

SAI PRANEETH

Kansas City, MO | (816)-764-9351 | pothuri.praneeth@gmail.com | www.linkedin.com/in/saipraneethp

SUMMARY

Motivated and detail-oriented Bachelor's student in Computer Science with a strong foundation in data analysis, machine learning, and software development. Proficient in Python, SQL, and data visualization tools with hands-on experience in data collection, cleaning, transformation, and predictive modelling. Passionate about leveraging analytical techniques to derive meaningful insights from complex datasets. Seeking opportunities as a Software Engineer to apply technical expertise in real-world problem-solving, enhance business intelligence, and drive data-driven decision-making.

EDUCATION

University of Missouri, Kansas City	Bachelor's in Computer Science	Expected: 05/2026
Vellore Institute of Technology, India	Integrated M.Tech , Computer Science	09/2021 - 05/2024

COURSE WORK

Data Analytics, Design Analysis and Algorithms, Web Mining, Deep Learning, Data Analytics, Data Visualization, Human Computer Interface, Python and C Language, Front End Design, Cloud Computing, Data Structures, Database Management Systems, Applications of Cryptography, Artificial Intelligence, Network Architecture, Discrete Structures

SKILLS

Programming: SQL, Python, HTML, C, CSS, Java, JavaScript, ReactJS, Node.js, R Studio

Tools: Excel, Word, Jupyter Notebook, VS Code, Power BI

Data Analysis: Data Cleaning, Data Visualization, Statistical Analysis, Predictive Modeling and Clustering Techniques, Matplotlib

Cloud Platforms: AWS, Google Cloud

Soft Skills: Team Building, Time Management, Problem Solving and Adaptability

CERTIFICATIONS

Cloud Computing with AWS, Python, Java Programming and S/W Engineering fundamentals, Oracle Database SQL

PROFESSIONAL EXPERIENCE

Aspire Systems- Data Analytics Intern | Tamil, Nadu, India

May 2024 - June 2024

- Developed a predictive model using XGBoost to identify employees at risk of leaving, achieving 85% accuracy in predicting attrition.
- Preprocessed HR data, handled missing values, performed categorical encoding, and applied feature engineering techniques.
- Built a real-time ETL pipeline using Apache Kafka and Python to automate data extraction, transformation, and loading, improving data efficiency.
- Created visualizations and dashboards in Tableau and Power BI to analyze employee turnover trends and business KPIs
- Collaborated with cross-functional teams to provide data-driven solutions for business optimization.

ACADEMIC PROJECTS

Employee Attrition Prediction Model

Jan, 2024

- Developed a machine learning classification model using Logistic Regression and Random Forest.
- Processed and cleaned HR data, performed One-Hot Encoding, and evaluated the model using ROC-AUC and Precision-Recall metrics.
- Achieved 85% prediction accuracy, identifying high-risk departments and turnover factors.

Real-Time Data ETL Pipeline

Aug, 2024

- Built an automated real-time ETL pipeline using Apache Kafka, Apache Airflow, and Python.
- Streamed data from social media feeds, processed it in real-time, and stored it in AWS S3 for analysis.
- Created real-time dashboards using Tableau to visualize incoming data streams, enhancing decision-making.

Stock Price Prediction using LSTM

Jan, 2024

- Implemented an LSTM model for stock price trend prediction using historical data from the Yahoo Finance API.
- Incorporated technical indicators like moving averages and RSI to improve forecasting accuracy.
- Achieved an RMSE of 0.8, providing valuable financial insights.
