

HETAL PATEL, MS, BS

196 E. Arthur Place, Iselin, NJ, 08830 | 224-201-6775 | Email: hpatel1070@gmail.com

Key Areas of Expertise

Power BI Dashboards, Snowflake, Tableau, SharePoint, MS SQL, Azure Dev Ops, Waterfall/Agile Methodology, Clinical Data Analysis, Pharmacy/Healthcare business Improvements, Veeva CRM, Salesforce, Rx Samples Supply Chain EDI 850/852/857 TRx, Data/API Validation, System Configuration, Gap Analysis, Commercial Ops., UAT, MS Project, CMS Medicare/Medicaid domain knowledge, Pharmacovigilance, Healthcare Claims, Payer/Provider Payments, Jira, Confluence

Professional Experience

Vertex Pharmaceuticals (Through TEKSystems), Remote – 01/2025 – 12/2025

Sr. Business Data Analyst

- Requirements & Design:
 - Translate business requirements into technical specifications for analytics/dashboard (Power BI) development teams supporting Commercial Pharma sales performance and field teams including sales, prescription, and claims data.
 - Help development team with structure & usability of dashboards (e.g. user friendliness, clear definitions)
 - Help with specific drill-downs/dashboard functionality (optimize for user experience)
 - Develop wire-frames and mock-ups based on new user requirements
 - Help facilitate design sessions with field champion team to develop requirements, functional design specs.
 - Translate business requirements into high level functional requirements (Jira User Stories)
 - Define acceptance criteria for each user story and ensure all intake requirements are met
 - Work with business stakeholders to prioritize backlog enhancements based on business value, effort and need by date.
 - Facilitate requirement refinement sessions with data architects, reporting team, SME, and data owners.
- KPI Definitions and Business Rules
 - Maintain field KPI definitions, related business rules, and test for accuracy via pulls from Snowflake
 - Document data sources for KPI metrics and ensure consistency of data sources used in metrics across all dashboards. Ensure the right data sources.
 - Work closely with the data architects and reporting team to ensure consistency of metrics across dashboards
 - Responsible for the Forecasting Dashboard implementations of advance analytics to project the Market Share Summary, Shipment and Inventory key insights, Rates, Estimated Net Revenue trends for a given time among IQVIA data sources to support decision making on promotional material strategies and effectiveness i.e. ROI and Marketing Mix analysis.
- Testing & Roll-Out
 - Facilitate structured UAT of dashboard with home office and field users
 - Document and prioritize UAT feedback
 - Developed training materials for end users.

Novo Nordisk Inc. (Through Kelly Services) Plainsboro, NJ – 02/2023 – 12/2024

Business Analyst (Finance IT)

- Working closely with business teams, system owners, Medical Affairs, and IT to understand, define and document the end-user requirements and translating them into functional and technical specifications.
- Participate in multiple (GXP, Non-GXP) projects by completing/updating project documents/Smartsheet
- Working with Vendors responsible for Veeva CRM enhancements, dashboard (Medical Insights KPIs), or analytics projects.
- Responsible for writing test scripts to support UAT execution of Test Cases/Runs in Test Information Management System, assist with IT/Quality test execution relates to the system integrations. Resolve defects.
- Complete gap analysis on system capabilities versus requirements as needed.
- Communicate closely with the SMEs, ensuring that proposed solutions effectively support operational defects and align with business requirements as documented.
- Conceptual, analytical & tactical thinking, strategic thought process. Superior listening and critical thinking skills. Proven history of working and delivering on multiple projects simultaneously, with tight deadlines and changing priorities.

Zelis Healthcare Inc. Bedminster, NJ - 03/2021- 02/2023

Senior Business Analyst, IT Business Intelligence

- Schedule requirements gathering sessions among multiple cross-functional teams, understand/analyze business requirements and develop features and visualizations that can best achieve the needs of the business using CUBES, Tableau (Power BI) or SSRS.

