

SUMMARY

- Around 4+ years of professional experience in software analysis, design, development, implementation, and Testing of web and distributed multi-tier applications using Java and J2EE technologies.
- Extensive work Experience and Knowledge of all phases of Software development life cycle (SDLC), Which includes User Interaction, Business Analysis and Modeling, Design/Architecture, Development, Integration, Documentation, Coding, Testing, Deployment and developing applications using Agile and SCRUM methodologies.
- Experience designing Front-End Applications using HTML5, CSS3, Material Design, Bootstrap, AngularJS, JavaScript, AJAX, JSP, JSTL, NPM, Grunt, and Bootstrap.
- Expert in writing SQL queries, using the Hibernate framework with Spring ORM, Spring Boot, Microservices, and interaction with the RDBMS.
- Extensive programming experience in developing web-based applications and Client-Server technologies using Java 17/11/8/7, Servlets, JSP, JDBC, Java Beans, JSP, JSF, Struts, Spring, Hibernate, EJB, JMS, and Web Services (Rest, SOAP).
- Proficient in implementing Spring frameworks like Spring MVC, Spring IOC, Spring REST, Spring AOP, Spring transaction Management, Spring Data, Spring DAO, Spring Batch, Spring Security, and Spring Boot.
- Experience in implementing REST API/ Microservices using Spring Boot.
- Built and consumed RESTful APIs using Ruby on Rails, integrating third-party APIs where necessary.
- Developing Microservices using Spring Boot that create, update, delete, and retrieve assignment information from the backend.
- Developed and maintained user-friendly web applications using the Angular framework, ensuring seamless user experience and efficient data management.
- Implemented responsive designs and interactive features, leveraging Angular components, directives, and services.
- Skilled in web authentication concepts (SAML, OIDC, OAuth2), UI/UX prototyping using Figma, and Python scripting for automation.
- Proficient in Java, JDBC, PL/SQL, Servlets, XML, Java-API, and Spring for designing and developing web-based applications.
- Hands on experience in building Enterprise Applications and Distributed Systems using technologies such as Core Java, J2EE (Servlets, JSP, JSF, EJB, Hibernate, Spring, Struts, JDBC, JMS) and XML.
- Designed and developed RESTful web services using Spring MVC, Spring Boot, Web Services, JSON, Log4j, RESTful, PL/SQL, and Maven.
- Experienced in Webservices like HTTP, and REST APIs, Restful Services.
- Architected and Implemented cloud-based solutions on AWS, including EC2 instances for running Java applications, S3 for storing data, and RDS for relational database management. Integrated Python scripts for automation and data analysis within the AWS environment.
- Automated Deployment Workflows with Python scripts and AWS services, resulting in streamlined application deployment and reduced manual intervention.
- Migrating existing applications into REST-based Microservices to provide all the CRUD capabilities using SpringBoot.
- Utilized Spring Data JPA for database access, simplifying CRUD operations and enhancing data management efficiency.
- Skilled in writing Lambda functions in Python, Node.js, or Java, depending on project requirements.
- Strong SQL skills for querying, manipulating, and managing data across different databases.
- Used Angular Resource and HTTP services to retrieve the data from the server and to display the content on the browser and took part in creating custom reusable components.
- Developed and maintained Kafka-based solutions for real-time data processing and streaming applications.
- Involved in developing HTML and JavaScript for client-side presentation and, data validation within the forms.
- Strong experience in Object Oriented Analysis in developing server side and front-end framework using J2EE design patterns and AngularJS.
- Implemented messaging systems using Kafka to ensure reliable communication between distributed services.
- Skilled in Java, SQL and NoSQL programming languages for software development.
- Implemented and enhanced CRUD operations for the applications using the MVC (Model View Controller) architecture of Rails 4 frameworks.
- Proficient in cloud architecture and Agile methodologies, optimizing processes using CI/CD and TDD.
- Familiar with Git, Jenkins, and Docker for development and CI/CD processes and developed CI/CD pipelines in OpenShift, leveraging Source-to-Image (S2I) and Jenkins for automated deployments.
- Design and develop logging components using Apache Log4J to log messages and errors.

