

SRAVAN KASTHALA

510-259-8906 · sravankc.3@gmail.com

Results-driven Data Engineer with 5+ years of experience as designing and optimizing scalable data solutions across gaming, consumer goods, and healthcare industries. Expertise in Azure cloud ecosystems (Data Factory, Synapse, Databricks) and modern ETL frameworks (Airflow, PySpark) to transform raw data into actionable insights. Proven track record of reducing operational costs by 35%, accelerating reporting cycles by 75%, and enabling data-driven decision-making through Power BI visualizations and SQL optimization. Adept at leading cross-functional Agile teams to deliver high-impact projects, including player behavior analytics for Nintendo, global supply chain modernization for Procter & Gamble, and compliance-driven data systems for pharmacy clients. Passionate about bridging technical innovation with business outcomes through collaborative problem-solving

Skills

- **Cloud:** Azure Data Factory, Azure Synapse, Databricks, Blob Storage, Azure SQL
- **ETL/Data Tools:** Apache Airflow, SSIS, PySpark, Delta Lake, SQL (T-SQL, PostgreSQL)
- **Languages:** Python, SQL
- **Visualization:** Power BI, Excel (DAX, Power Query, PivotTables)
- **Databases:** Cosmos DB, Snowflake, PostgreSQL
- **Collaboration:** Agile/Scrum, Jira, GitHub, Cross-functional Leadership

Experience

Data Engineer

NINTENDO, Redmond, WA

May 2023 - Present

- Engineered end-to-end data pipelines using **Azure Data Factory** and **Azure Synapse Analytics**, ingesting 10TB+ of player behavior data daily into **Azure SQL Data Warehouse** for real-time analytics.
- Optimized Spark-based ETL processes in **Azure Databricks**, reducing data transformation latency by 40% through parallel job execution and **Delta Lake** integrations.
- Designed a scalable **Azure Blob Storage** architecture for unstructured game log data, improving retrieval efficiency by 30% for cross-functional teams.
- Developed **PySpark** scripts to automate player segmentation, enabling targeted marketing campaigns that boosted user engagement by 25%.
- Collaborated with game developers to integrate telemetry data into **Power BI** dashboards, driving data-driven decisions for feature updates.
- Implemented **Agile/Scrum** workflows using **Jira**, reducing sprint delivery times by 20% through improved backlog prioritization.
- Migrated legacy Hadoop workflows to **Azure Databricks**, cutting infrastructure costs by 35% while maintaining SLAs for data freshness.
- Conducted **SQL query optimization** for analytics teams, reducing report generation times from 15 minutes to under 3 minutes.

Data Engineer

INFOSYS, Hyderabad, INDIA

February 2020 - July 2022

- Built **Apache Airflow DAGs** to orchestrate supply chain ETL workflows, processing 5M+ SKU records daily into **Azure SQL DB** with 99.9% accuracy.
- Modernized legacy **SSIS** packages to **Azure Data Factory**, reducing pipeline maintenance effort by 50% and enhancing error logging.
- Designed a **Cosmos DB** solution for global sales data, enabling low-latency access for 15+ regional teams and improving query performance by 45%.
- Automated raw material demand forecasting using **Python Pandas**, reducing stockouts by 18% for P&G's manufacturing division.
- Spearheaded migration of on-prem Hadoop clusters to Azure, achieving 99.5% data integrity during cutover for 20+ TB of historical records.
- Optimized **T-SQL** stored procedures, reducing month-end financial closing cycles from 7 days to 3 days.
- Trained 25+ analysts on **Power BI** advanced features (DAX, drill-through), accelerating self-service reporting adoption.
- Led cross-functional **Agile** teams to deliver a vendor analytics portal, integrating 8 data sources and reducing manual reporting by 60%.

Data Analyst

DHITI CONSULTING SERVICES, Hyderabad, INDIA

May 2019 - January 2020

- Developed a **PostgreSQL** database for pharmacy inventory management, reducing medication stock discrepancies by 90% through automated reconciliation.
- Created **Excel** macros with advanced formulas (VLOOKUP, INDEX-MATCH) to streamline patient billing, cutting processing time by 50%.
- Designed **Power BI** dashboards for tracking drug compliance, enabling the client to identify 12% non-compliance rates and initiate corrective actions.
- Migrated legacy CSV/Excel reports to **Azure SQL DB**, improving data accessibility for 50+ pharmacy branches.
- Built Python (**Pandas**) scripts to validate clinical trial data, reducing manual errors by 70% for FDA submissions.
- Collaborated with pharmacists to model drug interaction risks using pivot tables, enhancing patient safety reporting.
- Automated monthly sales reports using **SQL** and Power Query, saving 20+ hours per month for the analytics team.
- Implemented **Git** version control for ETL scripts, ensuring 100% auditability for compliance with healthcare regulations.

Education

MASTER OF SCIENCE in COMPUTER SCIENCE

California State University East Bay

May 2024

BACHELOR OF TECHNOLOGY in COMPUTER SCIENCE

K L University

May 2020
