Ph: 689-999-0563

Technical Research Associate/Data Annotator

<https://www.linkedin.com/in/sneha-030953336/>

Professional summary:

- Data Annotator with over 5+ years of experience in accurately labeling and annotating large data sets for machine learning purposes.
- Expertise in Rectangular Label and Label Box with a track record of e client collaboration with data scientists and engineering teams.
- Demonstrated ability to provide high-quality annotations and offer valuable feedback, resulting in enhanced model training efficiency.

Professional Experience:

Client: Keywords Studios/Amazon, (Remote)

March 2025 -Till date

Role: Technical research Associate

- Work collaboratively in a fast-paced environment.
- Execute different Use Cases collecting Data in support of AI engine.
- Conduct Data Analysis on how the AI performs comparatively to User data.
- Provide feedback on how to improve the AI.
- Create and Execute Prompts.
- Learn new software programs on the job.
- Providing supporting documentation when the AI fails.
- To describe how a tool interacts with websites, and how we give feedback and use chain-of-thought reasoning during the run.
- Chain of thought is the step-by-step reasoning that the model (or user) performs before and during a tool interaction to decide the next best action.
- Design, test, and refine prompts to improve interactions with AI systems.
- Ensure prompts align with business logic, user expectations, and language best practices.
- Work with HR, operations, and engineering teams to understand workforce planning needs.
- Conducting multi-level quality checks to evaluate Research Associates' understanding and consistency in providing feedback on AI prompts, ensuring alignment with project standards and language precision.

Client: Data Force, (Remote)

Dec 2024 -March 2025

Role: Data Annotation Specialist

- Provided High-Quality, fully human-generated annotations for short speech recordings.
- Labeled abd creatively described various speech characteristics, including audio quality, voice traits, speaking style and delivery details.
- Ensured accuracy and consistency in annotations to enhance speech recognition and analysis models.
- Applied linguistic and acoustic analysis skills to assess vocal attributes such as tone, pitch, articulation, and emotional expression.
- Maintained efficiency and attention to detail while working with large datasets of diverse speech samples.
- Crafted detailed, creative descriptions of speech patterns, emotional tone, and vocal attributes to enhance dataset richness.
- Assessed clarity, intonation, pitch, cadence, enunciation, and background noise levels to ensure comprehensive annotations.
- Worked with large-scale, diverse speech datasets, ensuring high annotation quality

across multiple voice types and accents.

- Applied critical listening and linguistic analysis skills to evaluate speaker intent, expressiveness, and delivery effectiveness.
- Managed tight deadlines and high annotation volumes while maintaining precision and attention to detail.

Client: GlobalLogic/Google

Sep 2016 -Dec 2022

Role: Quality Analyst /Data Annotation Specialist

- Annotated and labeled datasets for NLP processes, including handwritten and printed text detection.
- Worked on the deadlines tasks/ETA in terms of on-going queues raised requests through the bugs. Conducts Trainings, Refreshers, Dip checks, Analysis and Shadow sessions to improve the label quality. Collecting and interpreting the various data sources of operations or MTV Experts.
- Perform various types of Analysis. I.e, Pipeline stage Analysis, Replication Analysis, Skip Analysis, Blank Submit Analysis and summarize the work basis on the engineer requirements.
- Worked based on insurance domains.
- Analyzing the claims and providing the feedback back to the insurance agencies.
- Trained on the Traffic light detection & Champollion words and also trained on the detection of poles and strands and creation/dropping of poles and strands.
- Identifying the requirement of wires and adding and removing as per the requirement. Maintaining the 99% quality factor. Trained on different types of Plugins on the tool Video Labeling, Audio Labeling, Image Annotation, Spatial Annotation, Association Labeling, Video Bounding Box Labeling, Webviz Labeling and Webviz Annotation.
- Provides feature requests and also gives suggestions for the tool and policy improvements to simplify the complex or prolonged process.
- Manage the daily and weekly allocations for the team.
- Calibration sessions with the engineering team so as to get clarifications regarding hardcore policies and get clarified with the engineer.
- Providing intelligence to robotics to identify human senses and also objects. Labeling the type of identification. We worked on video entity evaluation.
- Identifying the damaged part of the car and evaluating the severity of the damage. Maintaining the 99% quality factor and 125%of production.
- Understanding the Client Requirements and designing the vehicle behavior by capturing durations. Understanding the application flow for the further enhancements to be done according to the Client requirement.
- If there is a change in policy or observed low quality labels by the engineer, we get request as a cleanup task to the specific queues and we take the initiation to cleaning the questions by assigning them as experts.
- Had NLP basic knowledge for analyzing text driven document for Sentiment Analysis and Text Labelling.
- Worked with IT Teams to get the account setups on the MACs delivery.
- Hands-on Experience on SCALE.AI tool.
- Experience in closely working with stakeholders and in-lining the requirements with acceptable solutions, Advanced Excel. Based on the performed RCA and ERC we follow the process improvement cycle in terms of sending tip email, conducting quick Assessments and also by having calibration sessions coordinating with meta labelers to be on the same page.
- Capturing the durations for where the person is interested to move surrounding the Vehicle.
- Giving the instructions not to over- take the Vehicle and also give the mitigation to the car.

Tools Used: Labelbox, CVAT, Appen- Crowd compute, Scale AI, DataForce, OneForma, AGI Autonomy.

Technical Skills:

Data Annotation Tools: CVAT, Labelbox, Appen- Crowd compute, Scale AI, OneForma.

Annotation Techniques: Bounding Box, Polygon, Polyline, Segmentation, Keypoint Annotation.

Quality Assurance: Quality Auditing, SOP Compliance, Team Leadership.

Data Processing: NLP, Text Extraction, Transcription, Audio Labeling, Chain of thought.

Technical Skills: Microsoft Office (Excel, VLOOKUP, Pivot Tables).

Soft Skills: Team Collaboration, Mentoring, Time Management, Attention to Detail.

Education:

Bachelor's in Electronics and Communications Engineering from **JNTUH** at Hyderabad, India.

Awards:

High Five Award (Q3 2022): Recognized for maintaining high-quality standards and throughput at GlobalLogic.

Team Excellence Award (Q4 2021): Awarded for consistent support in project delivery at GlobalLogic.