TECHNICAL SKILLS

Languages	Java 5/6/7/8/11/17, C/C++, XML, UML, SQL, PL/SQL2.3/2.1, Shell Scripting, Python, Python Scripting
J2EE Technologies	Servlets, JSP, JDBC, EJB, AWT, Strings, Multi-Threading, Arrays, Java Networking
Web Technologies	UI/UX, NodeJS, ReactJS, AngularJS, Angular6/7, Groovy, JavaScript, jQuery, Karma, Jasmine, Ext-JS, XML, JSON, CSS3, HTML5, XHTML, Bootstrap, Perl, AJAX, DHTML.
Frameworks	Spring 3. x/ 2.x, Spring Boot, Spring MVC, Hibernate, Apache Flink, Apache Beam, PySpark.
Application/Web Servers	Oracle/BEA, Weblogic8.1/9.1/10.3, Apache Kafka, IBM Web Sphere8.x/7.x/6.x/5.x, JBoss4.x/3.x, Tomcat 5.x/6.x/7.x/8.x
Cloud Services	AWS, (EC2, RDS, S3, Lambda, ELB, EBS),
Other Tools	TOAD, Hudson, Log4J, Grunt, Selenium, Chef Habitat, IBM Operational Decision Manager, Splunk, AppDynamics, Datadog, Docker, Kubernetes, OIDC, OAuth2, IAM, Kibana, Elasticsearch, Elastic path Logstash.
Message Brokers	Apache Kafka, RabbitMQ, ActiveMQ and IBM MQ
Web Services	SOAP UI, SOAP, REST, REST API
IDE Tools	Eclipse, NetBeans 8.0.2, Spring Tool Suite (STS) 3.8.3
NoSQL Databases	Mongo DB, Cassandra, PostgreSQL
Databases	Oracle 8i/9i/10g/11g/12c, SQL server, MySQL, DB2, H2
Operating Systems	Windows, Linux, Unix,
Methodologies	Agile, Scrum, RUP, TDD, OOAD, SDLC

CERTIFICATIONS

- TCS Explore
- CI/CD for software developer – Coursera
- Freedom with Artificial Intelligence Masterclass
- ChatGPT Certification Course

WORK EXPERIENCE

CVS Health

Irving, Tx

Software Engineer Intern

May 2024 – Dec 2024

- Implemented a continuous deployment system using Jenkins, AWS Code Deploy, OpsWorks, and Packer to automate the deployment of Java applications.
- Developed robust and scalable applications using Java SE/EE, leveraging core Java concepts and OOP principles to ensure maintainable code.
- Designed and implemented multithreaded applications utilizing Java concurrency utilities (Executors, Locks, Synchronization) for enhanced performance and responsiveness.
- Worked on spring framework applications like Spring Core, Spring AOP, Spring MVC, Spring Batch, Spring Security, and Spring Boot and integrated Microservices into the existing system architecture.
- Designed and developed a custom, single-page, responsive Web Application on the front end using Angular 9.
- Designed and implemented RESTful APIs with Spring Boot, ensuring seamless communication between frontend and backend applications.
- Built a microservices-based architecture with Node.js to handle different business logic separately, improving maintainability and scalability.
- Integrated Django templates with front-end technologies (HTML, CSS, JavaScript) for rendering dynamic content in web pages.
- Integrated Ruby on Rails and Node.js APIs to enable seamless communication between different parts of a web application.
- Deployed Spring Boot applications in Docker containers, streamlining the development and deployment process. Designed pages using Angular 9 Validations, Modules, Events, Expressions, Directives, Controllers Filters.

- Lead the end-to-end development of web applications, from conceptualization to deployment, utilizing Python for backend logic and Angular for frontend interfaces.
- Used Hibernate as an ORM to map Java classes to database tables. I was involved in setting up configuration properties, ORM mapping, and CRUD operations with the database.
- Utilized the Java Concurrency API (java.util.concurrent) for managing thread pools, using ExecutorService to optimize resource utilization. Implemented SQL stored procedures and data warehousing solutions to support ETL processes and business intelligence initiatives, enhancing decision-making capabilities.
- Developed and configured Jasmine test cases to test the Angular controllers for UI in the Jasmine framework in WebStorm IDE. Also, used Karma as a test runner to integrate with the browser. Exposed data to other applications on API Endpoints using REST services.
- Used SOAP UI, Postman, REST, and Mockito to test the web services.
- Involved in capacity planning, performance tuning, and monitoring of JVM.
- Migrated existing business applications to an Amazon cloud service (AWS)- based environment and deployed applications using Amazon Web Services.
- Developed Angular services and controllers, creating models for two-way data binding and designing user interfaces with Angular UI components (tabs, grids, dropdowns).
- Configured routing using AngularJS and developed reusable UI components through Angular directives.
- Deployed real-time analytics pipelines using Kafka Streams to process and analyze large volumes of data.
- Integrated Kafka for enhanced data processing capabilities.
- Integrated AWS Lambda with third-party APIs and services to enhance functionality and streamline workflows.
- Managed AWS EC2 instances and RDS databases for a scalable web application, improving performance and reducing latency. Configured S3 for application storage.
- Created microservices and RESTful APIs using Spring Boot, simplifying configuration and deployment with embedded servers and auto-configuration.
- Designed and developed RESTful web services with Spring MVC, ensuring adherence to best practices and standards for API design.
- Wrote unit tests for multithreaded applications using tools like JUnit and Mockito, ensuring correctness and reliability under concurrent conditions.
- Utilized version control systems (Git) for collaborative development, managing code changes, and maintaining project history.

