PROFESSIONAL SUMMARY

- Senior Salesforce Technical Lead Developer with 11+ years of IT experience, specializing in CRM, API-led integration, and cloud-native enterprise solutions. This involved hands-on design and development using Force.com platform administration, CRM, configuration, customization, implementation, training and support.
- Accumulated extensive Salesforce knowledge and hands on experience on Sales Cloud, Service Cloud, Community Cloud and Financial Cloud.
- Extensive experience across Salesforce CRM, LWC, Aura, Apex, SOQL, Omnistudio, and advanced platform security (Shield, Field Audit Trail).
- Designed and implemented API-led connectivity frameworks enabling real-time, secure integrations between Salesforce Finance, Banking, and Public Sector systems.
- Leadership in gathering requirements, architecting integration solutions, managing Agile teams, and ensuring best practices for scalability, performance, and security.
- Good insights into the Banking, Financial and State & Local domain.
- Experience in data migration using MuleSoft, Data Loader, Data Import Wizard, SFDC Data Export.
- Expertise in Security and Sharing rules at Object Field and Record levels access for different users in the organization.
- Expertise in building reusable UI/UX components with lightning component framework such as Aura and LWC.
- Expertise in Tableau CRM, Einstein Analytics Dashboards using Dataflows and Recipes.
- Designed and implemented complex Omni Studio solutions including OmniScripts, Integration Procedures, Data Raptors, and Vlocity Data Packs.
- Proficiency in SFDC Development in implementing Apex classes, Test classes, Triggers, Force.com IDE, Visual Force (Pages, Components, Controllers), Batch Apex, Scheduled Apex, Anonymous Apex, Change Sets Deployment, Custom Settings, SOQL and SOSL.
- Experience working with Force.com IDE & Eclipse IDE in design and development of Custom Application for Complex Business Processes in both Sales and Service Cloud Modules.
- Experienced in integration of Salesforce.com with external applications by using Web Services API, Metadata API, and REST.
- Hands on experience on Platform-events with integrating Salesforce and Python based apps having AWS middleware.
- Expertise in architecture design and development using cloud technologies like Amazon Web services and Google cloud platform.
- Experience in SDLC methodologies in Agile, V-model, and Waterfall.
- Adept at aligning Salesforce capabilities with business strategy, improving operational efficiency, and driving digital transformation. Passionate about mentoring teams, improving code quality, and promoting best practices in CI/CD, testing, and agile delivery. Proven track record of success in leadership, technical strategy, and solution delivery for roles including Salesforce Lead and Senior Developer.
- Provide guidance and lead Junior developers both onsite and offshore and coordinate all development work in a timely manner.
- Excellent communication and inter- personal skills, accustomed to work in both large and small team environments.

CERTIFICATIONS

- Salesforce Certified Administrator
- Salesforce Certified Platform App Builder
- Salesforce Certified Platform Developer 1
- Salesforce Certified Tableau CRM and Einstein Discovery Consultant
- Salesforce Certified Omni Studio Consultant
- Salesforce Certified Omni Studio Developer

- Salesforce Certified Experience Cloud Consultant
- Google Certified Cloud Engineer Associate
- Google Certified Cloud Architect Professional
- AWS Certified Developer

TECHNICAL SKILLS

SALESFORCE Salesforce Sales Cloud, Service Cloud, Experience Cloud, Apex (Triggers, Batch, Queueable, Schedulable, Future), SOQL/SOSL, Lightning Web Components (LWC), Aura Components, Visualforce, Flows, Data Modeling, ERDs, Schema Builder, Security & Sharing, Roles, Profiles, Permission Sets, Sharing Rules, REST/SOAP APIs, External Services, Custom Metadata, Custom Settings, Platform Events, Named Credentials, Git, Copado, CI/CD Pipelines, Reporting & Dashboards, Dynamic Forms, Lightning App Builder, Salesforce Shield, Encryption.

OmniScripts, DataRaptors, Integration Procedures, Flex Cards.

LANGUAGES C, C++, HTML, SQL, Java Script, Java, Python, Apex

DATABASES MySQL, DB2, MS SQL Server

CLOUD TECHNOLOGIES Amazon Web Services (AWS), Google Cloud Platform (GCP)

PROJECT MANAGEMENT TOOLS Jira, Basecamp, Trello, Agile

IDE VS Code, Eclipse

BUSINESS SKILLS Leadership, Solution Architecture, Estimations, Team Management, Stakeholder communication, Mentorship.

WORK EXPERIENCE

PWC, FL, USA Apr 2022 – Till Date

Lead Salesforce Developer

Responsibilities:

- Led the customization efforts of Salesforce to align with PwC audit processes, ensuring seamless Salesforce integration with existing workflows.
- Designed and enforced a scalable Apex Trigger Framework with logging, error handling, and future extensibility, reducing code review defects by 40%.
- Architected and developed Lightning Web Components (LWC) for dynamic forms, reusable modals, and dashboards, cutting UI build time by 25%.
- Implemented record-triggered and screen flows to automate business processes, eliminating 200+ hours/month of manual effort.
- Integrated Salesforce with REST APIs and external systems using Named Credentials, Auth Providers, and Platform Events.
- Defined and enforced Salesforce security model (Profiles, Permission Sets, Role Hierarchy, Sharing Rules) ensuring compliance with SOX/GDPR standards.
- Directed data migration strategies (Data Loader, Data Import Wizard, Bulk API, ETL tools) for 5M+ records, achieving 99.9% data accuracy.
- Developed Apex classes, triggers, Queueable, Batch Apex, and Schedulable while ensuring compliance with governor limits and bulk-safe practices.
- Enhanced case management using automation (flows, macros, quick actions) improving case resolution time by 35%.
- Designed custom objects, relationships, validation rules, record types, and page layouts to support scalable business models.
- Stayed abreast of the latest Salesforce developments and recommended enhancements to existing systems to align with industry best practices and PwC's evolving needs.

Environment – Salesforce (Sales Cloud, Service Cloud, Experience Cloud), Apex (Classes, Triggers, Batch, Queueable, Schedulable), Visualforce, Lightning Aura Components, Lightning Web Components (LWC), Omni Studio (OmniScripts, Integration Procedures, DataRaptors, Flex Cards), Flows (Screen, Record-Triggered, Auto-launched), Salesforce Integration (REST, SOAP, Platform Events, External Services), API Gateway, Data Migration (Data Loader, Informatica, Talend, ETL Tools), SOQL, SOSL, Governor Limits Optimization, Role Hierarchy, Profiles, Permission Sets, Sharing & Security Model, Custom Metadata & Settings, Validation Rules, Approval Processes, Reports & Dashboards, System
