
- Implemented real-time **Server-Sent Events (SSE)** in .NET with **SQS** and **SNS** for live UI updates.

CitiusTech Healthcare Technology Pvt. Ltd

March 2021 - May 2023

(Mumbai, India)

Senior Software Engineer

- Migrated all servers from IaaS to PaaS, **.Net to .NET Core** to minimize cost, optimize infrastructure, and improve maintainability, including databases, web services, and other applications hosted on MRDR IaaS servers.
- Spearheaded the **migration to a serverless architecture** on AWS, leveraging **Lambda functions and API Gateway** to achieve a 25% reduction in infrastructure costs and demonstrably improve application performance.
- Integrated **XRay** tracing into API Gateway, Lambda functions, and downstream services to generate comprehensive service maps and trace data for performance profiling and optimization.
- Identified and resolved key bottlenecks, resulting in a 20% reduction in average API response time. Delivered high-performance APIs and backend systems using **C#, .NET Core**, and a serverless AWS architecture, integrating **DynamoDB, Lambda, API Gateway**, and other key services.
- Developed and executed **ETL** workflows using SQL Server Integration Services (**SSIS**) to facilitate data migration from SQL Server to PostgreSQL.
- Contributed to the design and development of a clinician-facing tool, **Group Editor** (Desktop/Web Application), using **C#, .NET Core**, and gained familiarity with **Angular 15**, medical object representation, and data analytics from EHR systems..

Accenture

April 2019 - March 2021

Application Development Analyst

(Mumbai, India)

- Leveraged **Terraform** for the configuration, provisioning, and maintenance of AWS infrastructure, ensuring code-driven infrastructure management and adherence to Infrastructure as Code (IaC) principles.
- Implemented secure and performant APIs using **C#, .NET Core, SQL Server, AWS** and **Swagger**.
- Release code deployment was built and created using Microsoft Azure DevOps CI/CD pipelines and Octopus.
- Orchestrated API request routing to designated read and write replicas for optimized load distribution and performance maximization.

63 Moons Technologies Ltd.

Aug 2016 – Apr 2019
(Mumbai , India)

Software Engineer

- Developed **desktop-based trading applications** for stock exchanges using **C#, WPF (MVVM), SQL Server** enabling seamless trading and settlement of multi-asset and multi-currency products.
- Contributed to the **Risk Management System (RMS)**, which proactively computed margins and quantified Value at Risk (**VaR**) in real time, ensuring secure and compliant trading operations.
- Worked on **FOVEA**, an agile **surveillance** system that empowered exchanges and regulators with **real-time monitoring** and alerting of **suspicious trading activities**, improving transparency and market integrity.
- Collaborated cross-functionally with testing, infrastructure, and business teams to roll out feature updates, manage production releases, and ensure optimal user experience.
- Engineered efficient high volume data ingestion using **SqlBulkCopy** in **C#** to optimize performance and reduce latency for large-scale trade data.
- Developed message-based integration using Microsoft Message Queuing (**MSMQ**) to support asynchronous communication between trading systems.

EDUCATION

Mumbai Educational Trust's Institute of Information Technology , University of Mumbai , India
Post-Graduation Diploma in Advanced Computing

Feb 2016 - Aug 2016

DR. D. Y. Patil College of Engineering, Pune, India
BE – Electronics and Telecommunication Engineering

Aug 2011 - Sep 2015

SKILLS

Frameworks/Technologies: C#, .NET 6/Core/Framework , ORM , Entity Framework core, .NET 4.5, ADO.NET, Web API, REST API, WPF(MVVM) , LINQ, Terraform, HTML, CSS, YAML.

Frontend (Basic): React, TypeScript, HTML, CSS

Cloud: AWS services such as API Gateway, Lambda, Cloud formation ,Secret Manager, X-Ray, EventBridge , CloudWatch Logs, SQS , SNS , DynamoDB, S3, EC2, IAM, CICD,RDS

Tools: Postman, Insomnia, Datadog , Azure devops, JIRA, GitLab , TFS ,GitHub, Pager duty, Octopus.

Database: SQL Server , PostgreSQL,DynamoDB

Unit Testing Frameworks: MOQ , XUnit , NUNIT , Pytest , Jest.

Architecture: Microservices, Serverless Architecture , SOLID Principles, MVVM,MVC, Design Patterns.

Authentication & Authorization: OAuth 2.0, JWT, API Keys , Role-Based Access Control

CERTIFICATIONS

AWS Certified Developer Associate

April 2025

AZ-900 – Microsoft Azure Fundamentals

Jan 2020

AWS Certified Cloud Practitioner

Sep 2021

AWS Certified Solutions Architect Associate

Feb 2022