- Develop reporting dashboards based on the metrics and dimensions of reports.
- Worked on End-to-End healthcare claim processing lifecycle solutions to payors, providers and individuals from pre-payment through payment.
- Supported the finance team in researching all claims processing inquiries from Client to Management
- Managed all types of claims records for different health Insurance companies.
- Effectively coordinated and interacted with other cross-functional departments to implement new and maintain existing benefit plans and client pricing in the pharmacy claim adjudication system.
- Developed technical specifications documents and documented business test case scenarios for QA testing strategy for the Reinsurance Claim Transaction ETL Process.
- Write Functional Specifications, schedule BRD/FRD review sessions with Dev, QA, and other cross functional teams
- Verify and validate Tableau (Power BI) Dashboard functionalities against business/functional requirements.
- Write SQLs using MS SQL as needed for research/reporting purpose.
- Served as Scrum Master as well as the Product Owner.
- Create Epic User Stories, Tasks, sub-tasks required for the JIRA.
- Document project details in Confluence.
- Perform other jobs such as Data mapping, Gap/Impact Analysis, UAT, Prioritize Projects, change control etc.

J. Knipper & Co. Somerset, NJ - 01/2020 – 09/2020

Senior Business Systems Analyst - Pharma/E-Commerce

- Gathered Healthcare Practitioners and Sales Representative's Rx and non-RX sampling order requirements by working with the internal/external IT business partners, vendors, teams to define, document and prioritize the business requirements.
- Analyzed business application systems, prepare business rules grid, system requirements specifications, data mappings and data interface agreement documents to serve the purpose of quality assurance per GDP regulations.
- Support the client and internal stakeholders to transform client business needs into functional and operational instructions.
- Responsible to validate the Veeva objects as documented in the data interface agreement specific to the DTP/DTR Rx sample programs using Force.com, Salesforce Workbench, and Salesforce.com SOQLs.
- Supported internal systems users audits to maintain internal and client specific users' access.
- Scheduled business rules, SRS, DIA review sessions with IT/PMO/QA teams as needed.
- Prioritized the PBIs/Tasks, write Users Stories in Visual Studio Teams Services (VSTS) as followed SDLC Agile model.
- Conducted the daily standup calls, sprint planning, grooming as well as the training sessions to the internal stakeholders on VSTS Azure DevOps.
- Entered Quality Events, Investigation facts, Preventative and Corrective actions (CAPA) for the issues reported
- Responsible for the internal systems change requests, enhancements, and configurations.
- Identified/Analyzed/Monitored the risks of the custom requirements, process enhancements.
- Collaborated with the development team to address issues found during UAT and validated that corrective/preventative actions taken by development to resolve those issues.
- RX Samples Order Delivery Management Process/SCM - Review existing Global Pharmacovigilance (GPV) SharePoint to determine the level of work, effort, timeline, and tasks required to enhance/implement new/existing RX Order management system using EDI 850 (PO)/852 (Product Activity)/857(Shipment/Billing) transactions, requirements (e.g., macros, workflows and configurations needed to retain the functionality by working with the Data Management Team and Enterprise SharePoint Teams.
- Assess level of documentation required to move sites to SharePoint Online by reviewing existing documentation and identifying document requirements for new/existing online platform, including alignment with multiple cross functional systems/teams and level of effort to complete needed documentation within the systems.

CCG Marketing Solutions West Caldwell, NJ - 01/2018 – 12/2019

Senior Business Analyst/Project Manager/QA - Pharmacy e-commerce

- Requirements gathering, analyze multiple client's business requirements for the prescribers Rx sampling, and articulate functional and technical specifications, then oversee the conversion to a solution.
- Project Management - well-versed in project management tasks, such as Sprint planning, developing a project plan/tasks breakdown, compiling project status reports for management, managing scope of the projects.
- Worked as an Agile Coach and Scrum Masters to facilitate daily scrums/stand ups calls, grooming the project backlogs, review of developers' release notes, generated Agile Reports to identify billable/non billable hours spent by Dev/QA for each Client, driving deliverables cross functionally for managing multiple concurrent projects of the Pharma Clients
- Technology Used: Visual Studio, MS SQL, MS Office, Visual Studio Team Services, Agile Methodology, TFS, Veeva, Salesforce, Smartsheet, MS Project
- Data Sets Used: EDI 852 data set (Rx Product description, UPC/SKU, Qty Order/sold/on-hand, Sales history), EDI 857 transactions (Shipment, Billing, and invoice information related to the Rx Samples order)

