PROFESSIONAL SUMMARY

- ✓ Over **5+ years of experience** in IT, specializing in scalable and secure enterprise applications using **C#, ASP.NET Core, Web API, Angular**, and **Azure Cloud** services.
- ✓ Proficient in **SDLC** methodologies, including **Agile Scrum** and **Waterfall**, contributing to sprint planning, demos, backlog grooming, and release coordination.
- ✓ Expertise in **C# 10.0**, with advanced skills in **LINQ, Multithreading**, and **Collections** for high-performance backend logic and custom utilities.
- ✓ Designed applications using **Onion Architecture, MVC**, and **N-Tier Architecture**, supporting modular development, separation of concerns, and testability for **.NET Microservices**.
- ✓ Developed secure, scalable **RESTful APIs** using **ASP.NET Core Web API**, integrated with front-end clients and third-party systems.
- ✓ Hands-on experience with ORM frameworks, including **Entity Framework, Entity Framework Core, Dapper**, and **ADO.NET**, handling CRUD operations, migrations, and transaction handling efficiently.
- ✓ Built and managed SQL logic using **SQL Server, PostgreSQL**, and **PL/SQL** constructs like **Stored Procedures, Functions, Triggers**, and **Views** for complex business processing.
- ✓ Developed NoSQL integration with **MongoDB**, creating collections and indexes for storing configuration, audit logs, and semi-structured JSON documents efficiently.
- ✓ Implemented **microservices** architecture, deploying applications on **Azure App Services**, using **RabbitMQ** and **MSMQ** for asynchronous messaging, and **Redis** for caching.
- ✓ Automated UI testing using **Jest, Mocha, Chai, Karma**, and **Jasmine** for front-end modules; used **Cucumber** for BDD scenarios and **Citrus** for web service automation.
- ✓ Automated CI/CD pipelines using **Azure DevOps**, integrated with **Postman, Swagger**, and **SonarQube** for testing, code quality checks, and deployment.
- ✓ Experience working with **AWS (EC2, S3, CloudFront)** and **Azure** services such as **Blob Storage, Key Vault**, and **API Gateway** for application hosting, logging, and storage.
- ✓ Proficient with **version control** using **Git, TFS**, and **SVN**, and development tools like **Visual Studio 2022, VS Code**, and **SQL Server Management Studio** for full-stack development.
- ✓ Experience deploying apps on **IIS** and **Apache Tomcat**, managing app pools, certificates, and configurations, and monitoring health using **Log4Net** and custom logging frameworks.

TECHNICAL SKILLS

Category	Skills
Languages	C#, TypeScript, JavaScript, SQL
Web Technologies	HTML, CSS, Bootstrap, jQuery, AJAX
Databases	SQL Server, PostgreSQL, MongoDB
.NET Technologies	ASP.NET Core Web API, ASP.NET MVC, .NET 6/7, Microservices
ORM Frameworks	Entity Framework, Entity Framework Core, Dapper, ADO.NET
Web Servers	IIS, Apache Tomcat
Testing Frameworks	xUnit, Karma, Jasmine, Cucumber, Protractor, Component Testing
Web Services	RESTful, SOAP, JSON
Version Control Tools	Git, SVN, TFS
Methodologies	Agile Scrum, Waterfall
Cloud Technologies	Azure Blob Storage, Azure Functions, Azure Logic Apps, API Gateway
Operating Systems & IDEs	Windows, Linux, Visual Studio, Visual Studio Code, SSMS
CI/CD Tools	Azure DevOps
Message Queues	Apache Kafka
Code Quality Tools	SonarQube
Logging Tools	Log4Net
Project Management Tools	JIRA, Rally, TFS

PROFESSIONAL EXPERIENCE

Client: PNC Bank

Texas, United States

Role: .NET Full Stack Developer

July 2024 – Present

- ✓ Developed secure **ASP.NET Core Web API microservices** for loan management, credit scoring, and fraud alerts, following **Microservices architecture** and deploying on **Azure App Services**.
- ✓ Built **RESTful APIs** with **JSON payloads** integrated with **internal systems** (credit bureaus, KYC verification, banking ledgers) using **OpenAPI standards** and ensuring OAuth-based **SSO** with **Azure AD**.
- ✓ Designed and developed interactive UIs with **Angular 14**, **TypeScript**, and **Bootstrap**, focusing on customer onboarding, KYC, loan repayment, and account summary modules.
- ✓ Optimized **data access** using **Entity Framework Core**, **Dapper**, and **SQL Server**, handling complex joins, stored procedures, and asynchronous operations for high performance.
- ✓ Implemented **Apache Kafka** for asynchronous message processing, including loan application handling, approval queues, and account updates with **guaranteed delivery** and **partition-level replication**.
- ✓ Wrote backend logic for calculating EMIs, penalties, and due dates using C# and business rule engines, logging all events using **Log4Net** for auditing and traceability.
- ✓ Developed **real-time financial dashboards** using **GraphQL** for efficient data fetching across microservices, minimizing over-fetching and ensuring low-latency responses.
- ✓ Implemented **CI/CD pipelines** with **Azure DevOps**, automating build, test, and deployment stages, while maintaining code quality using **SonarQube**, **Git**, and enforcing branch policies.
- ✓ Utilized **PL/SQL** for ledger updates and batch jobs, integrated **Node.js** for background job scheduling, and tested both APIs and UI modules with **xUnit**, **Karma**, **Jasmine**, and **Protractor**.
- ✓ Followed **Agile Scrum** methodology, attending daily scrums, sprint planning, and backlog refinement sessions, and maintained work items in **JIRA**.
- ✓ Used **Visual Studio**, **Visual Studio Code**, and **SQL Server Management Studio (SSMS)** for day-to-day development, debugging, query optimization, and script execution.

