Professional Summary

Results-driven Data Analyst skilled in SQL, Python, Power BI, and data visualization with expertise in streamlining ETL workflows and building executive-ready dashboards. Proven track record of reducing reporting time by 40% and optimizing data processes for faster, more accurate insights. Recognized for data storytelling, collaboration, and driving business decisions with clarity and impact.

Work Experience

Data Analyst | Marshall Health Network | Huntington, West Virginia **Feb 2025 – Present**

- Automated interactive healthcare dashboards and KPI reports in Power BI, streamlining reporting processes by 40% & enhancing executive decision support with real-time patient and operational metrics.
- Re-engineered ETL pipelines in AWS Redshift and automated workflows with Airflow, improving data integration, validation and quality of healthcare records while reducing preprocessing time by 30%.
- Partnered with senior leadership and clinical teams to design a standardized healthcare KPI framework, aligning business objectives with analytics and boosting outcomes by 15%.
- Performed advanced statistical modeling and forecasting using SQL and Python to conduct ad-hoc healthcare analysis, identify inefficiencies and drive a 12% increase in cost efficiency.

Data Analyst | LTI Mindtree | Hyderabad, India **Mar 2021 – Dec 2022**

- Developed interactive dashboards and performance reports in Tableau and Power BI, increasing KPI visibility and accelerating reporting cycles by 30%, enabling teams to identify business trend faster.
- Worked on ETL workflows and data pipelines using SQL, Python and Alteryx, automating recurring reports, optimizing data quality and validation and reducing delivery cycles from 3 days to 6 hours.
- Collaborated with data engineering teams to standardize and integrate datasets in snowflake and BigQuery, strengthening data governance, consistency and reporting accuracy by 25%.
- Applied regression, forecasting and A/B testing on large datasets, performing ad-hoc analysis and variance analysis to generate actionable insights that improved efficiency by 18% and supported business decisions.

Technical Skills

Analytics & Programming: SQL (T-SQL, MySQL), Python (Pandas, NumPy, scikit-learn), R, Advanced Excel
Visualization: Power BI (DAX, Power Query), Tableau, Looker Studio; KPI dashboards, data storytelling
Data Engineering & Cloud: ETL/ELT, Airflow, Alteryx, dbt, Snowflake, Redshift, BigQuery, AWS, GCP
Statistics & ML: Hypothesis testing, regression, forecasting, A/B testing, classification

Education

Master of Science in Computer Science | University of North Texas | Denton, TX **December 2024**

- Related Coursework: Data Visualization, ML, Big Data & Data Science, NLP, Information Retrieval, AI

Bachelor of Technology in Computer Science and Engineering | JNTUK | India **August 2022**

- Related Coursework: Probability & Statistics, Data Structures & Algorithms, DBMS, Software Engineering

Certifications

- Google Data Analytics Specialization • Data Analysis with Python and Pandas