- Application/Data Validation: Responsible to write test scripts, prepare test data for validation as per DIA/FIA, User/test environment set up, UAT based on business/functional requirements, Re-test Defects.
- Organized project plans and guided the business and IT in achieving the best solution including management of complex JIRA projects with multiple points of software integration and risks.
- Responsible to develop and maintain the Test Plans to meet project requirements, managed the Automation Test team, technical support for Scripting and Execution, support developers for implementation of tools and processes.

United Healthcare Group – Optum Technology Basking Ridge, NJ - 08/2015 – 06/2017

Lead IT Systems Analyst – Clinical, Call Center (IVR)

- Responsible for the State-wide healthcare plan data migrations, implementations in Facets and other downstream systems including Behavioral Health and DSNP (Dual Special Needs Program) which may span multiple business domains by partnering with stakeholders and appropriate functional areas such as Claims, Clinical, Enrollment, Provider, Finance, Call Center. Demonstrated experience working on cross-functional project teams
- Gathered requirements for prior authorization/referrals for HCPs, Members, out-of-network services, inpatient admission to Skilled Nursing Facility, Acute Inpatient Rehabilitation and/or LTC confirming coverage approval is on file prior to the date of service.
- Provided solution for Clinical, Member/Provider data load, Reconciliation, Call/IVR functionalities, Portal functionalities, EDI 278 to support Healthcare Claim Transactions routing and EDI 837 data sets of Health Care Claim Transactions and Reporting enhancements.
- Translate business requirements into a solution design specs. using recognized Business Analysis techniques and deliverable such as project requirements, solution summary, high level design, traceability matrix, and Business Rules configuration documents for Clinical Systems and Call/IVR work areas.
- Supported in user acceptance testing, Trouble shooting and coordination of implementations
- SDLC/Agile methodologies write User Stories, Daily Scrum, Test-Driven Developments, Sprint Planning/Grooming
- Served as a liaison between business stakeholders and service providers (e.g., IT, third-party vendors) to facilitate requests for additional scope or process changes.
- Worked with the Product Manager and the product team to set goals, document requirements, and analyze the impact of other downstream systems
- Worked with Claims/Provider teams to verify the HEDIS requirements to produce business performance reports for claims, provider, and utilization management data.
- Identified data migration risks and performed the data migration testing at the source/Target systems.
- Assist with the development of procedures to improve incident response times, analysis of incidents, and overall SOC functions.
- Managed and executed the compliance programs for SOC, HIPAA, and other data privacy regulations.
- With the Health Cloud objects, reviewed/evaluated medical care services, communicated about clinical policies, and ensure the health plan members received the right care in the right setting at the right time.

Magellan Health Services (Contract through TechOne IT) Scottsdale, AZ - 01/2015 – 08/2015

Senior IT Business/Systems Analyst, Medicare Part D IT Operations

- Responsible for gathering requirements for the Medicare Part D processes and business reporting by interviewing stakeholders, identifying project scopes, and completing requests.
- Developed business/functional requirements and traceability matrices documents for various Part D work streams such as Clinical, Call Center, Finance, RDS, Communication, SLAs, and reporting according to CMS standards and guidance.
- Served as liaison between cross-functional teams such as Business Owners, Business Intelligence team, End Users, IT Programming staff, and IT Management. Responds to Ad-Hoc requests for support and analysis.
- Conducted and/or participated in peer review activities within the team as needed.
- Understand Agile practices like daily scrum, iteration planning, retrospective, test driven, model storming etc.
- Extensive knowledge of relevant Jira/Agile/Scrum as well as the Waterfall methodologies.

