

Somaya Morshed

somayamorshed7@gmail.com | LinkedIn | GitHub | NY | +1(315)-975-8983

Summary

Software Engineer with expertise in **Java, Spring Boot, REST, gRPC, and microservices architecture**. Skilled in cloud-native deployments (**AWS ECS Fargate, Docker**), messaging/streaming (**Kafka, RabbitMQ**), and CI/CD automation (**Jenkins, Maven, Git**). Experienced in observability (**Splunk, New Relic**), performance testing (**JMeter**), and delivering reliable, scalable systems in **Agile environments**. Passionate about building distributed applications and applying **GenAI/LLM integrations (OpenAI, MCP)** to real-world use cases.

Skills

Languages: Java

Backend & APIs: Spring Boot, REST, gRPC

Messaging & Streaming: Apache Kafka, RabbitMQ

Cloud & Containers: AWS (ECS Fargate, S3, IAM, CloudWatch, R53), Docker

CI/CD & DevOps: Jenkins, Git, Maven

Testing & QA: JUnit, Mockito, Karate, JMeter (performance/load testing), SonarQube, Cucumber

Monitoring & Observability: Splunk, New Relic

Project Management & Methodologies: Agile/Scrum, Jira

Experience

Software Engineer – Capital One

New York, NY | October 2022 – Present

- Designed and built scalable **microservices APIs** using **Java Spring Boot** and **gRPC**, enabling **high-performance communication** across distributed banking systems.
- Developed **event-driven workflows with Apache Kafka**, handling **real-time transaction events** and improving **data consistency by 35%** across microservices.
- Deployed containerized applications with **Docker** on **AWS ECS Fargate**, achieving **seamless scalability** and reducing **infrastructure management overhead by 40%**.
- Implemented **CI/CD pipelines in Jenkins**, automating **builds, tests, and deployments**, cutting **release cycle time from 5 days to under 6 hours**.
- Conducted **performance/load testing with JMeter**, identifying bottlenecks and improving **API response times by 30%** under peak workloads.
- Applied **unit and integration testing frameworks (Mockito, Karate)** to ensure **code reliability** and maintain **85%+ test coverage**.
- Leveraged **Splunk and New Relic** for **observability**, enabling **proactive monitoring** and reducing **incident response time by 45%**.
- Collaborated in **Agile Scrum teams** using **Jira**, delivering critical features in **2-week sprints** while ensuring **compliance with financial industry standards**.

Projects

Distributed E-Commerce Microservices Platform

- Built a **Spring Boot microservices system** (user, order, payment, inventory) with **Kafka, RabbitMQ, and gRPC**, reducing latency by **25%**.
- Integrated **OpenAI LLMs (MCP)** for **personalized recommendations** and order insights.
- Applied **Redis caching + JMeter testing** to scale reliably for **50,000+ concurrent users**.

Education

Bangladesh Army International University of Science and Technology, Cumilla, Bangladesh

B.E., Civil Engineering | CGPA: 3.82
