

SOURABH CHAUDHARI

Charlotte, NC | 803-752-0397 | sourabh.c@career-techmail.com | [linkedin.com/in/sourabh-Chaudhari/](https://www.linkedin.com/in/sourabh-Chaudhari/) | [github](https://github.com)

SUMMARY

Experienced Software Engineer with 4+ years of expertise in scalable, distributed applications using Python, Node.js, and Spring Boot. Skilled in designing RESTful APIs, optimizing databases (SQL/NoSQL), and implementing CI/CD pipelines with Docker and Kubernetes. Proficient in leveraging AWS to enhance scalability, security, and system reliability.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C/C++, PHP, Bash, SQL, React, HTML, CSS

Frameworks/ Libraries: Express, Spring Boot, Django, Flask, Node.js, Rabbit MQ, REST, GraphQL

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, CloudFormation), GCP, Azure

DevOps Tools: Docker, Kubernetes, Jenkins, Terraform, Ansible, Prometheus, Grafana

Test framework: Pytest, Jest, Mocha, Maven, Gradle

Databases: MySQL, PostgreSQL, MongoDB, Redis

Tools: Git, GitLab, Visual Studio Code, Jupyter Notebook, Postman, JIRA

EDUCATION

Master of Science in Computer Science

Aug 2022 – May 2024

University of North Carolina at Charlotte, NC, USA

Bachelor of Engineering in Computer Science

July 2014 – June 2018

Government College of Engineering Aurangabad, India

EXPERIENCE

Sports Excitement LLC, New York, USA

Jan 2024 - Current

Software Engineer

- Designed and developed a full-stack web application using Node.js (backend) and React (frontend), enabling seamless connections between sports enthusiasts and professional mentors.
- Optimized RESTful APIs with Express.js and PostgreSQL, enhancing database performance and scalability by 25%.
- Designed and optimized PostgreSQL schemas, ensuring efficient queries and scalability for large datasets.
- Implemented distributed caching mechanisms using Redis and Memcached to reduce API response times by 50%, ensuring high performance and scalability under heavy traffic.
- Deployed the application on AWS using EC2 and S3, containerized with Docker, and automated CI/CD pipelines with Jenkins, ensuring consistent and efficient deployment processes, cutting deployment time by 30%.
- Integrated OAuth2.0 for secure user authentication and Apache Kafka for real-time notifications, enhancing system responsiveness and boosting user engagement by 20%.
- Guided and supported junior developers in API development and implementing CI/CD pipelines

NVIDIA Corporation, India

Aug 2018 - July 2022

Software Engineer

- Developed a secure and scalable real-time chat application for internal team communication using Spring Boot, WebSocket, and PostgreSQL, ensuring seamless messaging and robust data storage.
- Implemented user authentication with Spring Security, managed dependencies with Maven and Gradle, and deployed the application on Kubernetes for high availability and scalability.
- Built and integrated REST APIs with a Kibana dashboard to monitor performance metrics, enabling real-time insights and data-driven decision-making, improving operational efficiency by 25%.
- Automated CI/CD workflows using Python, Bash, and Jenkins, streamlining testing and reducing manual effort.
- Developed YAML configuration files for CI/CD pipelines in Jenkins, enabling seamless build, test, and deployment processes.
- Migrated legacy data from XML to JSON, modernizing backend services for improved data accessibility.
- Containerized deployments with Docker, improving scalability and reducing deployment time by 30%.
- Collaborated in Agile Scrum teams, contributing to backend optimization and fostering cross-functional coordination.

CERTIFICATION

- AWS Cloud Practitioner Certification | Udemy
- Running Jenkins on AWS | LinkedIn
- AWS Solution Architect Associate Certification | Udemy
- Fundamentals of Deep Learning | NVIDIA
