

SPARSH SANGHAVI

(617)238-8536 • sanghavi.sp@northeastern.edu • linkedin.com/in/sparsh-sanghavi/

Education

Northeastern University, Boston, MA

GPA: 3.7/4.0

Master of Science, Computer Software Engineering

May 2025

- **Student Ambassador | Adobe Systems | Northeastern University**

- **Relevant Courses:** OOP (Java), Data Science (Python), Algorithms, Program Structure, DevOps, Operating Systems

Gujarat Technological University, Ahmedabad, India

GPA: 3.7/4.0

Bachelor of Engineering, Information and Communication Engineering

May 2023

- **Teaching Assistant | Object Oriented Programming (JAVA) | L.J.I.E.T**

- **Relevant Courses:** Software Engineering, Data Structures, Analysis and design of algorithms, Computer Science

Technical Skills

Programming Languages: Java, Python, SQL, C/C++/C#, JavaScript, HTML/CSS, Go, Shell Scripting.

Frameworks: Spring, Spring Boot, Hibernate, Angular, React, Node.js.

Tools/ Technology: Git, Docker, Jira, Tableau, Power BI, Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP).

Databases: MySQL, PostgreSQL, Snowflake, Oracle, MongoDB (SQL & NoSQL).

Professional Experience

Software Engineer (Intern) | Findways

January 2025 – Present

- Built and deployed a **scalable** communication platform for businesses using **Spring Boot (Java)** and **React/React Native**, enabling real-time outreach, live support and increasing client response rates by 40%.
- Designed a real-time campaign and messaging engine with **WebHook**, **WebSocket**, and WhatsApp Business API integration, enabling 1,000+ concurrent conversations and automated customer outreach.
- Designed and containerized **microservices** with **Docker**-built **JWT authentication** and **PostgreSQL** for user data management; deployed them on **AWS EKS** via **Terraform** and **Kubernetes** to deliver scalable infrastructure.
- Configured **CI/CD pipelines** by integrating **GitHub** with **AWS CodeBuild** and **CodePipeline**, automating **unit** and **integration tests**, builds, and deployments, with secure handling of JWT secrets and SQL credentials.

Software Engineer (Intern) | Ordex Technology Solutions

January 2023 - May 2023

- Developed **Spring Boot microservices** to integrate BambooHR and Xero, automating payroll and HR operations, and reducing manual data entry effort by 20%.
- Designed and optimized **RESTful APIs** and backend logic in **Java**, significantly improving HR data sync speed and reducing latency by 35%.
- Enhanced backend performance by profiling and **optimizing SQL queries**, resolving key bottlenecks and boosting data throughput and team productivity.
- Built a robust **JUnit test suite** that increase code coverage by 40%, enabling early bug detection and reducing post-deployment issues.

Software Engineer (Intern) | Softvan Pvt. Ltd.

December 2021 - December 2022

- Developed and deployed a student management system using **Java** and **React** on **AWS EC2**, achieving 98.9% uptime and improving academic record accessibility.
- Optimized **MySQL** queries and indexing, reducing data retrieval time by 25% for high-volume student records.
- Implemented microservices architecture, enhancing modularity and improving system scalability by 40% during peak usage.
- Automated **CI/CD pipelines** using **GitHub Actions**, accelerating release cycles and streamlining deployments across environments.

Projects

E-Learning Management Platform | Java, Spring Boot, MySQL, HTML5/CSS3, JavaScript

May 2025

- Built a scalable LMS with role-based auth and Gmail API, automating user comms and boosting engagement.
- Achieved 90% JUnit test coverage, improving system reliability and reducing regressions.

Student Accommodation Finder | Java, Spring-Boot, React, PostgreSQL, AWS, Jenkins, Docker

August 2024

- Built a secure, scalable housing platform with JWT-auth REST APIs, PostgreSQL RDS, and S3 integration.
- Deployed containerized app on AWS with Auto Scaling, ensuring high availability and performance.

Online Book Store Management | ETL Pipeline, Power BI, Azure Data Studio, MS SQL Server

April 2024

- Streamlined data workflows with SQL procedures and triggers for real-time inventory accuracy.
- Designed Power BI dashboards to visualize sales trends and drive data-backed decisions.
