

Sravani Kaligotla

Ex-Amazon Software Engineer | Backend & Full-Stack Developer | Cloud-Native Systems | Java, AWS, C#/.NET, Angular, React, Node

+1(704) 363-7994 | sravani.kaligotla1901@gmail.com | linkedin.com/in/sravani-kaligotla | github.com/sravani1915

SUMMARY

Software Engineer with 2+ years of experience building full-stack applications using **C#, .NET Core, SQL, Angular, and React/TypeScript**. Skilled in developing secure REST APIs, scalable backend systems, and responsive frontends. Strong foundation in data structures, algorithms, databases, and Agile SDLC.

EDUCATION

University of North Carolina at Charlotte Masters in Computer Science	<i>Aug 2023 – Dec 2024</i> GPA: 3.90
Jawaharlal Nehru Technological University BTech in Computer Science and Engineering	<i>Aug 2018 – May 2022</i> CGPA: 9.24/10

EXPERIENCE

Software Engineer Amazon	<i>Feb 2022 – Jul 2023</i>
- Contributed to backend services in Java, Python, and MySQL, applying object-oriented design and improving maintainability, reducing onboarding time for new developers by 40%. - Built and supported automated data pipelines on AWS (Lambda, SQS, DynamoDB), processing 5M+ requests/month with sub-second latency and improving throughput by 35%. - Implemented unit and integration tests (Mockito, Jest) and collaborated with QA to validate new features, reducing production defects by 25%. - Provided on-call support, debugging production issues and enhancing observability with Grafana, AWS CloudWatch, and distributed tracing, cutting incident response time by 25%. - Received the "Master of Delivery" award for high-impact launches; optimized data validation pipelines with Python scripts, reducing test cycles by 30%.	
Graduate Research Assistant UNC-Charlotte	<i>Jan 2024 – Dec 2024</i>
- Developed a full-stack platform with React.js, TypeScript, and Node.js, and created select dashboards with Angular to validate cross-framework compatibility. - Built and deployed internal data management modules using C#/.NET Core with SQL Server, integrating them into existing research workflows alongside React and Node.js services. - Implemented secure JWT authentication and responsive UI for 100+ users, ensuring accessibility and cross-browser support. - Containerized backend modules with Docker, integrated Apache Kafka and Redis caching, improving query response times by 45%.	
Software Engineer(Volunteer) Rebecca Everlene Trust Company	<i>Feb 2025 – Present</i>
- Built and maintained backend services with C#/.NET Core APIs and SQL Server, integrating Angular and React frontends to deliver end-to-end features with secure role-based access. - Orchestrated containerized services on Azure Kubernetes Service (AKS), integrating RabbitMQ for asynchronous workflows and Elasticsearch for sub-second record search. - Implemented automated data pipelines with Apache Airflow and TypeScript, cleaning and standardizing 100+ monthly submissions, and exposing results via REST/gRPC APIs.	

CERTIFICATIONS

- AWS Certified Developer Associate
- AWS Certified Cloud Practitioner
- Meta Front-End Developer (Coursera)
- Google Cloud Professional Cloud Developer
- Hands-on labs in C#, .NET, Linux shell scripting, and distributed systems (Udemy)

TECHNICAL SKILLS

Programming Languages: C#, .NET Core, Java, Python, JavaScript, TypeScript, Bash, Go
Web & Frameworks: ASP.NET, Spring Boot, React.js, Next.js, Angular, Node.js, Express.js, GraphQL, FastAPI, Flask, HTML, CSS, Bootstrap
Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Redis, SQLite, DynamoDB, Entity Framework
DevOps & Cloud: AWS, Azure, Jenkins, Kubernetes, GitHub Actions, Terraform, Docker, Git
Tools & Others: Linux, Postman, OpenAPI, Jest, Mockito, CloudWatch, Kibana, VS Code, JIRA
Courses / Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks, Software Engineering, Agile, SDLC, Microservices Architecture, Event-Driven Systems

PROJECTS

- Photo Sharing Application:** Created a full-stack media sharing platform using **MongoDB GridFS, NextJS, Node.js**, and **React**. Handled upload, preview, and storage of 100+ images using secure **JWT sessions** and released the app with **Docker** for scalability.
- Personal Budget Tracker:** Integrated a responsive expense tracking tool with **React, Spring Boot**, and **MySQL**. Supported user login, categorized transactions, and real-time analytics with enhanced dashboard UX.
- Explain My Code - AI Mentor Bot:** Developing a Python-based AI assistant using **PyTorch, LangChain**, and the **OpenAI API** to analyze multi-language code (Python, Java, JavaScript), detect bugs, and suggest improved fixes.
