

Kamaliya Bazarbayeva

Software QA Engineer

Los Angeles, CA | 323.717.8802 | kamaliya.test@gmail.com

Professional summary

5 years of experience in software testing and QA Automation. Strong understanding of software QA Methodologies. Experience in Automation and Manual testing of Mobile and Web based apps.

- Comprehensive understanding of Software Developing Life Cycle (SDLC), (STLC) and Defect Life Cycle (DLC), Test strategies and Test plans. Experienced in both methodologies - Agile Scrum and Waterfall.
- Experience in designing and maintaining existing Automation Framework models (BDD/TDD/Hybrid) through the implementation of Page Object Model by utilizing Selenium, Java, Behave.
- Working closely with Product Owners, LOB, Project Managers, Business Analyst, Scrum Masters in Agile environment, attending different ceremonies like Release Planning, Backlog Grooming, Sprint Planning, Review and Retrospective meetings.
- Fluent in locating web elements by using different locators like ID, Name, Link Text, Partial Link Text, XPath, Tag Name, Class, CSS Selector. Efficient in working with dynamic XPath as well experienced in using Continuous Integration (CI/CD) tool like Jenkins.
- Clear understanding of GIT workflow and its architecture, GitHub code repository, branching strategies, tracking source code changes, perform code reviews and engage in team collaborations.
- Hands-on experience with all levels of testing such as SIT, UAT, Regression, Smoke, Functional. Bug-tracking and reports using JIRA and Quality Center
- Experienced in Web Service/API testing using Postman.
- Experience in testing Databases by writing complex SQL queries for data validation and integrity.
- Experience in testing applications that incorporate machine learning(ML) models and AI features.
- Conducting test case reviews, providing project related status reports, coordinating all release planning through all project phases.

Employment history

Automation QA Engineer, Jan 2024 - Present

PranaCoders, Austin, TX

- Designed and maintained Automation framework and test scripts using Selenium WebDriver, Java,
- Worked in a dynamic Agile environment. Attended daily Stand-ups, Sprint Planning, Grooming, Retrospective, Release Planning meetings.
- Developed BDD tests using Gherkin syntax. Worked with developers and QA team to write Behave feature files and develop Selenium test scripts to automate stories. Implemented multi browser testing to ensure cross browser compatibility.
- Created and maintained test scripts for automated API testing using Java. Designed and managed automated test scripts for end-to-end UI and API testing.
- Performed API functionality and regression tests using Postman, validated request/response data.
- Implemented continuous integration and continuous delivery (CI/CD) pipelines using Jenkins.
- Utilized Git for version control, ensuring seamless integration and collaboration.
- Wrote SQL queries for Data Integrity Testing and Back-End Testing.
- Identified and document defects in the ETL process, and work with developers to resolve them.
- Utilized UNIX shell commands for efficient file handling and log validation.
- Performed Defect Tracking and Management and generating automated daily reports by using Jira.
- Ran Functional, Integration, Regression, and System testing according to SDLC.
- Worked closely with the development team to investigate and resolve reported issues.
- Participated in triage defect meetings to resolve or escalating them as necessary, to speed up the testing activities.

Software QA Engineer, Nov 2020 - Dec 2023

PranaCoders, Austin, TX

- Identified and document defects in the ETL process, and work with developers to resolve them.
- Utilized UNIX shell commands for efficient file handling and log validation.
- Performed Defect Tracking and Management and generating automated daily reports by using Jira.
- Ran Functional, Integration, Regression, and System testing according to SDLC.
- Worked closely with the development team to investigate and resolve reported issues.
- Participated in triage defect meetings to resolve or escalating them as necessary, to speed up the testing activities.
- Took a leading role in manual testing, actively involved in creation of detailed test cases and test scenarios for different application modules according to functional requirements and business specifications.
- Involved in Design/requirement review, Plan Owners meetings, test planning, grooming sessions, daily scrum meetings/defect review meetings with Project manager, developers, and Business analysts.
- Worked closely with Development team, BA and QA teams as well as Stakeholders and members of Management Took part in system integration and user acceptance testing on later stages of SDLC.
- Participated in defining strategy for regression testing, test automation and execution coordination with automation team.
- Executed manual and Automation test scripts for Functional, Regression and Smoke testing using Java and Selenium WebDriver
- Identified and reported functional, performance and production defects. Utilized Jira for bug reporting and bug tracking.
- Work closely with developers, data analysts, and business stakeholders to ensure the system meets requirements.
- Utilized knowledge with Mobile testing for Android and iOS applications.
- Performed Rest API testing using Postman tool and SQL.
- Developed SQL queries and used them to verify Back End Testing results.

Education

BS in Engineering, 2006 - 2011

Oil and Gas State University of Tyumen

Advance Manual & Automation Software Testing, Apr 2020 - Sept 2020

Los Altos Testing Software House, Sunnyvale, CA, USA

Selenium Automation online course

Skills

Java, SQL, HTML, CSS, JSON, Jenkins, GIT, GitHub, SQL, Postman, Selenium WebDriver, Cucumber, Jira, Behave, Visual Studio.
