Dear Hiring Manager,

I'm excited to apply for the Software Engineering Manager / Principal Full Stack Engineer role at TicketNetwork. With 3+ years of experience building scalable backend systems, RESTful APIs, and cloud-native architectures using C#, Python, and TypeScript, I'm confident I can help lead your new development team to deliver high-impact, client-focused solutions.

At Clearistic Technology, I led projects that improved reliability by 40% through automation, CI/CD, and observability pipelines in Azure. I've mentored engineers, driven cross-team collaboration, and delivered secure, data-driven applications that scale.

TicketNetwork's mission to innovate in the entertainment industry aligns with my passion for building reliable, high-performance systems. I'd welcome the chance to bring my technical leadership and full-stack experience to your growing team.

Best regards,
Joseph Horvath

Software Engineer.

Results-driven Software Engineer with 3+ years of experience designing and scaling data-driven backend systems, ETL pipelines, and distributed data frameworks supporting high-throughput, real-time applications. Skilled in SQL, data modeling, and data warehousing for analytical and operational workloads. Hands-on with Spark, Ray, and modern orchestration tools such as Airflow and Temporal to automate data workflows and ensure end-to-end reliability. Proven ability to deliver production-grade systems using Python, Go, C#, and Java, leveraging Azure Serverless, Terraform, and CI/CD pipelines for scalable cloud deployments. Passionate about data quality, observability, and system performance optimization, with a strong record of cross-functional collaboration, technical mentorship, and driving measurable business impact through scalable, efficient data solutions.

WORK EXPERIENCE

Clearistic Technology

09/2022 - 12/2024

Fullstack Software Developer

Devon, PA

Full-time member of an Agile team, delivering high-quality, scalable web solutions and maintaining robust backend integrations, while collaborating closely with team members and stakeholders. Responsibilities spanned from building modern applications to updating legacy systems, always focused on meeting client needs and improving system performance.

- Designed, developed, and maintained web application modules and RESTful APIs using C#, JavaScript (React, Node.js, TypeScript) to deliver scalable, distributed systems.
- Leveraged both modern and legacy technologies (TCL, Power Apps) to deliver complete end-to-end software solutions.
- Collaborated with Product, QA, and DevOps teams to design and implement high-availability architectures with CI/CD pipelines using GitHub Actions and Bitbucket.
- Built and maintained RESTful APIs and Azure Serverless Functions to automate backend processes, synchronize CRM data, and handle real-time updates between Salesforce and internal systems.
- Partnered with Security and DevOps teams to implement observability standards, telemetry pipelines, and alerting strategies that improved threat visibility and response times.
- Implemented data-driven backend tools with complex search, CRUD operations, and optimized query handling, improving response time and user experience.
- Built Azure Serverless Functions and microservices for automated data synchronization, event processing, and billing updates; improving reliability and reducing manual operations by 40%.
- Documented best practices, API endpoints, and workflows to support maintainable and scalable software solutions.
- Leveraged Azure Cloud Services, Infrastructure as Code (Terraform), and API gateways to deploy and manage cloud-native applications with enhanced scalability and security.
- Developed a database tool with advanced search and sorting to match users with trial experts, integrating related-term weighting and CRUD functionality for employee data management.
- Built and maintained data pipelines for centralized logging and monitoring of distributed systems, integrating Azure Monitor, Application Insights, and Grafana to enhance security observability and forensic capabilities.
- Led cross-functional reviews to align technical implementation with security, SRE, and compliance objectives.
- Partnered with engineering teams to deliver workflow automation tools using Jira APIs and cloud-based automation frameworks, improving release management and communication.
- Designed RESTful API integrations to connect cloud applications (including Atlassian platform products) for automated issue tracking, reporting, and project monitoring.

Nautical Nourish WordPress Consultant

05/2021 – 09/2022
Islip, NY

I helped a growing business by building a helping launch a WordPress site integrated with Shopify, training the March 2025;August 2025 team to manage content independently, and resolving technical issues to ensure a smooth online presence. I later provided IT support for any technical issues that arose, and provided support to their team.

- Provided ongoing technical support, troubleshooting, and content management training for internal teams.
- Enhanced team productivity by introducing Jira workflow automations and custom scripts that accelerated issue resolution time by 25%.
- Optimized website performance and implemented SEO best practices for better search visibility.
- Performed theme customization and template adjustments, applying HTML/CSS and JavaScript changes to match brand designs and responsive breakpoints.

EDUCATION

Bachelor of Science in Computer Science

SUNY Polytechnic Institute of Technology • GPA: 3.33

Utica, New York • 01/2018 – 01/2022

Relevant coursework: Algorithms (CUDA, AI), Operating Systems & Networking (pthreads, multiprocessing), Computer Graphics (rendering), Video Game Design (rapid prototyping), Capstone Project (mobile app, JavaScript), Science, Technology & Human Values (scripting, number systems)

SKILLS

Acceptance Testing, accountability, Action Oriented, adaptability, agile mindset, Analytical thinking, and a team-player mindset., ASP.NET, attention to detail, AWS, Branding, Broadcom, C/C++, Chaos Engineering, Chatbot, collaboration, communication, continuous improvement, critical thinking, Cross-functional Collaboration, Cross-functional Collaboration, cross-functional teamwork, customer-focused mindset, Data Quality & Observability Mindset, Data System, Enterprise, Figma, flexibility, increase brand visibility, initiative., innovation, interpersonal skills, Lifecycles, Liquid, Mentor, mentorship, Mentorship & Technical Leadership, Native, organizational skills, organizational skills, ownership, PHP, Positioning, problem-solving, Shopify / WooCommerce, Software Development Methodologies, Spark, Strong attention to detail, time management

Technical Skills: Agile/Scrum, languages: Python, Angular), API rate limiting, Application Insights, App Services), Azure Monitor, Bitbucket Pipelines), C#, C++, CDN configuration, CI/CD (GitHub Actions, Cloud Infrastructure, Data Modeling & SQL, Docker, ETL Pipeline Development, Event-Driven Architecture, Go, Java, Kubernetes, Kubernetes Observability & Security: Grafana, Linux / Unix systems, load balancing, Machine Learning Integration, Metrics, Microsoft Azure (Serverless Functions, Networking, NoSQL, PostgreSQL, Python, Query Optimization, React, RESTful APIs, Rust (basic), Spark/Ray, SQL, System Design, Terraform, TypeScript, Web Development