CVS Health Buffalo Grove, IL - 03/2014 – 11/2014

Lead Business Systems Analyst/Project Manager, Medicare Part D IT Operations

- Ability to support for commercial products, such as Trizetto Facets, FAZAL, Info-Crossing, Pega, as well as support in-house developed applications from an operational and analysis standpoint.
- Drove solution based on RCA findings by searching for group/subgroup, plan subscription, and member details using Facets frontend and pull specific records from Facets database (Aware of Facets data dictionary) to produce the reconciliation reports.
- SME for Reports and Reconciliation activities, Lead development projects through the entire SDLC, Peer Review the work of Business Analysts. Mentor Business Analysts and ensure proper cross-training.
- Coordinated with the Med-D business partners to first gather then ensure all reporting needs are addressed through the creation of high-quality reports to be used by the Med –D business for operational and executive level decision making.

- Used a combination of MS Access, MS SQL, Oracle SQL to create and run custom queries and reports to gather and analyze Med-D Operational data. Proactively look for ways to enhance existing report portfolio by utilizing Med-D business knowledge to provide increased value to reports and analysis.
- Proactively worked with team to drive efficiency of current reporting processes by analyzing existing processes and developing and implementing changes that will result in higher quality and faster production of reports.
- Analyzed data and apply critical thinking to develop and deliver report results that are well thought out that provide the customer with all relevant data needed to make an informed decision.
- Anticipated questions about report data and proactively look for answers before the question comes in.
- Worked with the IT Operations department to identify data delivery issues and discrepancies. Perform Root Cause Analysis to identify cause of issue or source of discrepant data.
- Worked with IT business partners to identify and develop Business Requirements Documentation to be used for system enhancements and problem remediation.
- Monitored/Analyzed inbound Health Data on Veeva Data Cloud in order improve the quality and timely delivery of health/member data.

AbbVie Laboratories (Contract through Fountain Group Inc.) Abbott Park, IL - 11/2010 – 03/2014

Business Analyst/ Production Support III - Pharmaceutical Product Division (PPD) Commercial Operations

- Responsible for analyzing various data from multiple systems such as MAX Seibel, iRep, Nucleus Pharma, CARMA, Salesforce, and knowledge of Informatica MDM.
- Worked directly with the internal and external clients, IT teams, and business to enhance/automat various processes, manage user and functional requirements for Vault CTMS.
- Documented/Analyzed requests to determine feasibility of the requested change as well as the most effective way to incorporate the changes into the products as well as to the clinical and regulatory documents.
- Provided support for moderately complex technical issues and initiatives related to assigned applications, systems, databases and/or other technical products and services.
- Validate Health Care Professional's information, contribute to Address Cleansing and AbbVie Best Specialty verification process improvement to reduce the compliance issues, and support quality control measures in conjunction with the cross-functional teams.
- Provided 3rd level support as a subject matter expert to the internal and external users and third party vendors.
- Automated specialty verification and address cleansing procedure for the health care professionals using the MS Access database and VB Script. Support/Resolve change requests submitted in CARMA.
- Execute User Acceptance Tests (UAT) scripts for the CARMA, MDM, as well as other applications.
- Verified end to end functionalities of all various UAT scenarios/test cases touched upon various applications across applicable scope of work
- Defect tracking and retest defect fixes, defect Management during test execution and defect retesting.
- Reviewed the GxP regulations with the cross functional teams and SMEs to ensure that systems enhancements met all applicable regulations with the business Analyst Pharmacovigilance domains/MES System.
- Veeva Vault experience along with CTMS
- Provide support within Clinical and other groups to support Clinical business process, including design of reports to meet organizational needs relating to company's Clinical Trials Management System.

