Summary

Full-Stack Software Engineer with experience building scalable, cloud-native platforms and microservices-based APIs using Node.js, Python, and AWS. Engineered serverless applications and CI/CD pipelines that improved system reliability and delivery speed. Delivered user-facing and internal tools in Agile teams, integrating real-time features and observability solutions.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, Java

Database: SQL Server, MySQL, PostgreSQL, NoSQL, MongoDB, OracleDB

Web Technologies: Next.js, React, Vite, Node.js, Express, HTML, CSS

Cloud & DevOps: AWS Services, EC2, S3, Lambda, RDS, VPC, Azure, Docker, Git, Prometheus, Grafana, Kubernetes

WORK EXPERIENCE

Worcester Polytechnic Institute, Worcester, MA, USA | Graduate Assistant

Jan 2024 – Dec 2024

- Mentored 50+ students weekly by answering queries, debugging code, and explaining core concepts in object-oriented programming using Java.
- Evaluated over 70 weekly coding assignments and final projects for correctness and adherence to best practices, providing detailed feedback.

Datacurate Technologies Pvt. Ltd., Mumbai, India | Data Engineer

Sep 2021 – Aug 2023

- Engineered and streamlined RESTful APIs supporting customer engagement workflows, improving efficiency by 20%.
- Architected and scaled ETL pipelines and SQL-based data solutions using Python, SAS, and SQL, achieving a 40% reduction in processing time, 35% faster query runtimes, and enforcing access controls across multiple data domains.
- Designed and implemented automated validation frameworks integrated with CI/CD pipelines, cutting manual QA by 50% and improving data processing reliability.
- Led the end-to-end development of a customer retention propensity model in collaboration with marketing and data teams, increasing retention by 5% and reducing outreach efforts by 30%.

MountBlue, Mumbai, India | Software Engineer Trainee

Jun 2021 – Aug 2021

- Completed training in React, Node.js, and REST APIs, developed modular web apps using Agile and test-driven development.
- Implemented Unit Tests and participated in code reviews to ensure code quality, performance, and adherence to best practices.

CodeSpeedy Technology Pvt. Ltd., Mumbai, India | Software Engineer Intern

May 2020 – Aug 2020

- Built Python scripts and projects showcasing OOP, automation, and core programming concepts.
- Gained experience writing clean code, debugging, and using Git in collaborative environments.

PROJECTS

Auction House - Full-Stack Auction Platform

- Designed and delivered a Full-stack auction platform with real-time bidding for 100+ users, using Next.js/React for the frontend and Node.js for a serverless, microservices-based backend on AWS (API Gateway, Lambda, MySQL), reducing latency by 30%.

Syllablast - Interactive Syllable Puzzle Game

- Developed and deployed a word puzzle game using React and TypeScript with custom board-state management and modular MVC architecture (~2,000 LOC), achieving 90%+ test coverage with Vitest and reducing bugs by 25%.

Real-Time Exchange Rate

- Built a production-ready Full-stack currency exchange app using React, Node.js, Express, and Vite, featuring live rates for 160+ currencies, API security (rate limiting, CORS, environment keys), and 30% faster performance with Axios optimization.

EDUCATION

Worcester Polytechnic Institute

Aug 2023 – May 2025

Master of Science, Computer Science (GPA: 3.9/4.0)

University of Mumbai

Jul 2017 – Jun 2021

Bachelor of Science, Electronics and Telecommunications Engineering
