## EDUCATION

**Webster University, St. Louis, MO, United States**  
Master of Science in Information technology management

Jan 2023 - Aug 2024  
GPA: 3.50/4.0

**Vellore Institute of Technology, Chennai, India**  
Master of Technology (M.Tech) in Software Engineering

Jul 2017 - May 2022  
GPA: 7.96/10.0

## EXPERIENCE

**Sadhawe Technologies**  
Data Engineer

May 2023 - Present  
Glen Allen, Virginia

- **AWS Expertise:** Managed **CloudWatch**, **CloudTrail**, **S3** (versioning for sensitive data), **DynamoDB** (Lambda integration), automated **snapshots** with **Python**, and developed **Redshift**-based **data warehousing**.
- **Data Warehousing and ETL Automation:** Designed and implemented data warehouses on **AWS Redshift** and **Azure SQL Data Warehouse**, optimizing high-performance storage solutions. Created and configured **Apache Airflow DAGs** for automated **ETL workflows**, reducing data ingestion time by **xx%** with **PySpark** and **Scala**.
- **Spark & Big Data:** Developed **PySpark** scripts for data transformations, **RDD** operations, **SQL queries**, **Spark Streaming**, and advanced data analysis; optimized **Hive** with **bucketing**, **partitioning**, **ORC** file formats.
- **Kubernetes:** Maintained **production-grade Kubernetes clusters** with regular **patches** and **upgrades** to ensure **stability** and **scalability**.
- **Data Quality & ML:** Performed **data profiling** and **quality checks** (**Hive**, **Hadoop**, **Spark**), created **UDFs** in **MapReduce**, **Pig**, and **Hive**, implemented **machine learning algorithms** in **PySpark** for **data-driven insights**.

**Solytics Partners**  
Software Developer

June 2020 - Jan 2023  
Pune, India

- **Subject Matter Expert** in developing scalable **client/server applications** for banking **KYC** (Know Your Customer) compliance and **Anti-Money Laundering (AML)** controls, serving **xM financial transactions** monthly across **x regions**.
- Engineered and optimized **data pipelines** for **compliance reporting** and real-time **risk assessment**, enabling enhanced **regulatory adherence** and reducing data processing times by **xx%**.
- Developed and deployed **RESTful APIs** using **Python** and **Django**, delivering backend services to support **xM users**. Utilized **CI/CD practices** with **Jenkins**, driving a **xx% increase in deployment efficiency** across teams.
- Orchestrated high-availability **data management solutions** with **PostgreSQL** and **Elasticsearch**, enabling scalable data operations with **xxB records** and supporting real-time analysis for **xM daily active users**.
- Implemented robust **logging** and **monitoring** via **Logstash**, **Kibana**, and **Elasticsearch**, improving pipeline observability and reducing response times for critical issues by **xx%**. Leveraged **Redis** for real-time data caching, increasing data retrieval speeds by **xx%**.
- **Led documentation** and **ETL pipeline updates**, improving project delivery by **xx%**. Ensured **99.9% service availability** through proactive **monitoring** and **system health checks**, minimizing downtime.

**Techciti**  
Backend Developer

Jan 2020 - June 2020  
Bangalore, India

- Engineered scalable **web applications** using **Python** and **Django**, incorporating **RESTful APIs** and integrating **machine learning models** to support **real-time analytics** and **predictive decision-making**, resulting in a **30% increase** in processing speed and efficiency.
- Developed and deployed **machine learning models** for **predictive analytics** and **NLP** using **TensorFlow**, **PyTorch**, and **SpaCy**, optimizing **user personalization** and enabling dynamic decision-making systems that improved customer engagement by **25%**.
- **Architected serverless applications** on **Azure** using **Azure VMs**, **Storage**, and **Functions**, enhancing **system reliability** and achieving **99.9% uptime**, while reducing cloud resource costs by **20%** through optimized architecture.
- **Automated CI/CD pipelines** using **Docker**, **Kubernetes**, **Jenkins**, and **Terraform**, significantly improving deployment speed by **40%** and ensuring **seamless scalability** across multi-cloud environments (**AWS**, **GCP**, **Azure**).
- **Implemented data management solutions** leveraging **AWS**, **Google Cloud**, and **Azure**, ensuring **high availability** of applications and reducing system failures by **15%** due to better fault tolerance and automatic scaling.

## TECHNICAL SKILLS

**Programming languages:** Python, Swift, Java, C, C++

**Cloud & Databases:** AWS (S3, EC2, Lambda, RDS, DynamoDB), Azure, Google Cloud Platform (BigQuery, Cloud Functions), PostgreSQL, MySQL, MongoDB, Cassandra, Redis

**DevOps & Version Control:** Docker, Kubernetes, Git, Jenkins, GitHub Actions, Travis CI, CircleCI, Ansible, Terraform

**Web Technologies:** HTML, CSS, JavaScript, Django, React.js

**ML/AI:** TensorFlow, PyTorch, NumPy, Pandas, Keras, OpenCV, NLTK, SpaCy Azure VMs, Azure Storage, Azure Functions) and on-premises data center environments.

**Big Data Technologies:** Apache Spark, Hadoop, Kafka, Flink, Hive, Elasticsearch, Alto, Silver Peak, and Cisco Meraki

## RELEVANT COURSEWORK

**Computer Science:** Deep Learning, Data Structures and Algorithms, Databases (SQL & NoSQL), Operating Systems, Computer Networks, Software Engineering, Web Development, Cloud Computing, Cybersecurity, Machine Learning, Data Science, etc.
