

Sowmya Potu | Full Stack Java Developer

+1 (660) 528-3092 | Sowmyapotu1012@gmail.com | <https://www.linkedin.com/in/sowmya-potu-70815117b/>

SUMMARY

Dynamic Full Stack Java Developer with 3+ years of professional experience building **enterprise-grade, cloud-native applications** using **Java, Spring Boot, React, Angular, Vue.js, Docker, and Kubernetes**. Strong expertise in **microservices architecture, RESTful APIs, and database optimization**, delivering **30–40% improvements in performance and scalability** across fintech and enterprise domains. Adept at **implementing CI/CD pipelines (Jenkins, GitHub Actions, GitLab CI/CD, Terraform)** to achieve **70% faster release cycles** and reduce deployment errors. Skilled in **AWS cloud services (EC2, S3, Lambda), Agile/Scrum delivery, and cross-functional collaboration**, consistently meeting **100% of sprint goals**. Recognized for combining **business logic with modern UI/UX** to deliver robust, end-to-end solutions.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL

Backend Frameworks & Tools: Spring Boot, Spring Security, Spring Cloud, Hibernate, JPA, RESTful & SOAP APIs, JWT, OAuth 2.0, RBAC

Frontend Technologies: React.js, Redux Toolkit, Angular (12+), Vue.js, Tailwind CSS, HTML5, CSS3, Bootstrap

Databases: MySQL, Oracle, Redis

Cloud & Infrastructure: AWS (EC2, S3, Lambda), Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD

DevOps & Automation: CI/CD Pipelines, Jenkins X, Git, GitHub, GitLab, Shell Scripting

Testing & Quality: JUnit, Mockito, SonarQube, Swagger/OpenAPI

Development Practices: Agile (Scrum), Test-Driven Development, Microservices Architecture, Event-Driven Design, Secure Coding Standards

PROFESSIONAL EXPERIENCE

Full Java Stack Developer | Stripe, USA – Remote

Jan 2025 – Present

- Designed and deployed **event-driven microservices** using Java (Spring Boot), Docker, and Kubernetes, improving **platform scalability and reliability by 40%**.
- Developed and optimized **secure REST APIs** (JWT, OAuth 2.0, RBAC), ensuring **compliance with enterprise-grade authentication and authorization standards**.
- Implemented advanced **database optimization strategies** (indexing, caching, query tuning) in Oracle, boosting retrieval speed by **35% during peak loads**.
- Built **interactive dashboards** with React.js, Redux Toolkit, and Tailwind CSS, improving client engagement and **reducing bug reports by 20%**.
- Automated multi-region AWS deployments with **Terraform**, cutting provisioning time by **70%** and enhancing disaster recovery capabilities.
- Created **robust CI/CD pipelines** with GitHub Actions and Jenkins X, enabling **zero-downtime releases** and reducing deployment rollback frequency by **90%**.

Full Stack Java Developer | Virtusa, India

May 2022 – Dec 2023

- Engineered **microservices-based applications** with Java, Spring Boot, and Spring Security, reducing **system downtime by 30%**.
- Developed and integrated **REST APIs** for cross-service communication, cutting latency-related issues by **40%**.
- Partnered with frontend teams (Angular 12+, Vue.js) to deliver **responsive and high-performance UIs**, improving **page load times by 20%**.
- Implemented **caching and transaction management** in MySQL/Oracle/Redis, improving query performance by **35%**.
- Designed **CI/CD pipelines (GitLab CI/CD, Jenkins, Docker, Kubernetes)** to support weekly production rollouts with **zero-downtime deployments**.
- Performed code reviews, enforced coding standards, and improved test automation (JUnit, Mockito, SonarQube), leading to a **25% drop in production bugs**.
- Collaborated in **Agile teams**, achieving **95% on-time delivery** of features and improving sprint velocity by **20%**.

Java Developer | HCL Tech, India

Jan 2021 – Apr 2022

- Contributed to the development of **enterprise-grade applications** using Java, Spring Boot, and Spring Cloud, reducing technical debt by **25%**.
- Designed and deployed **RESTful web services and SOAP APIs** to support high-volume transactions with **99.9% system uptime**.
- Migrated monolithic applications to **microservices** with Docker and Kubernetes, reducing deployment time by **30%** and improving scalability.
- Integrated **AWS services (EC2, S3, Lambda)** into Java applications, reducing infrastructure costs by **15%**.
- Optimized SQL queries via indexing and partitioning, cutting **data retrieval latency by 40%**.
- Implemented **TDD practices** with JUnit and Mockito, achieving **90% unit test coverage** and reducing post-release defects.
- Worked closely with business and QA teams to ensure **high-quality, secure, and scalable deliverables**.

EDUCATION

Northwest Missouri State University, MO

Jan 2024 – May 2025

Master of Science in Computer Science (GPA: 4/4)

Gudlavalleru Engineering College, India

Jun 2018 – May 2022

Bachelor of Science in Computer Science

PROJECT

Online Banking System

- Built a **secure online banking application** with Spring Boot & Spring Security, implementing **JWT/OAuth2 authentication** and **RBAC**.
- Developed **RESTful APIs** for transactions and account management, achieving **99.9% uptime** and reducing latency by **25%**.
- Created a responsive **front-end dashboard** using **React.js** and **Tailwind CSS**, improving user experience by **30%**.
- Automated deployments with Jenkins, Docker, and Kubernetes on **AWS**, enabling **scalable, zero-downtime releases**.

E-Commerce Web Application

- Built a **scalable e-commerce platform** with Spring Boot (backend) and React.js (frontend), integrating **JWT authentication** and a secure payment gateway to support **real-time transactions**.
- Deployed on **AWS (EC2, RDS, S3) with Docker & Kubernetes**, and automated CI/CD pipelines with Jenkins, achieving **60% faster releases**.
