Professional Summary

Data Analyst with a Master's degree and 3+ years of experience using data to drive business decisions. Skilled in SQL, Python, Power BI, and Tableau. Strong background in data pipelines, reporting, and Agile collaboration. Proven ability to turn complex data into clear insights for process improvement and strategic planning.

Technologies

Languages: SQL (Proficient), Python (Proficient), DAX, R, JavaScript (Basic)

Data Visualization & Reporting: Power BI, Tableau, Looker, Excel (Advanced), DAX, Pivot Tables, Power Query

Business Tools & Methodologies: Agile/Scrum, Jira, Confluence, Requirements Gathering, Process Mapping

Cloud & Data Platforms: Azure (Synapse, Data Factory), AWS (Redshift, S3), Snowflake, Google BigQuery

Data Tools & Technologies: Alteryx, dbt, Apache Airflow, Informatica, ETL Processes, Git, Jupyter Notebooks

Education

The University of Texas at Dallas, Master of Science in Business Analytics May 2024

- **Coursework:** Data Visualization, Statistical Methods, Machine Learning for Business, Business Analytics with R and Python

Osmania University, Hyderabad, Bachelor of Business Administration May 2021

Experience

Prysm

Data Analyst

Milpitas, CA

Jul 2024 – Present

- Designed and maintained advanced Power BI dashboards using DAX and custom visuals, improving KPI visibility for stakeholders by 40%.
- Analyzed datasets from Azure Synapse and Snowflake to support reporting automation and performance monitoring across departments.
- Optimized data models and developed reusable data pipelines to streamline reporting, reducing manual reporting efforts by 30%.
- Partnered with data engineering to validate data schemas and ensure quality assurance of metrics and calculated fields.
- Conducted gap analyses and built SQL-based reports to identify inefficiencies in business operations and suggest data-driven improvements.
- Facilitated Agile ceremonies and documented analytics requirements and KPIs using JIRA and Confluence.

The University of Texas at Dallas

Graduate Assistant – Business Analytics

Dallas, TX

Jan 2024 – May 2024

- Created R and Python notebooks to demonstrate data cleaning, feature engineering, and predictive modeling using real-world datasets.
- Assisted students with implementing linear regression, classification models, clustering, and model evaluation techniques.
- Supported professors with grading analytical assignments and developing lab sessions for data visualization and statistical modeling.
- Provided individual tutoring on Python (pandas, matplotlib, scikit-learn) and R (ggplot2, caret) to improve student competency in analytics.

Cortracker 360

Data Analyst

Hyderabad, India

May 2020 – June 2022

- Built and maintained dashboards in Power BI and Tableau to visualize loan disbursements, KYC processing, and account reconciliations.
- Used SQL and Excel macros to automate data cleaning and reporting from banking systems, reducing manual work by 35%.
- Integrated APIs with credit scoring and payment platforms and validated data pipelines to ensure accuracy, improving transaction success by 18%.
- Developed key performance indicators (KPIs) for digital banking operations, enabling leadership to track and optimize processes.

- Created BRDs and FRDs with a data-focused approach and supported 10+ successful agile releases for client-facing platforms.
- Worked closely with stakeholders to analyze data gaps, propose automation strategies, and improve process efficiency by 25%.

Anaga Solutions

Data Analyst – Healthcare Domain

Hyderabad, India

Feb 2019 – Aug 2019

- Analyzed healthcare operations data using Excel (PivotTables, VLOOKUP) and macros to streamline reporting and reduce effort by 30%.
- Built automated dashboards and performance reports for hospital KPIs including readmission rates and discharge summaries.
- Interpreted clinical and operational datasets to provide insight on service utilization and treatment effectiveness.
- Conducted statistical analysis on patient admissions and trends to identify bottlenecks and propose improvements.
- Created summary reports and executive decks that helped healthcare management in decision-making and compliance planning.

Academic Projects

- **SEO Project on YouTube for Web Analytics:** Analyzed real-time YouTube traffic growth and implemented SEO strategies including keyword optimization and backlink building, boosting channel engagement by **40%**. **Technologies:** Google Analytics, SEO Tools, Excel
- **Social Media Traffic Analysis:** Tracked and analyzed social media content performance using Python and Excel, optimizing posting strategies to increase follower growth and interactions. **Technologies:** Python, Excel, Social Media Analytics
- **Library Database Management System:** Designed a business-oriented database with structured tables, stored procedures, and keys to manage book inventory and transactions efficiently. **Technologies:** MySQL, ER Diagrams, Stored Procedures
