SUMMARY

Results-driven **Software Developer with 3+ years** of experience in **Java, Python, and JavaScript**, along with frameworks like **Spring Boot, Angular, and React**. Skilled in cloud computing (**AWS, Azure, GCP**), **microservices** architecture, and automation to enhance system performance. Experienced in banking and financial solutions, optimizing workflows, and implementing secure authentication (**OAuth2, JWT**). Passionate about scalable software development, mentoring teams, and driving business efficiency.

EDUCATION

Bachelors in Computer Information technology sciences | University of Massachusetts Dartmouth, MA (May 2022)

SKILLS

Programming languages: Java, JavaScript, Python, SQL, C++

Frameworks/OS: Node.js, Windows, Linux, SpringMVC, Spring Boot, Hibernate, JSF, ReactJS, Angular, Django, Flask, OutSystems

Database: SQL Server, MySQL, MongoDB

Web/Cloud Technologies: HTML, CSS, JavaScript, Bootstrap, JQuery, Ajax, JSON, AWS, Azure, GCP

Tools/ Libraries: UML, Maven, Gradle, JUnit, Docker, Kubernetes, Jenkins, Terraform, Kafka, GitHub

WORK EXPERIENCE

Doran Jones, NY – Senior Software Developer (Oct 2024 -Mar2025)

- Migrated legacy banking apps to microservices with **Java & Spring Boot**, improving system reliability and cutting server costs by 25%.
- Developed robust **APIs** & integrated **AWS services**, ensuring 99.9% uptime, 20% lower latency, and scalable data analytics.
- Optimized financial reporting with **SQL** & serverless solutions, enhancing real-time analytics, fault tolerance, and code quality.

Tech Stacks: **Automation Testing, Agile, Jenkins, JAVA, Spring Boot, Angular, Visual Studio, JIRA, GIT, SQL**

Extreme Reach,NY – Software Developer (Sept 2023 - Oct 2024)

- Led migration of legacy banking apps to **microservices (Java, Spring Boot)**, improving system reliability and reducing server costs by 25%.
- Developed high-volume APIs for transaction monitoring, ensuring 99.9% uptime and 20% lower latency through AWS integration.
- Optimized financial reporting with complex **SQL queries** & stored procedures, enhancing real-time analytics and scalability.

Tech Stacks: **Behavior-Driven Testing, OutSystems, AWS, HTML, CSS, JAVA, Spring Boot, Microservices, SQL, Eclipse**

Amazon, MA – Software Developer/Scrum Master (Jun 2022 - Aug 2023)

- Developed the **Alexa wake word engine** with a team of 5 engineers, improving wake **word detection** accuracy by 40% and enhancing user experience on millions of Echo devices.
- Integrated **AWS** machine learning engine, reducing deployment time by 30%, improving scalability and reliability, and contributed to a modularized data framework, cutting real-time processing time by 50%.
- Led bug triage, **debugging**, and code reviews, reducing open bugs by 25%, improving code quality by 40%, and ensuring a stable, high-performing system.

Tech Stacks: **CPP, AWS , Machine Learning, Python, Flask, Agile, Visual Studio**

Activ Surgical, MA – Software Developer/Scrum Master (Aug 2021 - June 2022)

- Led dual role as Scrum Master & Software Developer for a class project (*Auto Calibration for Surgical Laparoscopic System*), ensuring on-time & in-scope delivery using **Agile methodologies**.
- Developed complex software solutions in **Python**, implementing Mutual-Based & **ECC alignment** techniques with image processing & transformation for surgical applications.
- Conducted thorough **testing & debugging**, ensuring software reliability, and maintained detailed documentation for future reference.

Tech Stack: **C++, AWS, Machine Learning, Python, Flask, Agile, Visual Studio**

PROJECTS

Automobile Insurance Database, UMASS – Dartmouth, MA – Software Developer (Sept 2021 - Dec 2021)

- Designed user interface and developed SQL-based database models to perform queries & generate reports. Assisted in automation testing & SDLC transition.

Real-Time Messaging Application, UMASS – Dartmouth, MA – Software Developer (Sept 2021 - Dec 2021)

- Developed WebSocket-based messaging, improving delivery speed by 50%, and integrated AWS for scalable backend hosting with 100% data reliability.

Realistic Projectile Motion Simulation, UMASS – Dartmouth, MA – Software Developer (Jan 2021 - May 2021)

- Developed Python-based simulation using root-finding methods to model projectile motion with air resistance.