Healthation Inc. Lisle, IL - 04/2009 – 11/2010

Pharmacy Business, Senior Data Analyst/Project Manager

Supported the analytics and process development of Pharmacy Claim improvement including formulary, pharmacy, physician, and Medicare Part D benefit procedures. Responsible for all aspects of supporting clients, which includes:

- Developed Business Functional Specifications for the Pharmacy Benefit Management system enhancements.
- Performed user support activities, such as researching reported issues, developing written explanations for the business problem that ensues and working closely with the Software Engineering team to find the best solution to the problem.
- Researched issues in the existing system to perform the gap analysis to carry out a wide range of research on the FDB, MediSpan, NCPDP, HMS, CMS, HIPPA, and Medicare Part D standards. Provide data mapping documentation from source files to target data files.
- Processed limited or minimal information from the Client and developed logical design/conclusions of business processes and systems that satisfy clients' requirements as to the cause of the issue at hand.
- Communicated effectively between the Business community and the Application Development staff and understood both environments.
- Analyzed complex problems and utilized standard data analysis techniques to develop functional requirement documentation that includes process flow diagrams and use case scenarios based upon business rules.
- Used the original SDLC methodology (waterfall model) and scheduled JAD (Joint Application Development) sessions with clients and internal Dev/QA/SME teams to define business requirements for each phase of development.
- Performed pharmacy data analysis, Gap Analysis, Data Validation/modeling, SQL, user interface design, ERD, use case diagrams using Microsoft Office tools, and Coordinate User Acceptance Testing (UAT).

- Researched on HIPAA, ICD 10, ICD 9, CPT/HCPCS, ANSI 5010, and NCPDP D 0 standards to update the Pharmacy transaction standards for HIPAA. Also focused on the electronic exchange of administrative and financial information between health care providers and health plans for patient care services, including eligibility inquiries, service (treatment) authorization and referrals, claims status requests, claims and remittance advice (claims payment).

Hospira Inc. Lake Forest, IL - 04/2007 – 02/2009

Senior Business, Clinical Data Analyst/Project Manager – Strategic Marketing

Spearheaded efforts in generating of performance enhancement (QCI) reports to highlight safety software compliance and effectiveness statistics.

Provided requirements for the user interface design (Pharmacy Portal), gap analysis, validated business requirement documentations, performed system testing and end-user acceptance testing (UAT), prepared test data from IV pumps to analyze clinical data and generic drug/clinical care area name mapping.

- Business lead on the project that included organizational-wide cross-functional teams.
- Led cross-functional teams to develop next generation of product enhancements for medical devices, drug safety software and real-time remote server monitoring applications while working closely with the Hospital IT Teams.
- Lead requirements gathering for trial operational/Pharmacovigilance Systems projects and systems such as Veeva Vault Clinical, Clinical Trial Management System (CTMS) and/or serve as a representative to provide inputs to R&D and Regulatory/Medical affairs teams.
- Pharmacy Consulting team, Commercial Operations group, and the Software Development Organizations to define requirements for future safety software compliance reporting capabilities. This included database development, data analysis, data mining, custom report generation, Web Service/Prototype development, report designs and support for centralized database management as well as Salesforce.
- Demonstrated knowledge of fundamental analysis methodologies including Use Cases, Process Flows, and UML.
- Resource for clinical data, reports and facility information for the American Society of Hospital based Pharmacists (ASHP) and the Return On Investment publications, convention programs, education tools etc.
- Follow the GxP quality guidelines to ensure compliance, products safety that meet the intended use for manufacturing the infusion therapy devices.
- Experienced with clinical trials teams to enhance the clinical trial processes and reports across organization.
- Perform gap analysis, mappings between various source and target systems.
- Collaborate with product owners to build/maintain product metric dashboards.
- Followed Drug/Device Safety procedures/documentation in monitoring the safety of the ongoing Clinical Trials including processing, reviewing trend analysis to monitor and detect potential safety issues.

