

SRAVANI MEDARAMETLA

Connecticut, United States | +1 860-905-3368 | Sraanimedarametla225@gmail.com

Summary

Certified Data Analyst with a strong foundation in SQL, Power BI, and Tableau, experienced in cleaning and validating multi-source datasets to generate actionable healthcare insights. Demonstrated success in developing dashboards and executing statistical analyses, including healthcare data projects involving eligibility and claims pipelines. Adept at partnering with cross-functional teams to translate complex data into clear, data-driven solutions that support operational efficiency and improved patient outcomes.

EDUCATION

New England College, Henniker, New Hampshire

Aug 2023 - May 2025

Masters, computational science and engineering

- GPA: 3.8

QIS Institute of Technology, Ongole, AP, India

Jun 2018 - Jul 2022

Bachelor of Technology, Computer Science and Engineering

- GPA: 7.3

PROFESSIONAL EXPERIENCE

Creeno Solutions PVT LTD

Aug 2022 - Jul 2023

Jr. Power Bi Developer/Data Analyst

Hyderabad, India

- Data Acquisition & Processing: Gathered, cleansed, and structured multi-source datasets to ensure data accuracy, integrity, and readiness for analysis, aligning with principles of data validation and healthcare data handling.
- Analytical Insight Generation: Leveraged fundamental statistical analysis techniques to identify trends, anomalies, and opportunities, reinforcing data-driven decision-making.
- Dashboard & Reporting Development: Designed and maintained intuitive dashboards and KPI reports using Power BI, Tableau, and Excel to provide real-time insights for stakeholders.
- Advanced Reporting Automation: Utilized SQL to streamline data extraction processes and Python for task automation, supporting predictive analytics and efficient report generation.
- Cross-Functional Collaboration: Partnered with product managers, engineers, and business teams to align analytics efforts with organizational goals and project requirements.

Logic Mind Technologies

Jun 2020 - Jun 2022

Data Analyst

Hyderabad, India

- ETL Process Development: Developed and deployed SSIS packages with built-in error handling and logging to ensure consistent and reliable data pipelines.
- Healthcare Data Management: Collaborated on healthcare data projects, managing eligibility and claims pipelines with SQL validation and SSIS-driven workflows while adhering to data integrity standards.
- Client Onboarding & Data Feed Coordination: Facilitated client onboarding and third-party data feed setups to ensure timely and accurate data transmission.
- Data Integrity Assurance: Applied advanced SQL techniques and data profiling methods to identify anomalies and enforce rigorous data validation practices.
- Database Optimization: Designed and optimized SQL Server databases to improve performance, scalability, and consistency across platforms.
- Technical Communication: Conveyed complex technical concepts clearly to both technical teams and non-technical stakeholders.
- Power BI Reporting: Engineered insight-driven reports using Power BI with DAX calculations, measures, and calculated columns for enhanced decision support.
- Visual Data Transformation: Built interactive Tableau dashboards to translate technical findings into actionable visual insights.
- Interactive Reporting Development: Converted static reports into dynamic Tableau dashboards, incorporating filters and user interactions for deeper data exploration.
- End-to-End ETL Solutions: Leveraged Informatica and SSIS to construct comprehensive ETL workflows, maintaining data accuracy and availability across systems.

PROJECTS

Analyzing Online Retail Sales Trends Using Power BI and SQL

- Developed interactive dashboards to uncover seasonal trends, top-selling products, and customer purchase behavior

Social Media Engagement Analysis Across Platforms

- Collected and compared Instagram, Twitter, and LinkedIn metrics to identify content types that drive the most interaction.

Comparison of Housing Price Prediction Using Machine Learning Models

SKILLS

- **Data Analysis & Visualization Tools:** Power BI, Tableau, Excel
- **Programming Languages:** SQL (strong proficiency), Python, R
- **Database Management:** SQL Server, MySQL
- **ETL Tools:** SSIS, Informatica
- **Advanced Analytics:** Statistical analysis, machine learning models (for predictive analysis), Analytical Skills
- **Reporting:** KPI reports, interactive dashboards
- **Data Handling:** Data acquisition, data cleansing, data structuring, data validation, data profiling, data transformation, data integrity
- **Healthcare & Compliance:** Healthcare Data Standards

ACHIEVEMENTS

- Implemented advanced data analysis, resulting in a 40% improvement in business outcomes.
- client expectations, achieving a flawless 100% on-time project completion rate. Led cross- functional team, yielding a 20% operational efficiency boost.