Client: Mayo Clinic

Florida, United States

Role: .NET Full Stack Developer

May 2021 – Dec 2023

- ✓ Developed **critical ASP.NET Core Web API microservices** for patient registration, appointment scheduling, and medical history, following **Microservices architecture** and integrating with internal systems and third-party health partners.
- ✓ Built **secure RESTful APIs** with **JSON** payloads, enforcing **HTTPS**, **encrypted payloads**, and **OAuth2/JWT** authentication for sensitive health data, ensuring role-based access control for various user types.
- ✓ Designed and developed **clinical dashboards** using **Angular 11**, **TypeScript**, **HTML**, **CSS**, and **Bootstrap**, providing real-time views for patient vitals, prescriptions, and medical records.
- ✓ Utilized **Entity Framework Core** and **Dapper** for efficient data access in large **SQL Server** databases, and **MongoDB** for storing unstructured data like wearable logs and appointment notes.
- ✓ Implemented **Node.js** background services for real-time data ingestion from **IoT medical devices** to **Apache Kafka**, ensuring efficient streaming and processing of patient monitoring data and alerts.
- ✓ Integrated **GraphQL APIs** to reduce API calls and streamline data fetching for complex medical records, lab results, and prescription histories, enhancing performance.
- ✓ Created **PL/SQL-based stored procedures, functions, and triggers** for automatic billing, medical charge computation, and pharmacy reconciliation processes in **SQL Server**.
- ✓ Deployed microservices using **Azure DevOps CI/CD pipelines**, with approval workflows and post-deployment verification, ensuring seamless production releases in clinical environments.
- ✓ Conducted comprehensive testing with **xUnit**, **Postman**, **SOAP UI**, **Karma**, **Jasmine**, and **Protractor** to ensure robust API and frontend functionality, maintaining code quality via **SonarQube** and logging with **Log4Net** for proactive issue detection.
- ✓ Collaborated with onshore/offshore teams, participating in architecture discussions and knowledge transfers, and using **Visual Studio**, **VS Code**, and **SSMS** as primary tools.

Client: Levi's

California, United States

Role: .NET Full Stack Developer

June 2019 – May 2021

- ✓ Developed **scalable ASP.NET Core Web APIs** to manage product catalog, inventory, and order workflows, following **RESTful standards** and utilizing **Microservices architecture** for internal and third-party integrations.
- ✓ Built **dynamic front-end interfaces** using **Angular 10**, **TypeScript**, and **Bootstrap**, enabling responsive mobile interfaces for browsing, cart management, and real-time inventory tracking.
- ✓ Optimized **data access** using **Entity Framework Core** and **Dapper**, improving checkout, payment, and returns processing performance during high-volume sales periods.
- ✓ Designed and deployed **Microservices** for domain-specific APIs (catalog, pricing, shipping, loyalty), using **Apache Kafka** for inter-service communication and event-driven architecture.
- ✓ Secured **APIs** with **OAuth2** and **JWT**, implementing role-based access control for users (admin, buyer, guest) and integrating with external authentication providers for **SSO**.
- ✓ Utilized **Azure Blob Storage** for managing product images and size charts, linking metadata to **SQL Server** via structured URL mapping and metadata tagging.
- ✓ Developed and monitored background workers in **Node.js** for syncing orders, updating stock levels, and automating payment processing and refunds via **Kafka** event listeners.
- ✓ Integrated **GraphQL APIs** for efficient and flexible data querying, reducing the number of REST calls and improving **UI responsiveness** for product listings and search pages.
- ✓ Implemented **end-to-end testing** using **Protractor** for Angular pages and **Cucumber** for backend APIs, ensuring UI-service contract alignment and reducing defects.
- ✓ Tested, documented, and simulated customer account APIs, payment, and shipping services using **Postman**, **Swagger UI**, and **SOAP UI** in staging environments.
- ✓ Automated deployments using **Azure DevOps** CI/CD pipelines, including versioning, automated testing, artifact deployment, and release monitoring with approval stages.
- ✓ Logged service errors and application issues using **Log4Net**, configuring custom log levels and file-based log rotation for critical payment gateway interactions.
- ✓ Stored logs and search analytics in **MongoDB**, utilizing indexed collections for **dynamic dashboard rendering** and integrating with **Power BI** for reporting and insights.

EDUCATION

- **Master of Science in Engineering**, Oklahoma Christian University