JDA E-Health Systems Inc. (through the Manpower) Lisle, IL - 12/2006 - 01/2007

Clinical Database Analyst

- Developed scripts to automate database functions and transfer data from legacy systems (including Mainframe) to SQL Server database using MS Visual FoxPro 8.0 and SQL server 2005.
- Handled daily file downloads from different hospitals and shared with the .NET developers.
- Worked with the business analysts to document business requirements and create use cases using standard modeling formats (such as UML).

Abbott Laboratories (through the Manpower) Abbott Park, IL - 08/2004 – 12/2006

MES QVM Specialist – Qualification Engineering Group (Abbott Diagnostic Division)

- Responsible for Qualification Verification Module (QVM) data registration of Facilities, Utilities, and Equipment. Quality signature for all facility, utility and equipment registrations in MES-QVM System as per the IQ/OQ/PQ Protocols.
- Reviewed the GxP regulations for making quality products with the cross functional teams and SMEs.
- Scheduled and conducted facilities, utilities and equipment (FUE) inventories. Generated asset inventory reports using ORACLE Database. Supervised team of 6 and trained new hires for Manufacturing Equipment System (MES) procedures, I-Doc, E-Cars, Val-Track, CAS, iCAS, and SMART systems.
- Pharmacovigilance activities help to monitor the safety profile of various products/equipment for clinical development
- Developed a username and password management website using .NET and MS SQL 2005 environment to authenticate different resources.
- Developed Pharmaceutical Asset Management system for the hand-held devices using MS Visual Studio 2005, Web services, and MS SQL Server 2005 database.
- Participated in monitoring FUE changes impacting Pharmacovigilance and risk management.

Laboratory Corporation of America Elmhurst, IL - 12/2002 – 12/2004

Specimen Manager/Stat Coordinator

Played a key role in the specimen management department to coordinate workflow in the following areas: accessioning, specimen management, technical services, imaging, and documenting test order details.

- Responsible for overall specimen related operations, data validation and correcting specimen discrepancies.

- Developed a project plan to accomplish daily routine work and production goal to make on time shipment every night. Solved specimen and test order related problems.
- Managed patient, physician, and billing information from source documents according to client specifications.
- Documented cytological information to generate daily reports on UNIX based system.
- Helped co-workers to solve any technical problems such as software (Specimen Integrity System), hardware, and network related problems if needed.
- Performed a stat coordinator role to provide patient's test results to the client in a timely manner.
- Supported the Specimen Accessioning, Frozen Samples, Imaging, and Billing process as needed.

Walgreens Health Initiatives Bannockburn, IL - 10/2002 – 12/2002

Claim Processing Clerk

- Recruited to process, analyze, and report adjudicated claims.
- Documented information for patients, their claims and medication. Processed claims for clients using Health Care Excellence Pharmacy Benefit Management Systems.
- Managed client, group, plan, special edits, patient, claims (Member, Pharmacy, Adjudicated claims, error claims entry), drug, providers (Pharmacy, Practitioner, Provider) information.

Degrees/ Professional Certifications

1. DePaul University, Chicago, IL 2005
Master of Science in Mobile E-Commerce Technology
2. Sardar Patel University, India 1989
Bachelor of Science, Mathematics
3. St. Mary's High School, India 1985
High School Diploma
4. Microhard Technology, Chicago, IL – Aug.2004
Certificate, ORACLE 9i DBA
5. Canadian Business College, Toronto, CANADA
[1] Certificate, Information Technology Specialist – Oct.2000
[2] Certificate, Oracle 8i - Database Administration – Dec.2000
6. B.J.V.M. Commerce College, INDIA – Dec.1993
Certificate, Diploma in Computer Science and Applications
7. Computer Society of India, INDIA – Dec.1992
Certificate, O-Level Business Professional Programmer

Professional Associations

HIMSS Nursing Informatics Workgroup Fall Technology Conference, IL – 2008

Student volunteer - designed program materials and served as a room monitor for educational sessions.
