

Sohail Khan Software Engineer

sohail@myworkmails.com | (623) 278-1600 | USA | [LinkedIn](#) | [GitHub](#)

Summary

Results-driven Software Engineer with 3+ years of strong expertise in backend and frontend development using Java Spring Boot and React.js. Skilled in designing scalable microservices, RESTful APIs, and event-driven architectures. Experienced in cloud platforms such as AWS and Azure, containerization with Docker, and CI/CD pipeline automation. Proficient in implementing security best practices, ensuring regulatory compliance, and enhancing system performance. Adept at collaborating across teams to deliver high-quality software solutions that improve user experience and operational efficiency.

Technical Skills

- **Languages & Frameworks:** Java, Spring Boot, React.js, Redux, JavaScript, REST APIs
- **Cloud & DevOps:** AWS (ECS, IAM, KMS), Azure (SQL Database, AKS), Docker, Azure DevOps CI/CD pipelines, Blue-Green Deployments
- **Messaging & Event-Driven Systems:** Kafka, Websocket.io
- **Testing & Quality:** JUnit, Mockito, Jest, Unit & Integration Testing (90% coverage)
- **Security & Compliance:** OAuth2, JWT, Data Encryption (in transit and at rest), Regulatory Compliance (KYC, InfoSec audits)
- **Databases:** Azure SQL, Database Indexing & Partitioning
- **Third-Party Integrations:** Jumio, Onfido

Professional Experience

Software Engineer, Wealthfront

03/2024 – Present | Remote, USA

- Worked on developing a robust client onboarding platform that streamlines Wealthfront's new user registration, KYC, and identity verification processes. Collaborated with product, compliance, and design teams during requirement gathering sessions, reducing account setup time by 40%.
- Designed backend services using Java Spring Boot to handle document processing, identity verification APIs, fraud detection, and secure data storage. Implemented REST APIs, asynchronous workflows with Kafka, and integrated third-party providers like Jumio and Onfido, improving verification throughput by 50%.
- Developed frontend features with React.js, including dynamic forms, real-time field validation, and responsive UI components to guide users smoothly through registration and verification steps, reducing user drop-off rates by 30%.
- Used data encryption protocols in transit and at rest, combined with AWS IAM roles and Key Management Service to ensure sensitive client information is securely handled and compliant with regulatory standards, enhancing data security compliance by 25%.
- Created event-driven microservices workflows to track onboarding progress, update verification statuses, and trigger notifications. Developed unit tests for frontend (Jest) and backend (JUnit, Mockito), improving code coverage to 90% and reducing bugs by 40%.
- Collaborated with DevOps teams to containerize the application using Docker and deploy on AWS ECS. Set up CI/CD pipelines, auto-scaling, and monitoring to ensure 99.95% uptime and seamless user experience during peak onboarding periods.

Associate Software Developer, MassMutual India

01/2020 – 12/2021 | Hyderabad, India

- Developed a client portfolio management system enabling customers to view, track, and manage investment-linked products, collaborating with product, design, and business teams. Conducted agile requirement gathering, delivering real-time portfolio valuation, risk analysis, and personalized investment advice.
- Directed frontend development using React, implementing reusable components, Redux for state management, feature-rich dashboards, interactive charts, filter/search functionalities, and A/B testing. Worked closely with UX and QA teams to optimize user experience and maintain 85% component reuse.
- Designed and optimized Azure SQL database schema for fast portfolio data retrieval and transaction logging, improving query performance by 60%. Team up with DBAs to use indexing and partitioning strategies ensuring scalable and secure data storage.
- Developed backend microservices with Java Spring Boot, including portfolio aggregation, transaction processing, and role-based access control. Integrated REST APIs with external market data providers for real-time updates, enhancing data accuracy by 90%.
- Implemented security best practices including OAuth2 authentication, JWT tokens, and encryption protocols. Coordinated with InfoSec and compliance teams to ensure regulatory adherence and safeguard sensitive financial data, achieving 100% audit compliance.
- Created comprehensive unit and integration tests covering 90% of the codebase. Utilized Azure DevOps pipelines for automated CI/CD, enabling faster release cycles and reducing production bugs by 70%, collaborating closely with QA and DevOps teams.
- Deployed microservices and frontend apps on AKS, working alongside DevOps to automate container orchestration and scaling. Enabled seamless blue-green deployments and 99.9% uptime, supporting business continuity during peak trading hours.

Education

California State University, Fullerton — Fullerton, CA, USA

Master of Science in Computer Science

01/2022 – 12/2024

Gandhi Institute of Technology and Management — Hyderabad, India

Bachelor of Technology in Aerospace Engineering

07/2017 – 06/2021

Certificate

AWS Solutions Architect Associate

AWS Cloud Practitioner

Azure Fundamentals Infrastructure as Code
