

SRAVYA KOYI

Chicago IL, 60015 | +1 (312) 709-0622 | sravyakoyi26@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Project](#)

EDUCATION

Northern Illinois University, DeKalb IL Master of Science, Computer Science	Aug 2023 - May 2025 GPA 3.87/4
Koneru Lakshmaiah Education Foundation (KLEF), India B.Tech, Computer Science and Engineering	Jul 2019 - April 2023 GPA 9.3/10

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js, Flask, Django, Spring Boot
- **Database Management:** MySQL, MongoDB, SQLite, Oracle
- **IDE:** Eclipse, VS Code, PyCharm, Android Studio, IntelliJ
- **Test Automation & QA Tools:** Selenium WebDriver, Cucumber, TestNG, JUnit, Postman
- **Cloud Platforms:** AWS (Lambda, EC2, S3), Google Cloud Platform (GCP)
- **Packages:** Numpy, SciPy, Scikit-learn, Matplotlib

CERTIFICATIONS

- Google Cloud Certified Associate Cloud Engineer
- AZ400: Designing and Implementing Microsoft DevOps Solution - Microsoft
- ServiceNow Certified System Administrator
- Aviatrix Certified Engineer - Multicloud Network Associate
- Certified Network Security Practitioner (CNSP)

EXPERIENCE

Quality Assurance Test Engineer, GlobalLogic, Deerfield IL	June 2025 - Present
• Execute regression, smoke, and end-to-end testing on Walgreens' web & mobile apps, using Android emulators & real devices. • Automate test scenarios using Selenium (Java), Cucumber (BDD), and TestNG/JUnit frameworks for structured test execution. • Perform REST API testing using Postman and verify backend data integrity through Cosmos DB and Azure Storage Explorer. • Manage test cases, track defects, and support the defect lifecycle in JIRA, adhering to Agile & Waterfall methodologies. • Integrate automated tests into CI/CD pipelines and collaborate with dev teams to ensure high-quality software releases.	
Graduate Teaching Assistant, Computer Science, NIU, Dekalb IL	Aug 2024 - May 2025
• Mentored 60+ students per semester on C++ application development, focusing on modular design & debugging techniques. • Led hands-on sessions covering version control (Git), build automation, and software engineering best practices. • Reviewed 100+ code submissions for performance, readability, and adherence to clean code and SOLID principles. • Guided student projects simulating client-server models and file system tools using multithreading and memory management. • Provided 1:1 technical support, improving understanding of algorithms, data structures, and system-level programming.	

INTERNSHIP

Samsung Prism, India	Jul 2021 – Mar 2022
• Contributed to the development of an image processing system to generate HDR frames improving detail accuracy by 35%. • Engineered a custom fusion pipeline that synthetically generated 3–5 multi-exposure LDR frames per input image. • Integrated Reinhard, Mantiuk, and Drago tone mapping algorithms achieving 20% enhancement in visual fidelity metrics. • Ran over 1,000 test cases across varied lighting conditions to validate algorithm robustness and consistency. • Collaborated in a research-driven environment, contributing to presenting findings to a panel of 5+ domain experts.	

PROJECTS

Breast Cancer Detection Using Deep Learning Models Python, ResNet18, Vision Transformers	Jan 2025 - Apr 2025
• Addressed 40% class imbalance using targeted data augmentation (rotation, flipping, zoom), boosting model generalization. • Preprocessed 5,000+ medical images via normalization and resizing, improving input consistency and convergence speed. • Trained and fine-tuned ResNet18 and Vision Transformers, achieving 94% accuracy and 0.96 ROC-AUC in classification tasks. • Implemented evaluation metrics including F1-score (0.92), accuracy (94%), and AUC (0.96) for robust model assessment. • Demonstrated a 6% performance gain with ViTs over CNN baselines, highlighting their potential for clinical diagnostics.	
Campus Placement Training and Recruitment Management System Spring Boot, JDBC, MySQL	Sep 2024 – Dec 2024
• Built a Spring Boot REST API to manage campus placements, supporting 1,000+ student records and recruiter profiles. • Enabled JSON data exchange between front end and back end, enabling seamless API communication with 99.9% reliability. • Utilized Spring MVC, Spring REST, and JDBC for MySQL database integration; reduced data access latency by 20%. • Applied Dependency Injection using Spring's IoC container to modularize code and improve maintainability by 30%. • Employed JSP templates & XML-based Spring configuration for dynamic content rendering and application management.	

HONORS AND AWARDS

- Recipient of the ComEd Future of Energy Scholarship. (ComEd, Spring 2025)
- Awarded a Tuition Waiver for the final 2 semesters of the master's program. (NIU, Fall 2024 - Spring 2025)
- Received Recruitment Tuition Waiver in the first 2 semesters of the master's program. (NIU, Fall 2023 - Spring 2024)
- Recipient of Merit Scholarship for 4 years during bachelor's degree. (KLEF, 2019 - 2023)

VOLUNTEER

Social Media Manager, Indian Student Association	Jan 2024 - Dec 2024
Developed and executed social media strategies to enhance engagement, promote events, and foster community within the student body. Designed and scheduled content across multiple platforms, collaborated with different student organizations.
