

Sravanthi Lanka

Data Engineer

sravanthilanka2704@gmail.com | (469) 476-5727 | TX

Summary

Data Engineer with 4+ years of experience designing, implementing, and optimizing data pipelines across diverse industries. Proficient in SDLC and waterfall methodologies and equipped with solid programming expertise in Python, R, SQL, and Scala. Demonstrated experience in building and deploying machine learning models using techniques such as Linear and Logistic Regression, Decision Trees, SVM, Naive Bayes, and KNN, with expertise in supervised and unsupervised learning. Expert in data processing frameworks like Hadoop, Apache Hive, and Google Cloud Dataflow, as well as Apache Nifi for data integration and workflow automation. Skilled in cloud platforms, including AWS and Google Cloud, for scalable data storage and analytics solutions. Experienced in using Excel and Power BI for data visualization and reporting, with advanced analytics capabilities in libraries like NumPy, Pandas, and TensorFlow.

Skills

Methodology: SDLC, Waterfall

Programming Language: Python, R, SQL, Scala, Core Java, Java8, SQL, C++, Swift, Kotlin, TypeScript

Frameworks: Spring MVC, Spring Boot, Spring Security, Microservices, JSF, Hibernate, JPA

IDE's: Visual Studio Code, PyCharm

ML Algorithm: Linear Regression, Logistic Regression, Decision Trees, Supervised Learning, Unsupervised Learning, Classification, SVM, Random, Naive Bayes, KNN, K Means

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML

Application Server & Build tools: Apache Tomcat, Web Sphere, UML, MS Visio, Maven, Gradle, Jenkins, Junit

Big Data Ecosystem: Hadoop, Apache Hive, Google Cloud Dataflow

ETL & Data Pipelines: Apache Nifi

Cloud Technologies: AWS, Google Cloud

Visualization Tools: Excel, Power BI

Packages: NumPy, Pandas, TensorFlow

Data Storage and Management: SQL Server, MySQL, PostgreSQL, MongoDB, Oracle, Snowflake, Google BigQuery

Collaboration & Workflow: Jira, GitHub

Operating Systems: Windows, Linux

Education

Master in Computer Science

Aug 2022 - May 2024

Wichita State University, Kansas

Bachelor in Computer Science

June 2016 - Aug 2020

Malineni Perumallu Educational Society's Group of Institutions, College in Pulladigunta, Andhra Pradesh

Experience

BlackRock, TX | Data Engineer | Nov 2023 – Current

- Collaborate in SDLC processes, ensuring that data engineering projects align with complete software development lifecycle standards, which resulted in a 20% increase in project efficiency and on-time delivery.
- Build and maintain scalable data pipelines using Python, Scala, and SQL, processing over 100 TB of data daily for business intelligence and reporting.
- Implement machine learning models, including linear and Logistic Regression, Decision Trees, and KNN, which resulted in a 20% improvement in customer segmentation accuracy.
- Utilize Apache Nifi and Google Cloud Dataflow to automate data workflows, reducing manual intervention by 40% and improving data availability.
- Manage data integration tasks using Hadoop and Apache Hive, enhancing data retrieval times by 30% through optimized queries.
- Perform data analysis and visualization using Excel and Power BI, leading to 15% faster decision-making for cross-functional teams.
- Optimize cloud infrastructure on AWS and Google Cloud, cutting cloud resource costs by 25% through efficient storage and computation strategies.

- Ensure database integrity and performance with SQL Server, MySQL, and Snowflake, maintaining 99.9% uptime and improving query efficiency by 35%.

Infosys, India | Data Engineer | June 2021- July 2022

- Built and maintained robust data pipelines, ensuring seamless data flow and optimized performance across various systems and applications.
- Managed and optimized big data platforms to ensure efficient data processing and developed scalable solutions to handle large volumes of data, enhancing overall data infrastructure.
- Led data migration from on-premise servers to the cloud, establishing secure connections and ensuring data integrity during the transition.
- Utilized ETL tools such as Control-M and DataStage for efficient data extraction, transformation, and loading, while automating workflows to reduce manual effort by 30%.
- Created and managed cloud infrastructure in Google Cloud Storage, including buckets, JSON keys, and service accounts, to ensure secure and scalable data management.
- Applied transformation logic using SQL queries based on business requirements, improving data accuracy by 25% and reconciling data between BigQuery and on-premise systems to maintain consistency.
- Collaborated with distributed teams to troubleshoot issues, resolve data processing challenges, and ensure the timely delivery of projects while meeting deadlines.

Orion Technolab, India | Software Engineer | Jan 2019 – May 2021

- Developed scalable applications using Core Java, Java 8, and Spring Boot, reducing application response times by 25% and improving system performance.
- Designed and deployed RESTful APIs and microservices architecture, improving data flow efficiency by 30% and enabling seamless communication between services.
- Built and optimized ETL pipelines using Apache Nifi and SQL, reducing data processing time by 40% and automating data workflows, saving 10 hours weekly.
- Applied machine learning algorithms such as Linear Regression, SVM, and Random Forest to predictive models, improving accuracy by 20%.
- Integrated Google Cloud and AWS services for scalable data storage and processing, improving system uptime to 99.9%.
- Implemented SQL and NoSQL databases like MySQL, PostgreSQL, and MongoDB, optimizing query performance and reducing retrieval times by 35%.
- Developed interactive data visualizations with Power BI and Excel, improving decision-making processes for stakeholders by 25%.
- Led integration of Jira and GitHub for project management and version control, improving team collaboration and reducing deployment errors by 15%.
- Utilized Apache Hive and Google Cloud Dataflow for big data processing, reducing data pipeline latency by 30%.
