Summary

Results-driven Information Systems graduate with 4+ years of IT experience in quality assurance, software testing, project coordination, and data analytics. Proficient in test automation, defect tracking, SQL, Python, and Tableau. Skilled in Agile/Scrum methodologies, data analysis, test case design, data visualization, and requirements gathering. Strong analytical thinking, attention to detail, and collaborative problem-solving abilities.

Education

Cleveland State University, OH

May 2025 | GPA: 3.78

Master of Science in Information Systems

Andhra University, India

May 2018

Bachelor of Technology in Computer Science

Skills

Python, SQL, MySQL, MS Access, Tableau, MS Excel, Jira, Weka, Selenium, SoapUI, MongoDB, Postman, Test Plan Creation, Client Testing, Automated Testing, UAT, Test Automation Frameworks, Database Testing, API Testing, Bug Tracking, Agile/Scrum, SDLC, MS Office Suite (Word, PowerPoint, Visio, Project), SharePoint

Coursework: Data Analysis, Data Visualization, ERP, Project Management, Enterprise Databases, Data Mining and Business Intelligence, Customer Relationship Management

Experience

QA Analyst, BeyondScale Technologies – Hyderabad, India

Nov 2022 – May 2023

- Led and monitored project schedules across 3 key releases, achieving 100% on-time delivery and exceeding quality benchmarks.
- Facilitated cross-functional meetings to gather/analyze project requirements, reducing data reporting errors by 35%
- Reported inconsistencies and production issues to leadership, leading to a 25% improvement in resolution time for critical defects. Built and trained a QA team of 5, introducing new SOPs that cut defect rates by 40% and boosted customer satisfaction scores by 30%
- Conducted accessibility testing to ensure ADA compliance for web applications, improving usability for non-sighted users by 80%

QA Engineer, Phenompeople Pvt Ltd – Hyderabad, India

Mar 2020 – Sep 2022

- Conducted root cause analysis and resolved over 200 defects across multiple enterprise applications.
- Partnered with stakeholders to implement fixes and deliver QA solutions to clients including Warner Media, DHL, Lumen, Kuehne+Nagel, Inspire Brands, and Accor.
- Enhanced automated test case success rate from 60% to 94% in one year by optimizing test scripts and workflows.
- Contributed to reducing regression testing time by 35% through effective test case reuse and automation.

Manual Test Engineer, Reezanorp IT Solutions – Visakhapatnam, India

Jul 2018 – Feb 2020

- Designed and executed 150+ manual test cases based on business and technical requirements.
- Conducted front-end testing for client-facing applications, improving UI compliance and reducing post-deployment issues by 20%.

Projects

- NBA Arena Management System: Built Access DB & C# app for tracking team performance and event management
- AI in Marketing (Game Theory): Analyzed Jio vs. Airtel AI strategies using game-theoretic modeling
- ERP Simulation: Managed procurement/production strategy, used Tableau for KPI-driven decision-making