TATA CONSULTANCY SERVICES

Hyderabad, India

System Engineer

Jun 2019 – Feb 2022

- Spearheaded daily work gathering and distribution within the team, ensuring seamless collaboration and task management while following Agile methodologies and Scrum practices for iterative software improvement.
- Maintained daily communication with clients regarding work progress, ensuring alignment and satisfaction with project deliverables.
- Designed and developed dynamic web applications using PHP for server-side scripting, integrating email functionality for user notifications and password resets.
- Designed and developed RESTful web services using Spring MVC and Spring Boot, utilizing JSON for data interchange and ensuring best practices for API design.
- Wrote unit and integration tests using Django's test framework and Pytest, achieving 90% test coverage and improving application reliability.
- Collaborated with cross-functional teams to design and implement ETL pipelines and data engineering solutions, optimizing data workflows and improving data quality.
- Extensively worked on Spring bean wiring, Spring DAO, and Spring AOP modules and implemented Spring AOP in exception handling, which reduces the development time for handling exceptions.
- Used Hibernate as an ORM tool to map the database tables and write DAOs and POJOs to integrate with Spring Framework.
- Used Angular 4 to parse the data fetched from APIs and used backbone.js to develop an application to perform CRUD operations on the database server.
- Used Spring Data JPA to access the Oracle database and mapped different POJO classes to the database tables.
- Architected cloud solutions utilizing AWS services (EC2, RDS, S3) and implemented Infrastructure as Code with AWS CloudFormation for automated resource provisioning and management.
- Developed and deployed applications using Java Spring Boot hosted on AWS EC2 and S3 with CI/CD pipelines integrated through AWS CodePipeline and Jenkins.
- Integrated JavaScript frameworks (React, Angular) with HTML5 and CSS3 for dynamic, interactive web applications, using Angular Resource and HTTP services for data retrieval and display.

- Managed Kafka topics and partitions to optimize data throughput, ensuring scalability, high availability, and fault tolerance through redundancy and replication strategies.
- Proficient in relational database management systems (MySQL, PostgreSQL, Oracle, Microsoft SQL Server), with expertise in SQL for querying, data manipulation, and database management.
- Managed daily stories using Jira and Confluence, facilitating transparent task tracking and communication within the team.
- Provided supervision and leadership to a team of 3 junior software engineers during the development of robust upgrade versions of the company's software applications.
- Implemented CI/CD practices to streamline the development process and enhance software delivery efficiency, deploying changes to production and UAT environments.

NSRC- Nano Scientific Research Center

India

Application Engineer

Dec 2018 – May 2019

- Used Core java and object-oriented concepts in implementation.
- Developed, debugged, and deployed applications using IntelliJ IDEA and GIT.
- Deployed applications in a Linux environment and writing UNIX shell scripts.
- Used EJB Session Beans and Entity Beans to develop business services and persistence.
- Developed distributed Java components using EJB and JPA for persistence.
- Tested API's using tools such as SOAP UI, OTX, and Oracle database, enhancing proficiency in software development and testing.
- Deployed changes to production or UAT environments, possessing knowledge of installation processes and ensuring seamless implementation.
- Developed UNIT test cases using JUnit and configured them through Maven plugins to be part of continuous integration.
- Good at designing Design Documents, Unit Test Case, Integration Test Case, Integration Test Plan documents and estimating the assigning tasks.
