SUMMARY

Entry-level Cyber security professional with a Google Cyber security Certificate and hands-on training in tools like SIEM, Linux, and Python. Skilled in identifying threats, monitoring systems, and responding to incidents using industry best practices. Familiar with real-world cyber security scenarios through lab work and simulations, including log analysis, vulnerability scanning, and basic scripting for automation. Eager to apply knowledge in a support or analyst role to help protect organizational assets and strengthen overall security posture.

EXPERIENCE

Inventory Production Specialist

2021 - Present

[Cars.com](#)

Chicago, United States

Managed and formatted vehicle inventory data for dealership websites, ensuring accuracy, smooth integration, and ongoing support through cross-team coordination and client communication.

- Managed and processed vehicle inventory data for dealer websites, ensuring accuracy, compliance, and timely integration across platforms. Collaborated with internal teams and clients to resolve data issues, validate feeds, and support pre - and post-launch inventory setup. Utilized tools like IMS and CMS to monitor inventory quality and streamline production workflows.

Ring Solution Assistant

2018 - 2021

[Ring](#)

Malvern, United States

Served as a Level 2 Assistant, providing advanced support, resolving escalated issues, and ensuring efficient operations through strong problem-solving and communication skills.

- Educated customers on Ring's home security ecosystem by providing in-store product demonstrations, answering technical questions, and offering tailored security solutions. Collaborated with retail staff to optimize product displays, boost engagement, and drive sales while delivering exceptional customer experiences and maintaining expert knowledge of Ring devices and services.

IT

2016 - 2018

[Toshiba](#)

King of Prussia, United States

Assembled, tested, and troubleshooted Toshiba printers and scanners on the production line, ensuring quality control, proper functionality, and adherence to manufacturing specifications.

- Identified and resolved hardware issues during and after assembly
- Conducted diagnostic testing to ensure all units met functionality and performance requirements
- Assembled and configured printers and scanners according to technical specifications and quality standards
- Performed firmware updates and software installations when needed

EDUCATION

Bachelor's in Computer Science

2022 - Present

[Harrisburg University](#)

Harrisburg, United States

STRENGTHS

☆ Technical Proficiency

Gained hands-on experience with hardware assembly, diagnostic tools, inventory systems, and smart home technology.

⚡ Problem Solving & Troubleshooting

Resolved hardware issues at Toshiba, escalated support tasks at Ring, and corrected data discrepancies at Dealer Inspire.

👤 Team Collaboration

Worked cross-functionally with sales associates, developers, and production teams to meet shared goals and deadlines.

KEY ACHIEVEMENTS

🏆 Customer Satisfaction

Recognized for delivering tailored product recommendations and outstanding customer service.

🔧 Problem Resolution:

Diagnosed and corrected complex data feed issues, improving inventory quality and reducing client escalations.

★ Operational Efficiency

Maintained strong daily output while ensuring compliance with safety and technical guidelines.

INTERESTS

⚙️ Ethical Hacking

Passionate about understanding the mindset of hackers to better defend against potential threats.
