

Summary:

- Highly skilled Java Full Stack Developer with over 4 years of experience designing, developing, and maintaining robust, scalable, and user-focused applications.
- Proficient in Java SE/EE, Spring Framework (Spring Boot, Spring MVC, Spring Security), and RESTful API development, with a strong focus on Microservices Architecture.
- Expertise in UI technologies such as HTML5, CSS3, JavaScript (ES6+), ReactJS, Redux, AngularJS, and Bootstrap, ensuring responsive and dynamic web interfaces.
- Strong knowledge of databases including MongoDB, Oracle, SQL Server, and MySQL, with hands-on experience in writing complex queries and optimizing performance.
- Adept at utilizing development tools like IntelliJ IDEA, Visual Studio, Eclipse, Git, and Docker for efficient and collaborative development workflows.
- Proven experience in cloud platforms like AWS (EC2, S3, RDS), with knowledge of DevOps tools such as Docker, Kubernetes, and Jenkins for CI/CD implementation.
- Skilled in testing frameworks and tools including JUnit, Jasmine, Selenium, and Postman, ensuring robust and error-free applications.
- Experienced in debugging with tools like Firebug, Chrome DevTools, and IE Tester, and adept at version control using Git, SVN, and Bitbucket.
- Knowledgeable in Agile, Waterfall, and Scrum methodologies, promoting efficient project management and delivery.
- Strong foundation in programming languages such as Java, C, C++, with additional expertise in frameworks like Node.js and AngularJS.
- Committed to delivering high-quality, scalable solutions while collaborating effectively within cross-functional teams to achieve project goals.

Skills:

- **Backend:** Java SE, Java EE, Spring Framework (Spring Boot, Spring MVC, Spring Security, Spring Data), Hibernate, JPA, RESTful APIs, Microservices Architecture, Node.js
- **Frontend:** HTML4/5, CSS3, JavaScript (ES6+), TypeScript, AJAX, JSON, ReactJS, Redux, AngularJS, Bootstrap, Flex, jQuery
- **Database:** MongoDB, Oracle, SQL Server (2000, 2005, 2008), MySQL, Redis
- **Development Tools:** IntelliJ IDEA, Visual Studio, WebStorm, Notepad++, Sublime, Eclipse, Git, Adobe Flash, Docker
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform
- **Testing:** JUnit, Mockito, Selenium, Postman, RestAssured, Jasmine, Load Runner, Cucumber
- **Debugging Tools:** Firebug, IE Tester, Chrome DevTools (Elements Inspector)
- **Frameworks:** Spring Framework, ReactJS, Node.js, AngularJS
- **Version Control Tools:** SVN, Git, Bitbucket, TFVC
- **Operating Systems:** Windows, Linux
- **Methodologies:** Agile, Waterfall, Scrum
- **Other:** Swagger, OpenAPI, Apache Kafka, RabbitMQ, ActiveMQ, WebSocket APIs

Experience:

Ameri Source Inc.

May 2024 – Present

Java Full Stack Developer

- Leading the development of a microservices-based architecture, reducing system coupling by 35% and enabling seamless scalability.
- Built and deployed 20+ responsive web applications using ReactJS, AngularJS, and Bootstrap, improving end-user engagement by 40%.
- Enhanced API performance by 30% through the implementation of caching strategies with Redis and optimized database queries in MySQL.
- Automated CI/CD pipelines using Jenkins, achieving deployment frequency of 3 times per week, reducing manual effort by 50%.
- Implemented robust security measures with Spring Security and JWT, ensuring compliance with 100% of security policies.
- Collaborated with a team of 12 developers in an Agile environment, ensuring timely delivery of milestones and maintaining 100% sprint completion rate.
- Performed functional and integration testing with Selenium, reducing defect leakage by 20% in production.
- Managed version control with Git and Bitbucket, overseeing 50+ monthly code merges.
- Provided technical mentorship to 4 junior developers, enabling the team to meet project deadlines ahead of schedule by 15%.
- Monitored and resolved application performance issues using ELK Stack and Prometheus, maintaining system uptime of 99.9%.

YNR Infotech

April 2018 – September 2021

Software Developer

- Designed and developed over 15+ RESTful APIs using Spring Boot and Java EE to streamline backend services, reducing latency by 20%.

- Developed dynamic and responsive UI components with HTML5, CSS3, JavaScript, ReactJS, and Redux, improving user satisfaction by 25%.
- Integrated MongoDB and Oracle databases, optimized queries, and improved data retrieval performance by 30%.
- Collaborated with cross-functional teams to implement Agile Scrum methodology, resulting in on-time delivery of 90% of projects.
- Utilized Git for version control and managed project repositories, ensuring collaboration among 10+ team members.
- Automated testing with JUnit and Jasmine, achieving a 95% defect detection rate in pre-production environments.
- Deployed AWS EC2 and S3 applications, reducing infrastructure costs by 15% using efficient configurations.
- Debugged and resolved 50+ issues using tools like Chrome DevTools and Firebug, minimizing downtime by 40%.
- Conducted training sessions for 5+ junior developers, improving team productivity by 20%.

Education:

- **Master's in information systems technology**, Wilmington University, April 2024 (GPA: 3.7)
- **Bachelor of Technology in Computer Science**, K L University, India, 2019 (GPA: 7.95)

Certification:

- **Microsoft Certified: Power BI Data Analyst**
- **Java SE 11 (Udemy)**
- **Power BI (Test Dome)**
