EDUCATION

Master of Science in Information Technology Project Management (Indiana) May 2025
Indiana Wesleyan University GPA: 3.60
Relevant Coursework: IT Project Management, Data Analytics, Software Engineering, Agile Methodologies, Cloud Computing, Cybersecurity.

TECHNICAL SKILLS

-
- **Manufacturing Processes & Protocol Development:** IQ/OQ/PQ; Assembly Optimization; Material Selection & Compliance
 - **Project & Documentation Management:** Data Analysis, Project Management, Frontend Basics (React, JavaScript)
 - **Tool & Technologies:** SQL, Azure, REST APIs
 - **Programming:** Python, Java

PROFESSIONAL EXPERIENCE

Project Engineer, Wipro, Hyderabad May 2022 – Sep 2023

Received a job offer while pursuing a B.Tech degree and joined Wipro as a fresher. Underwent extensive training in Java and J2EE before being assigned to a support role for the Close Brothers project.

Key Responsibilities & Achievements:

- Managed high-priority alerts and incidents using BMC Helix and SolarWinds, ensuring timely issue resolution and service availability for Work Package D.
- Monitored and updated tickets in BMC Helix, maintaining SLA compliance and supporting incident lifecycle management.
- Utilized SolarWinds to track node status (up/down) and proactively created incidents for system downtimes.
- Prepared detailed operational reports to improve visibility for stakeholders and ensure seamless shift handovers.
- Conducted structured training for six new team members, facilitating knowledge transfer and improving team efficiency.

ACADEMIC PROJECTS

-
- **Smart Maintenance:** Integrating IoT and ML for Predictive Industrial Systems Master's Capstone Project | Indiana Wesleyan University | 2025
 - Designed a smart maintenance system utilizing IoT sensors and machine learning to predict industrial equipment failures proactively.
 - Developed a framework to collect real-time sensor data (temperature, vibration, pressure) for early fault detection.
 - Applied machine learning algorithms to analyze patterns and predict equipment failures before they occur.
 - Proposed a cloud-based solution to streamline data storage and processing across multiple locations.
 - Addressed cybersecurity concerns, integration challenges with legacy systems, and cost factors, providing practical solutions.
 - Strengthened expertise in data analysis, system architecture, and problem-solving within industrial automation.

COURSES AND CERTIFICATIONS

-
- AZ-900: Microsoft Azure Fundamentals – Microsoft
